Scientist In American Life The Essays And Lectures Of Joseph Henry:

A Scientist in American Life Joseph Henry, Arthur P. Molella, 1980 PAPERS OF JOSEPH HENRY V8 Joseph Henry, 1972 This volume provides a fascinating view of an increasingly confident public figure who worked unstintingly to gain international acknowledgement of American scientific achievement but also popular support for research in a wide array **JOSEPH HENRY** MOYER ALBERT E,1997-11-17 By the time of his death in 1878 Joseph Henry was America's most eminent physical scientist His achievements in the study of electricity magnetism and telegraphy earned him a 30 year tenure as the first secretary of the Smithsonian This biography illuminates not only the character of 19th century scientific exploration but also the place of science in American culture 12 illustrations Emerson's Life in Science Laura Dassow Walls, 2018-05-31 Ralph Waldo Emerson has traditionally been cast as a dreamer and a mystic concerned with the ideals of transcendentalism rather than the realities of contemporary science and technology In Laura Dassow Walls s view Emerson was a leader of the secular avant garde in his day He helped to establish science as the popular norm of truth in America and to modernize American popular thought In addition he became a hero to a post Darwinian generation of Victorian Dissenters exemplifying the strong connection between transcendentalism and later nineteenth century science In his early years as a minister Emerson read widely in natural philosophy or physics chemistry geology botany and comparative anatomy When he left the church it was to seek the truths written in the book of nature rather than in books of scripture While visiting the Paris Museum of Natural History during his first European tour Emerson experienced a revelation so intense that he declared I will be a naturalist Once he was back in the United States his first step in realizing this ambition was to deliver a series of lectures on natural science These lectures formed the basis for his first publication Nature 1836 and his writings ever after reflected his intense and continuing interest in science Walls finds that Emerson matured just as the concept of the two cultures emerged when the disciplines of literature and science were divorcing each other even as he called repeatedly for their marriage Consequently Walls writes half of Emerson s thought has been invisible to us science was central to Emerson to his language to the basic organization of his career In Emerson's Life in Science she makes the case that no study of literary history can be complete without embracing science as part of literature Conversely she maintains no history of science is complete unless we consider the role played by writers of literature who helped to install science in the popular imagination **The Papers of Joseph Henry** Joseph Henry, 1972 Prologue, 2000 The Papers of Joseph Henry: January 1844-December 1946, The Princeton years Joseph Henry, 1992 The Papers of Joseph Henry: January 1844-December 1846: the Princeton years Joseph Henry, 1972 Perspectives History Higher Education V 25 2006 The Bloomsbury Encyclopedia of the American Enlightenment Mark G. Spencer, 2015-02-26 The Roger L Geiger, first reference work on one of the key subjects in American history filling an important gap in the literature with over 500 original essays The Papers of Joseph Henry: January 1866-May 1878, the Smithsonian years Joseph Henry, 1972

Perspectives on the History of Higher Education Roger L. Geiger, 2017-07-05 Volume Twenty Five of Perspectives on the History of Higher Education the silver anniversary edition offers three fresh contributions to the understanding of American higher education in the nineteenth century and three historical perspectives on topics of contemporary concern The divergent paths of antebellum colleges in the North and South have long been recognized Stephen Tomlinson and Kevin Windham discuss Alva Woods who moved from Calvinist New England to preside over the new University of Alabama Woods personified the commitment to evangelical Protestantism and rigid student discipline that prevailed in northern colleges of that era but in Tuscaloosa confronted the sons of planters raised to respect mainly independence power and the Southern code of honor Adam Nelson considers geology a crucially important science in early America that existed on the periphery of higher education but eventually exerted pressure for intellectual modernization He portrays the small community of scientific pioneers who sought the latest scientific knowledge from Europe surveyed the mineral wealth of American states and advocated for science in the college curriculum Beginning in the 1930s the National Research Council waged an organized campaign to encourage academic patenting and centralize it within one organization Jane Robbins explains the crosscurrents of interests that plagued and eventually scuttled that effort but that set the stage for the contemporary practice of university patenting Robert Hampel examines how for more than four decades students at Yale University took a major responsibility for learning into their own hands by publishing a Critique of courses He analyzes these documents to determine if their aims were to identify easy or challenging offerings and finds that this effort produced highly responsible articles A review essay by Doris Malkmus sheds new light on the experience of co eds in Research Guide to American Historical Biography Robert Muccigrosso, 1988 Description and evaluation of the most important secondary and primary sources for 452 American historical figures in all five volumes T p verso v 5 **Complete Catalog** Smithsonian Institution. Press,1988 Making of the Modern University Julie A. Reuben, 1996-09-15 Based on extensive research at eight universities Harvard Yale Columbia Johns Hopkins Chicago Stanford Michigan and California at Berkeley Reuben examines the aims of university reformers in the context of nineteenth century ideas about truth She argues that these educators tried to apply new scientific standards to moral education but that their modernization efforts ultimately failed Science and Religion in the Era of William James: Eclipse of certainty, 1820-1880 Paul Jerome Croce, 1995 In this cultural biography Paul Croce investigates the contexts surrounding the early intellectual development of American philosopher William James 1842 1910 Croce places the young James at the center of key scientific and religious debates in Americ Annotation ,1981-11-09 Smithsonian Stories Wilton S. museum complex As Wilton S Dillon shows the Smithsonian came to be the institution we know today under the twenty year leadership of Sun King S Dillon Ripley Ripley aspired to reinvent the Smithsonian as a great university with museums Although little understood by the public at large it began as a basic research center The Smithsonian remains a key

contributor to the world of higher learning and functions diplomatically as the ministry of culture for the United States Dillon provides backstage insights into Ripley's quest for the wholeness of knowledge He describes how he inspired its role as a theater of ideas as well as artifacts Under his tutelage the National Mall became a playground for world intelligentsia an intellectual free trade zone in the shadow of the nation's political capital Dillon reminds us that interdisciplinary international Smithsonian symposia foreshadowed twenty first century issues and trends His descriptions of the educational rewards of balancing tradition with the avant garde are inspiring As Dillon reminds us Ripley's twenty year reign may well have helped spark the waning embers of the Enlightenment The State and Social Investigation in Britain and the United States Michael J. Lacey, Mary O. Furner, 1993-06-25 The State and Social Investigation in Britain and the United States addresses the historical development of the knowledge base upon which the public policies of the democratic state depend This comparative study stretches from the Enlightenment origins of the impulse to base legislation on scientific knowledge to the twentieth century development of specialised institutions and professions engaged in social investigation and public policy making It probes investigators biases and omissions as well as their strengths as factors shaping social learning It illuminates the vital link between social empiricism and the late nineteenth century emergence of the New Liberalism in both Britain and the United States And it ponders the impact on social investigation and social policy today of relativism antistatism devolution and privatisation as these currents have developed in both societies since the 1970s Reader's Guide to the History of Science Arne Hessenbruch, 2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn
