## **Scientific Theology An Introduction:**

**The Science of God** Alister McGrath, 2005-11 How do science and theology interact What can be gained by exploring Christian theology using the insights of the natural sciences Can a synergy be found Is there a defensible natural theology within the scope and framework of a revealed God In the three volumes of *A Scientific Theology* T T Clark 2001 2003 Alister E McGrath produced a groundbreaking work proposing a mutual cross fertilization of ideas and approaches a scientific theology based on the present and past relationships between Christian theology and the natural sciences In *The Science of God* Professor McGrath provides a summary of and introduction to the major themes examined in the series He outlines all the main ideas on Christian theology both philosophically and historically discussing their relationships with the natural sciences This unique approach results not simply in a traditional introduction to systematic theology nor in an introduction to the science versus religion debate but in a highly readable guide to Christian theology as a systematic theology enriched by the natural sciences conceived and presented as a legitimate and coherent intellectual discipline with its own sense of identity place and purpose

**The Science of God** McGrath, 2004-06-21 This book is a clear concise guide to Alister McGrath's ground breaking three volume work *A scientific theology* McGrath himself here summarizes his major project and sketches out its implications for many aspects of Christian doctrine He then explores all of the major themes of his three volume work including the legitimacy of a scientific theology the purpose and place of natural theology the foundations of theological realism the failure of classic foundationalism the nature of revelation and the place of metaphysics in theology

McGrath, 2008-04-15 Provocative and immensely well informed *The Order of Things* represents a substantial and original contribution to the fields of systematic theology historical theology and the science and religion dialogue Leading theologian Alister E McGrath explores how the working methods and assumptions of the natural sciences can be used to inform and stimulate systematic theology Written by one of today's best known Christian writers Explores how the working methods and assumptions of the natural sciences can be used to inform and stimulate systematic theology Continues McGrath's acclaimed exploration of scientific theology begun with his groundbreaking three volume work *A Scientific Theology* Includes a landmark extended analysis of whether doctrinal development can be explained using Darwinian evolutionary models and exploration of how the transition from a scientific theology to a future scientific dogmatics might be made Supported by a published review of McGrath's scientific theology project which is currently the best brief introduction to his thought

**Scientific Theology: Theory** Alister E. McGrath,2006-11-23 Noting the important parallels between scientific theory and Christian doctrine McGrath offers a sustained defense of the necessity of doctrine within Christian theology against those who argue for a non dogmatic Christianity The approach developed within this volume builds on the work of writers such as Heidegger and Habermas and argues that theory is to be conceived in terms of the communal beholding of reality The many theoretical issues to be addressed in this volume include the manner in which closure is secured in theological theorizing the implications of the stratification of reality for its representation the place of

metaphysics in Christian theology and the nature of revelation itself Viewed as a whole Theory represents a fresh evaluation of the origins and place of theory in Christian theology which is certain to provoke discussion and debate This third volume completes the A Scientific Theology series A Scientific Theology is a groundbreaking work of systematic theology in three volumes Nature Reality and Theory Now available as a three volume set      **Scientific theology** Thomas Walter Barber,1884      **Science and Religion** Alister E. Christianity is an accessible engaging introduction to topics at the intersection of science and Christian theology A philosophically orientated treatment that introduces the relationship of science to Christianity and explores to what extent the findings of science affect traditional Christian theology Addresses important theological topics in light of contemporary science including divine action the problem of natural evil and eschatology Historically oriented chapters and chapters covering methodological principles for both science and theology provide the reader with a strong foundational understanding of the issues Includes feature boxes highlighting quotations biographies of major scientists and theologians key terms and other helpful information Issues are presented as fairly and objectively as possible with strengths and weaknesses of particular interpretations fully discussed *The Merging of Theology and Spirituality* Larry S. McDonald, 2006-07-29 While acknowledging the inherent tension between evangelicals who emphasize theological propositions and those who emphasize personal experience Alister McGrath believes that spirituality represents the interface between ideas and life between Christian theology and human existence The book explores the centrality of McGrath's theology in the development of his views on spirituality McGrath does not approach spirituality from a theological void but instead uses his theological perspective as the foundation Through detailed examination of McGrath's previous work and the writing of other evangelicals *The Merging of Theology and Spirituality* offers an overview of a unique thinker's contributions and a guide for future theological and spiritual exploration *Theologically Engaged Anthropology* J. Derrick Lemons, 2018-08-16 After years of discussion within the field of anthropology concerning how to properly engage with theology a growing number of anthropologists now want to engage with theology as a counterpart in ethnographic dialogue *Theologically Engaged Anthropology* focuses on the theological history of anthropology illuminating deeply held theological assumptions that humans make about the nature of reality and illustrating how these theological assumptions manifest themselves in society This volume brings together leading anthropologists and theologians to consider what theology can contribute to cultural anthropology and ethnography It provides anthropologists and theologians with a rationale and framework for using theology in anthropological research **Natural and Cosmic Theodicy** Jongseock James Shin, 2022-10-21 This book presents a third way to envision the Creatorship of the Triune God who is both compassionate and eschatologically redemptive in providential presence rather than biasedly gravitating toward the openness of a self-limiting God or God's all-determining sovereignty Not only is God in with and under creation God's kenotic presence invites creatures to participate in the self-giving love of God through both general and special divine action in a top-down through bottom-up mode Creatio continua is God's own journey of fulfilling the eschatological promise for creation This redemptive presence of God in creation is a Trinitarian co-protesting against the power of death sin and evil considering the cosmic dimensions of the eschatological hope promised in the resurrection of Jesus The new creation is the ultimate fulfillment of creaturely freedom and contingency divinely granted in creatio ex nihilo In arguing this Shin engages in a comparative and critical study of

natural and cosmic theodicy advanced by Catherine Keller Arthur Peacocke Wolfhart Pannenberg and Robert Russell     *An Introductory Essay to the Science of Comparative Theology; with a Tabular Synopsis of Scientific Religion ...* Edward Webster (of Ealing.),1870     **Creation, Evolution, and Theology** Fernando Canale,2013-06-11 Should Christian theology accommodate the six day account of biblical creation to deep time several billion years evolution The prestige of empirical science has convinced many theologians and entire denominations that evolution is the true account of the history of life on earth For them evolution is just as true and certain as the fact that apple trees produce apples This conviction has compelled theologians to reinterpret Scripture and rearrange their beliefs to fit the new fact of evolutionary history In *Creation Evolution and Theology An Introduction to the Scientific and Theological Methods* Fernando Canale presents the basic structure of scientific methodology and its application to the construction of evolutionary history He shows the popular belief in the absolutely certain results of scientific methodology to be a myth something already acknowledged by scientific philosophers and postmodern critics Canale then explains how because of past historical accommodations in their theologies Roman Catholic and protestant theologies are now able to coherently adapt their beliefs to include evolution However Canale argues when Christians choose to develop their theologies from Scripture alone Christian theology cannot accommodate its beliefs to deep time evolutionary history without losing its essence and inner coherence Canale hopes that in the heated debate between Biblical Creationism and Evolutionism contenders will finally recognize the critical and foundational role methodologies play in the formation of evolutionary theory and Christian creationism The focus on methodology will unmask the fact of evolution as mere theory and help Christians understand that the accommodation of evolution hinges solely on the theological method they choose to follow
