Genetically Modified Diplomacy Peter Andr  e, 2011-11-01 When genetically engineered seeds were first deployed in the Americas in the mid 1990s the biotechnology industry and its partners envisaged a world in which their crops would be widely accepted as the food of the future. Critics however raised a variety of social, environmental, economic and health concerns. This book traces the emergence of the 2000 Cartagena Protocol on Biosafety and the discourse of precaution toward GEOs that the protocol institutionalized internationally. Peter Andr  e explains this reversal in the common sense understanding of genetic engineering and discusses the new debates it has engendered.

[An Amazing Rebirth](#) Maria Chan Rhomberg, 2017-06-07 I would encourage anyone faced with cancer to read and take inspiration from this book. Shechen Rabjam Rinpoche's journey is a powerful testimony emphasising the crucial importance of an inner transformation. Matthieu Ricard's honest and inspiring account of how she worked with cancer reveals her own courage, dedication, tenacity and resolve to change her life from the inside out. Dzongsar Jamyang Khyentse Rinpoche's healing process was quite unique in that she not only relied upon traditional medication, she also found courage, inspiration and ultimately health through reliance upon the spiritual instruction she received. Dilgo Khyentse Yangsi Rinpoche. One of the most striking themes of this book is that whenever we are facing a serious illness or a major challenge in our lives, the state of our mind and our whole attitude are of crucial importance. This is why I am so inspired that Maria Rhomberg has chosen with great courage and generosity to write about her personal experience of overcoming cancer. Not only does she share her own moving story of transformation and healing but she also offers us all a wealth of practical insights and vital advice.
