Quantum Integral Medicine Michael Wayne, 2005-03 Is there an innate healing system within the body capable of facilitating the healing process And if so what is the mechanism that triggers this potential Many scientists philosophers healers and spiritually minded people have asked these very same questions and Dr Michael Wayne has begun to address the answers Although billions of dollars fuel the modern healthcare system people are not getting healthier the contrary seems to be the case Modern medicine does not have a good track record with chronic ailments because these are more complicated diverse and unpredictable and do not fit in with modern medicine's more linear approach that requires patterns that follow set rules For this reason our current form of medicine has problems with many illnesses even those as commonplace as the common cold

Think! Michael R. LeGault, 2006-08-01 This isn't the time to Blink It's time to THINK before it's too late Outraged by the downward spiral of American intellect and culture Michael R LeGault offers the flip side of Malcolm Gladwell's bestselling phenomenon Blink which theorized that our best decision making is done on impulse without factual knowledge or critical analysis If bestselling books are advising us to not think LeGault argues it comes as no surprise that sharp incisive reasoning has become a lost art in the daily life of Americans Somewhere along the line the Age of Reason morphed into the Age of Emotion this systemic erosion is costing time money jobs and lives in the twenty first century leading to less fulfillment and growing dysfunction LeGault provides a bold controversial and objective analysis of the causes and solutions for the erosion of growth and market share at many established American companies big and small which appear to have less chance of achieving the dynamic expansion of the past permissive parenting and low standards that have caused an academic crisis among our children body weights rise while grades plummet America's growing political polarization which is a result of our reluctance to think outside our comfort zone faulty planning and failure to act on information at all levels that has led to preventable disasters such as the Hurricane Katrina meltdown a culture of image and instant gratification fed by reality shows and computer games that has rendered curiosity of the mind and spirit all but obsolete stress aversion to taking risks and therapy that are replacing the traditional American can do mind set Far from perpetuating the stereotype of the complacent American LeGault's no holds barred analysis asks more of us than any other societal overview America can fulfill its greatest potential starting today and we need smart teachers smart health care

workers smart sales representatives smart students smart mechanics and smart leaders to make it happen Now is the time to THINK because a mind truly is a terrible thing to waste

Spreading the Light Archie Crawford, 2004 This book is about life and is written in plain everyday language The author boldly faces up to those fundamental questions rankling at the back of one's mind such as Is there really a God Where is He What is the nature of the soul What is truth Is reincarnation true Is there any purpose in the universe Does God cause suffering Do angels exist Who am I Can effect become cause Does space and time really exist etc He probes deep into the structure of your mind and with great clarity shows you how your mind works and how you can use it to find success in everything you do He shows how we attract our present circumstances and how emotionally intense events are not only registered in our psychic memory but also in the memories of the cells of our body and what this means for us He devotes a chapter in which he advocates going within through meditation to find solutions to our problems Religion is examined with candor He explains the many positive benefits of religion examines its dark side and points out that like individuals some religions must resolve and get rid of the baggage

of past evil deeds before they and their followers can step into the light The author shows how in spite of itself science through its quantum theories is currently making discoveries which lead to a new view of the universe more in line with that of the essence of the religions and the experiences of the mystics of this world He shows how science and religion are at last beginning to merge For example there is now scientific proof of the value of prayer proof that the mind is non local that it is not located in the brain and also can cause actions over distance that there is no solid matter in the universe it is all energy in one form or another He further states that a field of energy outside the material universe has been discovered where speeds exceed that of light It has also been found that our human consciousness is directly connected with matter and influences at least its microscopic particles The nature of the universe as being holographic is explored These scientific findings have profound spiritual significance He quotes experts on the future of mankind including Arthur C Clark Nobel physicist Brian Josephson Stephen Hawking etc and many more Reading this book will prepare you for the new age that is fast enveloping the earth The author s message is that in spite of the terrorism and devastation of the earth currently going on there is powerful hope There are powerful spiritual forces at work which will overcome the present chaos and lead us into a life of enlightenment and eventually of love
