Savings And Bequests:

Savings and Bequests Toshiaki Tachibanaki,1994 How do bequests explain differences in savings behavior between countries *Savings and Bequests* Michael D. Hurd,National Bureau of Economic Research,1989 Empirical studies have indicated that the elderly seem to accumulate wealth after retirement and that the desire to leave bequests is an important determinant of saving behavior both kinds of results have cast doubt on the validity of the life cycle hypothesis of consumption In the first part of this paper a model of bequests is specified and the implications for consumption and wealth trajectories are derived The main result is that even with a bequest motive consumption generally decreases with age after retirement and that wealth will also decrease for all but wealthy households In the empirical part of the paper wealth changes of retired households are reported over 10 years of panel data Contrary to many results from cross section data the elderly do dissave over 10 years the wealth of the elderly in the sample decreases by about 27 real A test for a bequest motive is proposed There is no evidence whatsoever for a bequest motive **Essays on Saving, Bequests, Altruism, and Life-cycle Planning** Laurence J. Kotlikoff,2001-06-22 This collection of essays coauthored with other distinguished economists offers new perspectives on saving intergenerational economic ties retirement planning and the distribution of wealth The book links life cycle microeconomic behavior to important macroeconomic outcomes including the roughly 50 percent postwar decline in America's rate of saving and its increasing wealth inequality The book traces these outcomes to the government's five decade long policy of transferring in the form of annuities ever larger sums from young savers to old spenders The book presents new theoretical and empirical analyses of altruism that rule out the possibility that private intergenerational transfers have offset those by the government While rational life cycle behavior can explain broad economic outcomes the book also shows that a significant minority of households fail to make coherent life cycle saving and insurance decisions These mistakes are compounded by reliance on conventional financial planning tools which the book compares with Economic Security Planner ESPlanner a new life cycle financial planning software program The application of ESPlanner to U S data indicates that most Americans approaching retirement age are saving at much lower rates than they should be given potential major cuts in Social Security benefits The Taxation of Capitalistic Bequests Verena Kley,2011-10-14 The taxation of bequests has long been and still is subject to intensive discussions in many industrialized countries Triggered by these discussions Verena Kley analyzes the taxation of bequests from economic perspectives focusing on wealth transfers of very rich individuals Given empirical findings bequests of these individuals generate almost the entire revenues from wealth transfer taxation Due to this their specific preferences prove to be decisive for the optimal taxation of bequests The author analyzes normative as well as positive implications for optimal wealth transfer taxation accounting for a capitalist spirit traditionally associated with the upper tail of the wealth distribution *Social Security* Peter J. Ferrara,1980 **The Measurement of Saving, Investment, and Wealth** Robert E. Lipsey,Helen Stone Tice,2008-04-15 There is

probably no concept other than saving for which U S official agencies issue annual estimates that differ by more than a third as they have done for net household saving or for which reputable scholars claim that the correct measure is close to ten times the officially published one Yet despite agreement among economists and policymakers on the importance of this measure huge inconsistencies persist Contributors to this volume investigate ways to improve aggregate and sectoral saving and investment estimates and analyze microdata from recent household wealth surveys They provide analyses of National Income and Product Account NIPA and Flow of Funds measures and of saving and survey based wealth estimates Conceptual and methodological questions are discussed regarding long term trends in the U S wealth inequality age wealth profiles pensions and wealth distribution and biases in inferences about life cycle changes in saving and wealth Some new assessments are offered for investment in human and nonhuman capital the government contribution to national wealth NIPA personal and corporate saving and banking imputation

Understanding Chinese Families C. Y. Cyrus Chu, Ruoh-Rong Yu, 2010 This book provides the reader with a comprehensive introduction to the distinguishing features of Chinese families This first full scale study seeks to understand Chinese families within the Chinese social context and draws comparisons with existing western theories and models of the family It also explores the connection between two Chinese societies across the Taiwan Strait and investigates if the unique features of Chinese families can be applied to broaden the scope of family analysis in general This book covers ten core areas including co residence marriage fertility education mobility gender preferences family supports filial feedbacks housework allocation and the dynamics of family norm changes The book uses theory based empirical studies with data collected from a unique panel survey conducted in various areas across the Taiwan Strait namely Taiwan and Southeast China The two focal points of the study are geographically close ethnically homogeneous and are open to the modern market economy A comprehensive analysis of these two areas provides new insights into the similarities and differences of Chinese families to what extent they are distinct from Western ones and how these similarities and differences were formed The uniquely complex nature of intra family interactions in Chinese families and the rapidly changing social background against which these interactions occur make this a hugely fascinating topic

Income Distribution in Macroeconomic Models Giuseppe Bertola, Reto Foellmi, Josef Zweimüller, 2014-09-28 This book looks at the distribution of income and wealth and the effects that this has on the macroeconomy and vice versa Is a more equal distribution of income beneficial or harmful for macroeconomic growth and how does the distribution of wealth evolve in a market economy Taking stock of results and methods developed in the context of the 1990s revival of growth theory the authors focus on capital accumulation and long run growth They show how rigorous optimization based technical tools can be applied beyond the representative agent framework of analysis to account for realistic market imperfections and for political economic interactions The treatment is thorough yet accessible to students and nonspecialist economists and it offers specialist readers a wide ranging and innovative treatment of an increasingly important research field The book

follows a single analytical thread through a series of different growth models allowing readers to appreciate their structure and crucial assumptions This is particularly useful at a time when the literature on income distribution and growth has developed quickly and in several different directions becoming difficult to overview *Public Finance in an Overlapping Generations Economy* T. Ihori, 1996-11-20 This book presents a theoretically based comprehensive analysis of macroeconomic consequences of fiscal policy using a popular economic model the overlapping generations growth model A wide range of essential public finance issues is analyzed including the effects of tax reform on dynamic efficiency positive and normative effects of public spending considerations of taxes on fixed assets and monetary holdings and sustainability of deficits A unique approach is applied in the study of public finance one expected to generate substantial interest among current graduate students and active researchers Impact of Estate and Gift Taxation on Capital Formation United States.
