Retrieval Of A Legacy 19th Century American Women Inventors:

The Retrieval of a Legacy Denise Pilato, 2000-06-30 Throughout the 19th century women inventors developed significant technologies yet because of complex cultural barriers and the pervasive image of the inventor as male their technological contributions have until now been ignored and undervalued This study the first to focus exclusively on 19th century women explores the fascinating relationship between women and technology According to a government census there were nearly 5 000 patents awarded to women between 1790 and 1888 further many women invented significant technologies but never received a patent The individual and collective experiences of these women reveal both why gendered assumptions about women and technology persist and why they are assumptions not reality Women invented such things as the first ice cream freezer a pyrotechnic signal flare used extensively by the U S Navy a reservoir and dam system adopted by the state of California and more Still names such as Nancy Johnson Martha Coston and Harriet Strong are not recognized as part of the history of American technology It was not the lack of technological ability or creativity that prevented women inventors from full participation in technological advancement Rather educational access legal enfranchisement property rights gendered standards of professionalization and sexual division of labor constructed discriminatory barriers limiting women s relationship with technology

The Retrieval of a Legacy Denise E. Pilato, 1998 **American Independent Inventors in an Era of Corporate R&D** Eric S. Hintz, 2021-08-17 How America s individual inventors persisted alongside corporate R D labs as an important source of inventions During the nineteenth century heroic individual inventors such as Thomas Edison and Alexander Graham Bell created entirely new industries while achieving widespread fame However by 1927 a New York Times editorial suggested that teams of corporate scientists at General Electric AT T and DuPont had replaced the solitary garret inventor as the wellspring of invention But these inventors never disappeared In this book Eric Hintz argues that lesser known inventors such as Chester Carlson Xerox photocopier Samuel Ruben Duracell batteries and Earl Tupper Tupperware continued to develop important technologies throughout the twentieth century Moreover Hintz explains how independent inventors gradually fell from public view as corporate brands increasingly became associated with high tech innovation Focusing on the years from 1890 to 1950 Hintz documents how American independent inventors competed and sometimes partnered with their corporate rivals adopted a variety of flexible commercialization strategies established a series of short lived professional groups lobbied for fairer patent laws and mobilized for two world wars After 1950 the experiences of independent inventors generally mirrored the patterns of their predecessors and they continued to be overshadowed during corporate R D s postwar golden age The independents enjoyed a resurgence however at the turn of the twenty first century as Apple s Steve Jobs and Shark Tank s Lori Greiner heralded a new generation of heroic inventor entrepreneurs By recovering the stories of a group once considered extinct Hintz shows that independent inventors have long been and remain an important source of new technologies **A History of Intellectual Property in 50 Objects**
