Through Its Texts provides the reader a history of the development of the professional field of educational administration  
From the Common School Era of the 1840s through the Era of Accountability in 2000 leaders of the profession wrote  
textbooks to both inform and instruct those desiring to follow in their footsteps Historical leaders such as Elwood Cubberley  
George Strayer George Counts and Jesse Sears are identified and the ways in which their work influenced the profession and  
the public schools is examined The various management themes running through the practice of educational administration  
over a 150 year period are also discussed Among these themes is the administrator as a philosopher and manager of virtue  
scientific manager executive transformational leader instructional leader in a time of high stakes accountability The schools  
of thought affecting the preparation of education administrators is also discussed in the framework of general educational  
administration textbooks The early textbooks written by the grandfathers were compendiums of best practice later eclipsed  
in the 1960s by a theory movement to make practice more scientific This new movement was based on research in the social  
and behavioral sciences The theory movement presently seems to be giving way to a return of textbooks being compendiums  
of best practice based on professional standards Lastly an exploration of the development and impact the specialization of  
the field has had on both textbooks and practice is included The splintering of the educational administration professorate  
into finance law policy personnel and other specialties has had a profound impact on textbooks and practice The development  
of standards dictating certification and licensing has also been influenced by specialization as opposed to general preparation
