Money, Mandates, and Local Control in American Public Education Bryan Shelly, 2011-07-08 Pointing to the disparities between wealthy and impoverished school districts in areas where revenue depends primarily upon local taxes reformers repeatedly call for the centralization of school funding Their proposals meet resistance from citizens elected officials and school administrators who fear the loss of local autonomy Bryan Shelly finds however that local autonomy has already been compromised by federal and state governments which exercise a tremendous amount of control over public education despite their small contribution to a school system s funding This disproportionate relationship between funding and control allows state and federal officials to pass education policy yet excuses them from supplying adequate funding for new programs The resulting unfunded and underfunded mandates and regulations Shelly insists are the true cause of the loss of community control over public education Shelly outlines the effects of the most infamous of underfunded federal mandates the No Child Left Behind Act of 2001 NCLB and explores why schools implemented it despite its unpopularity and out of pocket costs Shelly s findings hold significant implications for school finance reform NCLB and the future of intergovernmental relations

The Rise and Fall of American Public Schools Robert J. Franciosi, 2004-04-30 This volume provides a comprehensive and balanced survey of the state of American public education It examines the trend in the quality of the public schools over the past 100 years and reviews the possible reasons for a decline in quality The work focuses on the importance of local control in American public education and how it has been steadily eroded Franciosi advocates school choice as a way of restoring greater control by parents over their children s schools This work is distinct among calls of reform in that it takes a skeptical attitude towards the centralized school reform movement that has culminated in the No Child Left Behind Act It discusses important topics that have been the subject of

research including the effect of teachers unions Tiebout competition and local control and school finance reform Franciosi follows the many trajectories taken by America s public schools over the past century It shows that the United States has been a world education leader in both access for all children and resources spent Despite this there are still some worrisome trends While school spending has steadily increased student achievement has fluctuated and remains below that of students in other developed nations Initiatives to close the gap in achievement has fluctuated and remains below that of students in other developed nations Initiatives to close the gap in achievement and resources among students of various socioeconomic racial and ethnic backgrounds have been only partially successful Past efforts to reform public education have led to increasingly centralized control over public schools This piece will be important to those who are active on both sides of the school reform debate It will also be useful to students who are researching education policy the economics of education or public policy
