Steering Human Evolution Yehezkel Dror, 2020-05-07 Humanity must steer its evolution. As human knowledge moves a step ahead of Darwin's theories, this book presents the emergence of human-made meta-evolution shaping our alternative futures. This novel process poses fateful challenges to humanity which require regulation of emerging science and technology which may endanger the future of our species. However, to do so successfully, a novel humanity craft has to be developed. Main ideologies and institutions need redesign; national sovereignty has to be limited; a decisive global regime becomes essential; some revaluation of widely accepted norms becomes essential; and a novel type of political leader based on merit in addition to public support is urgently needed. Taking into account the strength of nationalism and vested interests, it may well be that only catastrophes will teach humanity to metamorphose into a novel epoch without too high transition costs. But initial steps such as United Nations reforms are urgent in order to contain calamities and may soon become feasible. Being both interdisciplinary and based on personal experience of the author, this book adds up to a novel paradigm on steering human evolution. It will be of great interest to scholars and researchers of modern history, evolution,

sciences future studies political science philosophy of action and science and technology It will also be of wide appeal to the general reader anxious about the future of life on Earth Comments on the Corona pandemic add to the book's concrete significance
