Savage Money The Anthropology And Politics Of Commodity Exchange:

Savage Money Chris A. Gregory, 1997 The deeper philosophical meaning of value is examined in this thought provoking study of the household values that are associated with agricultural land rural marketing village money lending and the use of diverse forms of money in Central India Gregory anthropology Australian National U uses a comparative approach based on extensive field work in Central India to analyze the values that spring from reciprocally recognized relations of affinity consanguinity and contiguity and to contemplate how these relate to western notions of money and value the savage money of free market capitalism This is a second printing of a 1997 book c Book News Inc Economics, Anthropology and the Origin of Money as a Bargaining Counter Patrick Spread, 2022-12-29 For many decades economists have disputed with economic anthropologists over the origins of money Economists claim that money emerged from barter exchange anthropologists claim that it originated as a unit of account in the temples and palaces of ancient Mesopotamia This book argues that money originated as a bargaining counter in a system of money bargaining emerging almost seamlessly from barter bargaining This is not the money of mainstream economic conception a veil cast over a system of resource allocation defined in mathematical terms Confidence in the bargaining counter is sustained through support bargaining a process in which individuals seek the support of their associates but seek at the same time to advance their own interests A comprehensive Introduction to Support Bargaining and Money Bargaining is provided by the work The arrival of coin money is recognised by many as a crucial event in the history of mankind and it is argued here that the distinctive character of support bargaining in ancient Greek city states made possible the introduction of coin money The dependence of coin money on a particular form of support bargaining also suggests the reason why coin money was not introduced much earlier given that the technology for producing coins was available long before their adoption This book will be of great interest to researchers in the history and origins of money banking and economic theory more broadly **The Politics and Ethics of the Just Price** Peter Luetchford, Giovanni Orlando, 2019-06-19 Comprising eight case studies from around the world this volume investigates the social political and ethical implications of markets through the specific lens of prices Drawing on the most recent scholarship in economic anthropology it represents the first systematic attempt to address ethnographically the ancient debate on the just price **A Politics of Presence** Peter Pels, 2013-12-16 Christian missions in Africa are commonly viewed as a blatant example of ethnocentrism This stereotype partly exists because the day to day interaction between missionaries and Africans has so rarely been studied This book shows how Africans and missionaries co produced a Catholic Church in the Uluguru mountains of Eastern Tanzania in the late colonial period thereby adapting each others routines in the fields of initiation education magic and religion It explores how the presence of the mission resulted in a rift between spiritual and worldly magic and in the underdevelopment of the capacity of Waluguru to manage their own practices of revelation Handbook of the Economics of Giving, Altruism and Reciprocity Serge-Christophe Kolm, Jean Mercier

Ythier,2006-07-20 The Handbook on the Economics of Giving Reciprocity and Altruism provides a comprehensive set of reviews of literature on the economics of nonmarket voluntary transfers The foundations of the field are reviewed first with a sequence of chapters that present the hard core of the theoretical and empirical analyses of giving reciprocity and altruism in economics examining their relations with the viewpoints of moral philosophy psychology sociobiology sociology and economic anthropology Secondly a comprehensive set of applications are considered of all the aspects of society where nonmarket voluntary transfers are significant family and intergenerational transfers charity and charitable institutions the nonprofit economy interpersonal relations in the workplace the Welfare State and international aid Every volume contains contributions from leading researchers Each Handbook presents an accurate self contained survey of a particular topic The series provides comprehensive and accessible surveys

The Magical Body Richard Eves,2014-01-09 An intriguing exploration of the role and significance of the body in the world of a Pacific Islands People the Lelet of New Ireland Papua New Guinea In vivid ethnographic detail the monograph captures the fluidity and complexity of Lelet conceptions of corporeality and their significance to identity as they encounter the influences of modernity in the form of colonialism Christianity and cash cropping The author examines the importance of the body to constructions of identity and difference and its role in the constitution of place and space The book provides a richly detailed ethnographic study of magical belief and the body whilst paying particular attention to the polyvalent meanings of bodily images and metaphors as they are used in numerous contexts of magic

FairEconomy Wolfgang Fikentscher,Philipp Hacker,Rupprecht Podszun,2013-03-14 FairEconomy is a concept for a free and fair market economy In response to the financial and economic crises of the past years the authors develop fundamental ideas of how a market economy works what rules markets need and who safeguards fairness and equal opportunity in such an economy The book sets out the design of a sustainable market order Going back to the very roots of doing business it offers a fascinating insight into the cultural and anthropological premises of the market economy Fairness and free competition can be identified as key elements of successful markets sometimes neglected in politics and business Legal rules need to ensure that fairness and economic freedom work The same holds true for the relationship of risk and liability that has been overlooked in the banking sector The ideas of a FairEconomy sketched in this book are fit to become a reality The authors point to institutions and mechanisms that could integrate the concept into global law They place their trust less upon ever larger institutions and more on private entitlement and enforcement at the global regional and local levels

The Personal and the Professional in Aid Work Anne-Meike Fechter,2016-03-16 This book considers how the personal and the professional dimensions are related and how they matter for aid work The contributions to this edited volume are based on the assumption that all actors are relevant in development including national and international aid workers A key question which the book explores is why the personal so often remains unacknowledged in development studies even though its salience for aid workers is well documented One possible reason is an implicit narrative

of aid work as altruistic and self sacrificing which renders it inappropriate to devote much attention to the experiences of development professionals themselves In order to redress this this book critically considers the kind of difference they make and aims to understand how they respond to the challenges of their work The book explores their efficacy as human beings and employees with individual subjectivities social and cultural beliefs and practices and documents how these shape their involvement in development processes This book was published as a special issue of Third World Quarterly

Faith and the Pursuit of Health Jessica Hardin, 2018-10-26 Salvation and metabolism Ethnography between clinic and church Discerning ambiguous risks Freedom and health responsibility Embodied analytics Well being and deferred agency Support synergies Integrating faith into healthcare practice

Traders, Informal Trade and Markets between the Caucasus and China Susanne Fehlings, 2022-12-01 The book is about the economic practices of traders and businesspeople from the Caucasus and China who work in local bazaars in Tbilisi and Beijing It describes their activities their motivations their socio cultural backgrounds their work environments and their interactions with one another Contributing to a broader debate on the nature and role of informal economic practices in the post Soviet periphery and processes of globalization from below the book aims at providing a thick description of the embeddedness of bazaar traders economic behaviors and strategies in local and global political economic and cultural contexts markets and supply chains
