*Cognitive Science Foundations of Instruction* Mitchell Rabinowitz, 2020-02-13 This volume presents and discusses current research that makes the connection between cognitive theory and instructional application Addressing two general issues the first set of chapters specifies the relation between cognitive theory and the development and evaluation of instruction while the second set deals with the questions involved in understanding and assessing cognitive skills The outstanding feature of these chapters is that they all present in depth discussions of the theoretical issues underlying instructional decisions Many present specific implementations that provide examples of concrete applications of theory In addition the settings for implementing these examples span a broad range of instructional areas and environments illustrating the generality and transferability of the application of theory to practice *Educational Psychology* Barry J. Zimmerman, Dale H.

Schunk, 2014-08-13 *Educational Psychology A Century of Contributions* the first comprehensive book length treatment of this topic looks at the historic contributions of 16 leading psychologists as well as others who influenced the field of educational psychology from its philosophical moorings in the late 19th century to its current scientific status at the dawn of the 21st It presents information regarding these individuals ideas and scientific discoveries along with a sense of the historical context in which they lived The book is divided into three sections that correspond to three eras in the history of the discipline the founding period 1880s to 1920 the rise to prominence period 1920 to 1960 and the modern period 1960 to the present Each section begins with an overview chapter describing the period in terms of key social political and historical events affecting educational theory research and practice In addition the overview chapters discuss major theoretical methodological and instructional contributions of the period and how they changed the course of educational psychology The biographical chapters describe the scholar s major contribution in terms of theory research and practice and his or her legacy and impact These descriptions portray these individuals as real human beings responding to historical events and social influences of their time in personal and collective ways that changed the nature and direction of the field *Educational Psychology A Century of Contributions* is a cohesive collection appropriate for graduate and advanced undergraduate students in educational psychology
