Sartre And His Predecessors The Self And The Other:

Sartre and his Predecessors William Ralph Schroeder, 2019-04-15 This study first published in 1984 presents an explanation and critical examination of the theories of Sartre Heidegger Husserl and Hegel on the fundamental relationships between persons It also synthesizes the results into a new conception of one's relation to other people Sartre's famous discussion of the Look in his early treatise Being and Nothingness is the point of departure and central text Since Sartre critically responds to his three famous predecessors these thinkers are given an independent hearing The book demonstrates various ways in which persons are internally related to one another shows that one's access to other people typically does not compare unfavourably with one's access to oneself and establishes the importance of a prior comprehension of the status of other people for an adequate treatment of knowing them Sartre's 'Being and Nothingness' Sebastian Gardner, 2009-01-01 This text presents a concise and accessible introduction Jean Paul Sartre's existentialist book Being and Nothingness

Sartre's Anthropology as a Hermeneutics of Praxis Kristian Klockars, 2019-01-04 First published in 1998 this volume deals with the legacy of Sartre and functions as a way of going beyond Sartre by means of Sartre aiming to understand how we are to understand what we ourselves do and how we are to understand human being and human reality Kristian Klockars main aim is intended to communicate three questions how close Sartre's later anthropology comes to hermeneutics whether the idea of a hermeneutics of praxis could be seen as a possible solution to the internal tensions of Sartre's conception thinking with Sartre beyond Sartre and whether a hermeneutics of praxis can constitute a living challenge to contemporary thought **Central Works of Philosophy v4** John Shand, 2015-01-28 Central Works of Philosophy is a major multi volume collection of essays on the core texts of the Western philosophical tradition From Plato's Republic to the present day the five volumes range over 2 500 years of philosophical writing covering the best most representative and most influential work of some of our greatest philosophers Each essay has been specially commissioned and provides an overview of the work clear and authoritative exposition of its central ideas and an assessment of the work's importance Together these books provide an unrivaled companion for studying and reading philosophy one that introduces the reader to the masterpieces of the western philosophical canon The period 1900-60 which this volume covers witnessed changes in logical and linguistic analysis far beyond anything dreamt of in the previous history of the subject The volume begins with chapters on the key texts of the Cambridge philosophers Moore Russell and Wittgenstein which together marked the emergence of analytical philosophy The Vienna Circle of the 1920s and the development of logical positivism in the 1930s and 1940s are represented by chapters on two fundamental works by Carnap and Ayer William James Pragmatism which formulated pragmatism's epistemology and made it known throughout the world represents in the volume the distinctive ideas of the American pragmatists Essays on Husserl's The Idea of Phenomenology Heidegger's Being and Time Sartre's Being and Nothingness and Merleau-Ponty's Phenomenology of Perception cover the core texts of the hugely significant phenomenological movement Of the linguistic

The Experience of Being as Goal of Human Existence Versus A. George, 2000 [Self and Affect](#) Stefan Lang, Maik Niemeck, 2025-01-11 The self self awareness and emotions are central subjects within contemporary philosophy of mind but comparatively little attention has been paid to the relationships between them This volume brings together philosophers from different specialisms to explore these relationships from three different angles First whether a theory of self awareness can contribute to a theory of emotion including how different aspects and kinds of self awareness are related to different emotions Second from the opposite direction whether research into emotions can help achieve a better understanding of self consciousness Finally the book considers how emotions are involved in the nature and development of selves *Self and Affect* is essential reading for all scholars and researchers of the philosophy of mind especially those focussing on emotions and self awareness
