Technospaces Sally Munt, 2001-06-20 Science and technology have had a profound effect on the way humans perceive space and time In this book an international team of authors explore themes of depth and surface of real and conceptual space and of human machine interaction The collection is organized around the concept of Technospace the temporal realm where technology meets human practice In exploring this intersection the contributors initiate debate on a number of important conceptual questions Is there a clear distinction between the real spaces of the body or the city and the conceptual space of virtual reality How are real and metaphorical spaces of electronic cultures quantified and regulated Is there an ethics of technospace Historically the reception of new technologies has been invested with romantic idealism on the one hand and panic on the other The authors argue that in order for utopian dreams to be tempered by ethical humanistic needs we have an urgent need to reveal reflect upon and evaluate technospace and our relationship to it *Practical and Theoretical Aspects of Geological Interpretation of Gravitational, Magnetic and Electric Fields* Danis Nurgaliev, Natalia Khairullina, 2019-02-01 This volume offers an overview of the state of the art theoretical and practical approaches currently used for geophysical data interpretation It includes new methods and techniques for solving data processing problems and an analysis of geopotential fields by international researchers It discusses topics such as 1 Theoretical issues of interpretation of gravitational magnetic and electric fields including general methods of interpreting potential fields and other geophysical data 2 Modern algorithms and computer technologies for interpreting geophysical fields 3 The study of Earth deep structure using terrestrial and satellite potential field anomalies 4 Geological interpretation of gravitational magnetic and electric fields This proceedings book is of interest to all geophysical researchers **Eating Anxiety** Chad Lavin, 2013-04-07

Debates about obesity are really about the meaning of responsibility The trend toward local foods reflects the changing nature of space due to new communication technologies Vegetarian theory capitalizes on biotechnology's challenge to the meaning of species And food politics as this book makes powerfully clear is actually about the political anxieties surrounding globalization In *Eating Anxiety* Chad Lavin argues that our culture's obsession with diet obesity meat and local foods enacts ideological and biopolitical responses to perceived threats to both individual and national sovereignty Using the occasion of eating to examine assumptions about identity objectivity and sovereignty that underwrite so much political order Lavin explains how food functions to help structure popular and philosophical understandings of the world and the place of humans within it He introduces the concept of digestive subjectivity and shows how this offers valuable resources for rethinking cherished political ideals surrounding knowledge democracy and power Exploring discourses of food politics *Eating Anxiety* links the concerns of food especially issues of sustainability public health and inequality to the evolution of the world order and the possibilities for democratic rule It forces us to question the significance of consumerist politics and simultaneously the relationship between politics and ethics public and private

Fat Gay Men Jason Whitesel, 2014-07-25 To be fat in a thin obsessed gay culture can be difficult Despite affectionate in-group monikers for big gay men chubs bears cubs the anti-fat stigma that persists in American culture at large still haunts these individuals who often exist at the margins of gay communities In *Fat Gay Men* Jason Whitesel delves into the world of Girth Mirth a nationally known social club dedicated to big gay men illuminating the ways in which these men form identities and community in the face of adversity In existence for over forty years the club has long been a refuge and safe space for such men Both a partial insider as a gay man and an outsider to Girth Mirth Whitesel offers an insider's critique of the gay movement questioning whether the social consequences of the failure to be height-weight proportionate should be so extreme in the gay community This book documents performances at club events and examines how participants use allusion and campy queer behavior to reconfigure and reclaim their sullied body images focusing on the numerous tensions of marginalization and dignity that big gay men experience and how they negotiate these tensions via their membership to a size-positive group Based on ethnographic interviews and in-depth field notes from more than 100 events at bar nights caf klatches restaurants potlucks holiday bashes pool parties movie nights and weekend retreats the book explores the woundedness that comes from being relegated to an inferior position in gay hierarchies and yet celebrates how some gay men can reposition the shame of fat stigma through carnival camp and play A compelling and rich narrative *Fat Gay Men* provides a rare glimpse into an unexplored dimension of weight and body image in American culture

The Culture of Obesity in Early and Late Modernity E. Queering Fat Embodiment Cat Pausé, Jackie Wykes, Samantha Murray, 2016-05-23 Cultural anxieties about fatness and the attendant stigmatisation of fat bodies have lent a medical authority and cultural legitimacy to what can be described as fat phobia Against the backdrop of the ever growing medicalisation pathologisation and commodification of fatness coupled with the moral panic over an alleged obesity epidemic this volume brings together the latest scholarship from various critical disciplines to challenge existing ideas of fat and fat embodiment Shedding light on the ways in which fat embodiment is lived experienced regulated and reproduced across a range of cultural sites and contexts *Queering Fat Embodiment* destabilises established ideas about fat bodies making explicit the intersectionality of fat identities and thereby countering the assertion that fat studies has in recent years reproduced a white ableist heteronormative subjectivity in its analyses A critical queer examination on fatness *Queering Fat Embodiment* will be of interest to scholars of cultural and queer theory sociology and media studies working on questions of embodiment stigmatisation and gender and sexuality *The Weight of Images*
