presents Nobel Laureate Santiago Ramón y Cajal's contributions to neuroscience through his groundbreaking artistic brain imagery. Santiago Ramón y Cajal (1852-1934) was the father of modern neuroscience and an exceptional artist. He devoted his life to the anatomy of the brain, the body's most complex and mysterious organ. His superhuman feats of visualization based on fanatically precise techniques and countless hours at the microscope resulted in some of the most remarkable illustrations in the history of science. *Beautiful Brain* presents a selection of his exquisite drawings of brain cells, brain regions, and neural circuits with accessible descriptive commentary. These drawings are explored from multiple perspectives. Larry W. Swanson describes Cajal's contributions to neuroscience. Lyndel King and Eric Himmel explore his artistic roots and achievement. Eric A. Newman provides commentary on the drawings, and Janet M. Dubinsky describes contemporary neuroscience imaging techniques. This book is the companion to a traveling exhibition opening at the Weisman Art Museum in Minneapolis in February 2017, marking the first time that many of these works, which are housed at the Instituto Cajal in Madrid, have been seen outside of Spain. *Beautiful Brain* showcases Cajal's contributions to neuroscience, explores his artistic roots and achievement, and looks at his work in relation to contemporary neuroscience imaging, appealing to general readers and professionals alike.

Biographical Note on Santiago Ramón Y Cajal Fernando de Castro, Santiago Ramón y Cajal, 1964

Santiago! Jay Hosler, 2022-11-22. A graphic novel retelling of the inspiring true story of polymath Santiago Ramón y Cajal, visionary pioneer of modern neuroscience and his early dreams of becoming an artist. Based on a true story, Santiago Ramón y Cajal is every child who has struggled to navigate the expectations of adults. As a young boy, all Santiago wanted to do was be an artist. But his father wanted him to become a doctor, insisting that pursuing art was not a true profession. Although Santiago was forbidden by his parents to make art, Santiago secretly kept at it, making homemade paints and brushes and honing his craftsmanship. He also loved figuring out how things worked and made slingshots for his friends and even a fully functioning and very dangerous cannon. Sadly, the one thing he couldn't figure out was his father. After years of locking horns, Santiago's father seemed to win, and Santiago was sent to medical school. As a medical student, he discovered the wonders of how animal bodies work, and his studies eventually led him to the microscopic mysteries of the brain. Using the artistic skills he honed as a child, Santiago painted brain cells to unlock their secrets. His pursuit of art had trained him to be observant, persistent, resourceful, and creative in his research. In 1906, he won the Nobel Prize for medicine and is considered the father of modern neuroscience, proving anything is possible, even for a mischief maker.
