Revolution At The Margins The Impact Of Competition On Urban School Systems:

Revolution at the Margins Frederick M. Hess, 2004-05-13 For more than a decade school choice has been a flashpoint in debates about our nation's schooling. Perhaps the most commonly advanced argument for school choice is the notion that markets will force public schools to improve, particularly in those urban areas where improvement has proved so elusive. However, the question of how public schools respond to market conditions has received surprisingly little attention. Revolution at the Margins examines the impact of school vouchers and charter schooling on three urban school districts, explores the causes of the behavior observed, and explains how the structure of competition is likely to shape the way it affects the future of public education. The book draws on research conducted in three school districts at the center of the school choice debate during the 1990s: Milwaukee, Wisconsin; Cleveland, Ohio; and Edgewood, Texas. Case studies examine each of these three districts from the inception of their local school choice program through the conclusion of the 1999 school year. The three school districts studied did not respond to competition by emphasizing productivity or efficiency. Instead, under pressure to provide some evidence of response, administrators tended to expand public relations efforts and to chip holes in the rules, regulations, and procedures that regulate public sector organizations. Inefficient practices were not rooted out, but some rules and procedures that protect employees and vocal constituencies were relaxed. Public school systems are driven by political logic, according to Hess, and their incentives lead them to respond generally through symbolic and metaphorical gestures. Choice-induced changes in public school systems will be shaped by public governance, the market context in which they operate, and their organizational characteristics. Revolution at the Margins encourages scholars and policymakers to think more carefully about the costs and benefits of educational competition.

The Urban School System of the Future Andy Smarick,2012-10-12 For more than two generations the traditional urban school system the district has utterly failed to do its job prepare its students for a lifetime of success Millions and millions of boys and girls have suffered the grievous consequences The district is irreparably broken For the sake of today s and tomorrow s inner city kids it must be replaced The Urban School System of the Future argues that vastly better results can be realized through the creation of a new type of organization that properly manages a city s portfolio of schools using the revolutionary principles of chartering It will ensure that new schools are regularly created that great schools are expanded and replicated that persistently failing schools are closed and that families have access to an array of high quality options This new entity will focus exclusively on school performance meaning among other things our cities can thoughtfully integrate their traditional public charter public and private schools into a single high functioning k 12 system For decades the district has produced the most heartbreaking results for already at risk kids The Urban School System of the Future explains how we can finally turn the tide and create dynamic responsive high performing self improving urban school systems that fulfill the promise of public education

More Than One Struggle Jack Dougherty,2005-12-15 Traditional narratives of black educational history suggest that African Americans offered a unified voice concerning Brown v Board of Education Jack Dougherty counters this interpretation demonstrating that black activists engaged in multiple overlapping and often conflicting strategies to advance the race by gaining greater control over schools Dougherty tells the story of black school reform movements in Milwaukee from the 1930s to the 1990s highlighting the multiple perspectives within each generation In profiles of four leading activists he reveals how different generations redefined the meaning of the Brown decision over time to fit the historical conditions of their particular struggles William Kelley of the Urban League worked to win teaching jobs for blacks and to resettle Southern black migrant children in the 1950s Lloyd Barbee of the NAACP organized protests in support of integrated schools and the teaching of black history in the 1960s and Marian McEvilly and Howard Fuller contested in different ways the politics of implementing desegregation in the 1970s paving the way for the 1990s private school voucher movement Dougherty concludes by contrasting three interpretations of the progress made in the fifty years since Brown showing how historical perspective can shed light on contemporary debates over race and education reform

Urban Education Karen Symms Gallagher,Rodney Goodyear,Dominic Brewer,Robert Rueda,2013-03-19 Many factors complicate the education of urban students Among them have been issues related to population density racial ethnic cultural and linguistic diversity poverty racism individual and institutional and funding levels

Although urban educators have been addressing these issues for decades placing them under the umbrella of urban education and treating them as a specific area of practice and inquiry is relatively recent. Despite the wide adoption of the term, a consensus about its meaning exists at only the broadest of levels. In short, urban education remains an ill-defined concept. This comprehensive volume addresses this definitional challenge and provides a 3-part conceptual model in which the achievement of equity for all, regardless of race, gender, or ethnicity, is an ideal that is central to urban education. The model also posits that effective urban education requires attention to the three central issues that confront all education systems: a) accountability of individuals and the institutions in which they work, b) leadership, which occurs in multiple ways and at multiple levels, and c) learning, which is the *raison d'être* of education. Just as a three-legged stool would fall if any one leg were weak or missing, each of these areas is essential to effective urban education and affects the others.

Handbook of Education Policy Research Gary Sykes, Barbara Schneider, David N. Plank, 2012-09-10. Co-published by Routledge for the American Educational Research Association (AERA). Educational policy continues to be of major concern. Policy debates about economic growth and national competitiveness, for example, commonly focus on the importance of human capital and a highly educated workforce. Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive AERA-sponsored Handbook. Organized into seven sections, the Handbook focuses on: 1) disciplinary foundations of educational policy, 2) methodological perspectives, 3) the policy process, 4) resources management and organization, 5) teaching and learning policy, 6) actors and institutions, and 7) education access and differentiation. Drawing from multiple disciplines, the Handbook's over one hundred authors address three central questions: What policy issues and questions have oriented current policy research? What research strategies and methods have proven most fruitful? And what issues, questions, and methods will drive future policy research? Topics such as early childhood education, school choice, access to higher education, teacher accountability, and testing and measurement cut across the 63 chapters in the volume. The politics surrounding these and other issues are objectively analyzed by authors and commentators. Each of the seven sections concludes with two commentaries by leading scholars in the field. The first considers the current state of policy design, and the second addresses the current state of policy research. This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic government and think tank researchers engaged in policy research.
