Review Vol 79 1 Fall 1989 University Press Of Virginia Review:

Art and Memory in the Work of Elizabeth Bishop Jonathan Ellis, 2018-01-17 In *Art and Memory in the Work of Elizabeth Bishop* Jonathan Ellis offers evidence for a redirection in Bishop studies toward a more thorough scrutiny of the links between Bishop's art and life. The book is less concerned with the details of what actually happened to Bishop than with the ways in which she refracted key events into writing both personal unpublished material as well as stories, poems, and paintings. Thus Ellis challenges Bishop's reputation as either a strictly impersonal or personal writer and repositions her poetry between the Modernists on the one hand and the Confessionals on the other. Although Elizabeth Bishop was born and died in Massachusetts, she lived a life more bohemian and varied than that of almost all of her contemporaries, a fact masked by the tendency of biographers and critics to focus on Bishop's life in the United States. Drawing on published works and unpublished material overlooked by many critics, Ellis gives equal attention to the influence of Bishop's Canadian upbringing on her art and to the shifts in her aesthetic and personal tastes that took place during Bishop's residence in Brazil during the 1950s and 1960s. By bringing together the whole of Bishop's work, this book opens a welcome new direction in Bishop studies specifically and in the study of women poets generally.

The Persuaders S. John, 2002-05-22 The impact of political lobbyists remains highly controversial. No one has explored when they matter. This book tells readers when lobbyists count and analyses the relationship between lobbying, policy outcomes, and the impact of external factors to reveal the professional lobbyist's limited effect on policy. On most policy issues, lobbyists simply do not matter. But on rare occasions, lobbyists can make a difference, and this book explains when they matter and why.

Corporate Governance in the Shadow of the State Marc Moore, 2013-03-01 Over recent decades, corporate governance has developed an increasingly high profile in legal scholarship and practice, especially in the US and UK. But despite widespread interest, there remains considerable uncertainty about how exactly corporate governance should be defined and understood. In this important work, Marc Moore critically analyses the core dimensions of corporate governance law in these two countries, seeking to determine the fundamental nature of corporate governance as a subject of legal enquiry. In particular, Moore examines whether Anglo-American corporate governance is most appropriately understood as an aspect of private facilitative law or as a part of public regulatory law. In contrast to the dominant contractarian understanding of the subject, which sees corporate governance as an institutional response to investors' market-driven private preferences, this book defines corporate governance as the manifestly public problem of securing the legitimacy and in turn sustainability of discretionary administrative power within large economic organisations. It emphasises the central importance of formal accountability norms in legitimating corporate managers' continuing possession and exercise of such power and demonstrates the structural necessity of mandatory public regulation in this regard. In doing so, it highlights the significant and conceptually irreducible role of the regulatory state in determining the key contours of the Anglo-American corporate governance framework. The normative effect is to extend the

state's acceptable policy making role in corporate governance as an essential supplement to private ordering dynamics

Christianity in America

G. Wright Doyle, 2013-07-17 Was America founded as a Christian nation What role has the Christian faith of many of its leaders played in the course of its history How has Christianity affected American culture and society This trenchant critique of the role of Christianity in American history highlights both the ways in which Christians have made many valuable contributions as salt and light and how they have caused a great deal of damage by trying to be savior and lord Believers in Christ have built one of the most Christianized countries in the world with benefits for millions They have also nurtured messianic aspirations that have spawned disasters for themselves and other countries Generous in praise for dedicated believers who have reflected the character of Christ the book is also unsparing in

criticism of Christians who have sometimes with the best intentions failed to act wisely In short the reader will be encouraged by the many triumphs of Christianity in America and sobered by its tragedy **EU Competition Law, Data Protection and Online Platforms: Data as Essential Facility** Inge Graef, 2016-10-17 All are agreed that the digital economy contributes to a dynamic evolution of markets and competition Nonetheless concerns are increasingly raised about the market dominance of a few key players Because these companies hold the power to drive rivals out of business regulators have begun to seek scope for competition enforcement in cases where companies claim that withholding data is needed to satisfy customers and cut costs This book is the first focus on how competition law enforcement tools can be applied to refusals of dominant firms to give access data on online platforms such as search engines social networks and e commerce platforms commonly referred to as the gatekeepers of the Internet The question arises whether the denial of a dominant firm to grant competitors access to its data could constitute a refusal to deal and lead to competition law liability under the so called essential facilities doctrine according to which firms need access to shared knowledge in order to be able to compete A possible duty to share data with rivals also brings to the forefront the interaction of competition law with data protection legislation considering that the required information may include personal data of individuals Building on the refusal to deal concept and using a multidisciplinary approach the analysis covers such issues and topics as the following data portability interoperability data as a competitive advantage or entry barrier in digital markets market definition and dominance with respect to data disruptive versus sustaining innovation role of intellectual property regimes economic trade off in essential facilities cases relationship of competition enforcement with data protection law and data related competition concerns in merger cases The author draws on a wealth of relevant material including EU and US decision making practice case law and policy documents as well as economic and empirical literature on the link between competition and innovation The book concludes with a proposed framework for the application of the essential facilities doctrine to potential forms of abuse of dominance relating to data In addition it makes suggestions as to how data protection interests can be integrated into competition policy An invaluable contribution to ongoing academic and policy discussions about how data related competition concerns should be addressed under competition law the analysis clearly demonstrates how existing competition tools for market definition and assessment of dominance can be applied to online platforms It will be of immeasurable value to the many jurists business persons and academics concerned with this very timely subject **Local Government Autonomy** Michael E. Libonati, United States. Advisory Commission on Intergovernmental Relations, 1993 **The Nature Study Movement** Kevin C.
