Galster, 2019-03-13 Drawing on economics sociology geography and psychology Galster delivers a clear sighted explanation of what neighborhoods are how they come to be and what they should be Urban theorists have tried for decades to define exactly what a neighborhood is But behind that daunting existential question lies a much murkier problem never mind how you define them how do you make neighborhoods productive and fair for their residents In *Making Our Neighborhoods Making Our Selves* George C Galster delves deep into the question of whether American neighborhoods are as efficient and equitable as they could be socially financially and emotionally and if not what we can do to change that Galster aims to redefine the relationship between places and people promoting specific policies that reduce inequalities in housing markets and beyond **The University and Urban Revival** Judith Rodin, 2015-12-04 In the last quarter of the twentieth century urban colleges and universities found themselves enveloped by the poverty crime and physical decline that afflicted American cities Some institutions turned inward trying to insulate themselves rather than address the problems in their own backyards Others attempted to develop better community relations though changes were hard to sustain Spurred by an unprecedented crime wave in 1996 University of Pennsylvania President Judith Rodin knew that the time for urgent action had arrived and she set a new course of proactive community engagement for her university Her dedication to the revitalization of West Philadelphia was guided by her role not only as president but also as a woman and a mother with a deep affection for her hometown The goal was to build capacity back into a severely distressed inner city neighborhood educational capacity retail capacity quality of life capacity and especially economic capacity guided by the belief that town and gown could unite as one richly diverse community Cities rely on their academic institutions as stable places of employment cultural centers civic partners and concentrated populations of consumers for local business and services And a competitive university demands a vibrant neighborhood to meet the needs of its faculty staff and students In keeping with their mission urban universities are uniquely positioned to lead their communities in revitalization efforts yet this effort requires resolute persistence During Rodin s administration 1994 2004 the Chronicle of Higher Education referred to Penn s progress as a national model of constructive town gown interaction and partnership This book narrates the challenges frustrations and successes of Penn s campaign and its prospects for long term change **The New American Suburb** Katrin B. Sunburnt Cities Justin B. Hollander, 2011-01-18 In recent years there has been a growing focus on urban and environmental studies and the skills and techniques needed to address the wider challenges of how to create sustainable communities Central to that demand is the increasing urgency of addressing the issue of urban decline and the response has almost always been to pursue growth policies to attempt to reverse that decline The track record of growth policies has been mixed at best Until the first decade of the twenty first century decline was assumed to be an issue only for former industrial cities the so called Rust Belt But the sudden reversal in growth in the major cities of the American Sunbelt has shown that urban decline can be a much wider issue Justin Hollander s research into urban decline in both the Sun and Rust Belts draws lessons planners and policy makers that can be applied universally Hollander addresses the reasons and statistics behind these shrinking cities with a positive outlook arguing that growth for growth s sake is not beneficial for communities suggesting instead that urban development could be achieved through shrinkage Case studies on Phoenix Flint Orlando and Fresno support the argument and Hollander delves into the numbers literature and individual lives affected and how they have changed in response to the declining regions Written for urban scholars and to suit a wide range of courses focused on contemporary urban studies this text forms a base for all study on shrinking cities for professionals academics and students in urban design planning public administration and sociology

Design for Social Diversity Emily Talen, Sungduck Lee, 2018-03-13 The most successful

urban communities are very often those that are the most diverse in terms of income age family structure and ethnicity and yet poor urban design and planning can stifle the very diversity that makes communities successful Just as poor urban design can lead to sterile monoculture successful planning can support the conditions needed for diverse communities This new edition addresses the physical requirements of socially diverse neighborhoods Using the city of Chicago and its surrounding suburban areas as a case study the authors investigate whether social diversity is related to particular patterns and structures found within the urban built environment Design for Social Diversity provides urban designers and architects with design strategies and tools to ensure that their work sustains and nurtures social diversity
