**Proceedings of the EU preparatory meeting of the Third world congress for freedom of scientific research - "From the body to the body politic" (2013)** Associazione Luca Coscioni per la libertà di ricerca scientifica, 2014-03-04 For nearly ten years now Luca Coscioni Association through and together with the World Congress has been fighting for freedom of scientific research The World Congress is not a place of mere convention and intellectual debate it is also the seat of political initiative where scientists researchers politicians sick and disabled people and citizens can work together to address complex issues such as patentability Open Access and clinical trials as well as the relationship between science and religion or between science and politics Marco Pannella leader of the Nonviolent Radical Party is to thank for providing the idea for this scheme It was put together in the weeks when we were beginning to organize a referendum in Italy to abolish the law banning scientific research on embryos This was not just an Italian issue but a global one At that moment in history we spoke of the

danger and threat of all types of fundamentalism whether religious or ideological which were opposed to science and to freedom of research The aim of the meeting that was held in November 14 15 2013 in Brussels is to identify the urgent need for freedom of research and freedom in the broader more general sense This is not to insist so much on the importance of science research human well being but also to respond or to find another possible answer to the problem of the crisis of democracy and the rule of law

Biopolymer-Based Nanomaterials in Drug Delivery and Biomedical Applications Hriday Bera, Chowdhury Mobaswar Hossain, Sudipta Saha, 2021-01-05 Over the past few decades there has been unprecedented progress in the design of versatile biopolymer based nanoplateforms for pharmaceutical and biomedical applications particularly due to their attractive traits including excellent biocompatibility outstanding biodegradability low immunogenicity and facile chemical modifiability Biopolymer Based Nanomaterials in Drug Delivery and Biomedical Applications serves as a clear and detailed body of information on the synthesis and characterization of biopolymer based materials in nanomedicine This book describes various nanomaterials consisting of biopolymers including polysaccharides i e derived from plants animals bacteria algae and fungi and polypeptides in terms of their structures synthetic protocols and characterization and uses as therapeutic drugs and gene delivery carriers and in other biomedical fields The chapters of this book which are contributed by internationally renowned scholars working in the arena of biopolymer based nanomaterials would offer a wide vision on the potential future applications of these nanomaterials in the delivery and targeting of bioactive molecules of pharmaceutical interests and in tissue engineering biosensing bioimaging and diagnostic purposes The state of the art information presented in the book would also encourage young investigators and researchers to further bring cutting edge developments in the field of nanomedicine in the near future Provides a scholarly insight into the recent development of biopolymer based nanomaterials Focuses on the diverse cutting edge techniques for the fabrication of native and modified biopolymer based nanoplateforms and their applications in drug delivery and biomedical fields Assesses the opportunities and challenges of biopolymer based nanocarriers in pharmaceutical and biomedical research **La Ricerca scientifica** ,1976

**Phosphorylation in Health and Disease** Allegra Via, Andreas Zanzoni, 2016-08-11 Protein phosphorylation is one of the most abundant reversible post translational modifications in eukaryotes It is involved in virtually all cellular processes by regulating protein function localization and stability and by mediating protein protein interactions Furthermore aberrant protein phosphorylation is implicated in the onset and progression of human diseases such as cancer and neurodegenerative disorders In the last years tens of thousands of in vivo phosphorylation events have been identified by large scale quantitative phospho proteomics experiment suggesting that a large fraction of the proteome might be regulated by phosphorylation This data explosion is increasingly enabling the development of computational approaches often combined with experimental validation aiming at prioritizing phosphosites and assessing their functional relevance Some computational approaches also

address the inference of specificity determinants of protein kinases phosphatases and the identification of phosphoresidue recognition domains In this context several challenging issues are still open regarding phosphorylation including a better understanding of the interplay between phosphorylation and allosteric regulation agents and mechanisms disrupting or promoting abnormal phosphorylation in diseases the identification and modulation of novel phosphorylation inhibitors and so forth Furthermore the determinants of kinase and phosphatase recognition and binding specificity are still unknown in several cases as well as the impact of disease mutations on phosphorylation mediated signaling The articles included in this Research Topic illustrate the very diverse aspects of phosphorylation ranging from structural changes induced by phosphorylation to the peculiarities of phosphosite evolution Some also provide a glimpse into the huge complexity of phosphorylation networks and pathways in health and disease and underscore that a deeper knowledge of such processes is essential to identify disease biomarkers on one hand and design more effective therapeutic strategies on the other

Butler,Brian H. Luckman,2010-07-15 Dendrogeomorphology Beginnings and Futures A Personal Reminiscence My early forays into dendrogeomorphology occurred long before I even knew what that word meant I was working as a young geoscientist in the 1960s and early 1970s on a problem with slope movements and deformed vegetation At the same time unknown to me Jouko Alestalo in Finland was doing something similar Both of us had seen that trees which produced annual growth rings were reacting to geomorphic processes resulting in changes in their internal and external growth patterns Dendroclimatology was an already well established field but the reactions of trees to other environmental processes were far less well understood in the 1960s It was Alestalo 1971 who first used the term dendrogeomorphology In the early 1970s I could see that active slope movement processes were affecting the growth of trees in diverse ways at certain localities I wanted to learn more about those processes and try to extract a long term chronology of movement from the highly diverse ring patterns      *Il fenomeno vita : tra proprio e improprio, potenza e impotenza, singolare e comune* Salvatore Prinzi,2022-12-30 Italiano La visione dominante nelle nostre società sembra intendere la vita come un capitale di cui ogni individuo sarebbe dotato collezione di crediti e skill che deve essere valorizzata per produrre performance caratterizzate da sempre maggiore rapidità ed efficienza Tutto sembra pensato per incrementare una vita di cui noi saremmo padroni i cui progressi o regressi possono essere valutati secondo criteri quantitativi per poter comparare le differenti vite e ottenere la migliore selezione possibile Cos si diffondono ovunque tecniche che si propongono di potenziare la vita di renderla maggiormente produttiva mentre imprese e istituzioni ne mettono a profitto ogni aspetto Una frenesia che si rovescia nel suo contrario in un paradossale sacrificio della vita nella perdita di un controllo democratico di una pianificazione che guarda al futuro Come ci dimostrano la pandemia e la Guerra in Ucraina che hanno rivelato i limiti delle pratiche di potenziamento la

fragilit della vita la connessione inestricabile fra le nostre vite la loro co appartenenza a una pi grande vita della specie Se questi eventi sono il frutto delle modalit in cui la vita stata istituita allora in questi tempi in cui tutta l umanit messa di fronte a sfide di carattere sanitario bellico ecologico il fenomeno vita va forse ripensato alla radice come incontro pi che come competizione come riconoscimento comunicazione English The dominant vision in our societies seems to conceive of life as a capital with which each individual would be endowed as a collection of credits and skills that must be enhanced to produce performances characterized by ever greater speed impact and efficiency Everything seems designed to increase a life of which we would be the masters whose progress or regression can be evaluated according to quantitative criteria in order to compare different lives and obtain the best possible selection Thus techniques are spreading everywhere that aim to enhance life to make it more productive while companies and institutions profit from every aspect of it A frenzy that turns into its opposite into a paradoxical sacrifice of life into the loss of democratic control of planning that looks to the future as the pandemic and the war in Ukraine show us revealing the limits of enhancement practices the fragility of life the inextricable connection between our lives their belonging to a larger life of the species If these events are the result of the ways in which life has been instituted then in these times when all of humanity is faced with health war and ecological challenges the phenomenon life should perhaps be rethought at its root as an encounter rather than a competition as recognition as a communication
