Scientific Nihilism Daniel Athearn,1994-03-08 Scientific nihilism is the widespread and ascendant view that the prospects for genuine understanding in scientific knowledge are distinctly negative This view is especially characteristic of philosophy of science and is reflected in a number of professional and popular doctrines In the background is the growing perception that physical science is presently encountering the inherent limits of scientific understanding This book shows that the breakoff of narrative causal explanation in physics although remarkable is no basis for the negative view of scientific knowledge It demonstrates that radiation and field phenomena which include a wide array of enigmatic facts are amenable to explanation even in their most puzzling details Athearn responds fully to the assumption that narrative causal explanation in physics has suffered a permanent demise Rejecting the dogma of a clean bifurcation of philosophy and natural science he proposes a constructive rehabilitation of natural philosophy     *Subject Guide to Books in Print* ,1991     **Isis Cumulative Bibliography 1986-1995: Subjects.
