Nature's Mysteries, and how Theosophy Illuminates Them Alfred Percy Sinnett, 1918 The Scientist in the Early Roman Empire Richard Carrier, 2017-12-01 In this extensive sequel to *Science Education in the Early Roman Empire* Dr Richard Carrier explores the social history of scientists in the Roman era Was science in decline or experiencing a revival under the Romans What was an ancient scientist thought to be and do Who were they and who funded their research And how did pagans differ from their Christian peers in their views toward science and scientists Some have claimed Christianity valued them more than their pagan forebears In fact the reverse is the case And this difference in values had a catastrophic effect on the future of humanity The Romans may have been just a century or two away from experiencing a scientific revolution But once in power Christianity kept that progress on hold for a thousand years while forgetting most of what the pagans had achieved and discovered from an empirical anatomy physiology and brain science to an experimental physics of water gravity and air Thoroughly referenced and painstakingly researched this volume is a must for anyone who wants to learn how far we once got and why we took so long to get to where we are today **The Nature of Things** Graham Buxton, Norman C. Habel, 2016-11-16 In 2015 a conference on Rediscovering the Spiritual in God's Creation was held at the Serafino winery complex in the McLaren Vale region of South Australia The aim of the conference was not to seek consensus but to survey the landscape with a view to intentional responsible action in caring for God's creation Delegates were challenged to recognize their own worldviews and to widen their horizons to encompass the enormity of the transcendence and immanence of God's presence in all creation A group of leading international scholars and experts in the fields of science ecology theology and ethics participated in a multidisciplinary conversation on the spiritual in creation with the aim of discovering fresh horizons with regard to creation care liturgy justice and discipleship within the Christian community The chapters in this volume reflect the diversity of perspectives summarized in The Serafino Declaration which was crafted towards the end of the conference This declaration which opens the volume outlines a range of views relating to the presence of the spiritual in creation views that are both traditional and radical This volume highlights the current concern over ecological destruction and finds sources of inspiration in the deepest roots of our traditions and forms of spirituality to sustain efforts towards custodianship of the land and care for God's creation Contributors David Rhoads Paul Santmire Denis Edwards Bob White Heather Eaton Ernst Conradie Vicky Balabanski Celia Deane Drummond Mark Worthing Emily Colgan Dianne Rayson Anne Gardner Mark Liederbach Patricia Fox Anne Elvey Mick Pope **Discoveries and Inventions in Literature for Youth** Joy L. Lowe, Kathryn I. Matthew, 2004-03-03 A compilation of books and other resources that are appropriate for students in kindergarten through twelfth grade **The Oxford Handbook of Wisdom and the Bible** Will Kynes, 2021-01-25 This collection of leading scholars presents reflections on both wisdom as a general concept throughout history and cultures as well as the contested nature of the category of Wisdom Literature The first half of the collection explores wisdom more generally with essays on its relationship to skill epistemology virtue theology and order Wisdom is

examined in a number of different contexts such as historically in the Hebrew Bible and its related cultures in Egypt and Mesopotamia as well as in Patristic and Rabbinic interpretation. Additionally, wisdom is examined in its continuing relevance in Islamic, Jewish, and Christian thought as well as from feminist, environmental, and other contextual perspectives. The second half of the volume considers Wisdom Literature as a category. Scholars address its relation to the Solomonic Collection, its social setting, literary genres, chronological development, and theology. Wisdom Literature's relation to other biblical literature, law, history, prophecy, apocalyptic, and the broad question of Wisdom influence is then discussed before separate chapters on the texts commonly associated with the category. Contributors take a variety of approaches to the current debates surrounding the viability and value of Wisdom Literature as a category and its proper relationship to the concept of wisdom in the Hebrew Bible. Though the organization of the volume highlights the independence of wisdom as a concept from Wisdom Literature as a category seeking to counter the lack of attention given to this question in the traditional approach, the inclusion of both topics together in the same volume reflects their continued interconnection. As such, this handbook both represents the current state of Wisdom scholarship and sets the stage for future developments.
