## **Scores Reviews 1993 2003:**

*Scores* John Clute, 2016-11-24 For more than 50 years John Clute has been reviewing science fiction and fantasy. As *Scores* demonstrates, his devotion to the task of understanding the central literatures of our era has not slackened. There are jokes in *Scores* and curses and tirades and apologies and riffs, but every word of every review in the end is about how we understand the stories we tell about the world. Following on from his two previous books of collected reviews, *Strokes* and *Look at the Evidence*, this book collects reviews from a wide variety of sources but mostly from *Interzone*, the *New York Review of Science Fiction* and *Science Fiction Weekly*. Where it has seemed possible to do so without distorting contemporary responses to books, these reviews have been revised, sometimes extensively. 125 review articles over 200 books reviewed in more than 214 000 words.

*Stay* John Clute, 2016-11-24 *Stay* gathers together 100 000 words of reviews plus short fiction by John Clute and was originally published to coincide with Loncon3, the 2014 World Science Fiction Convention, at which he was one of the Guests of Honour. Also included is a complete reprint of the text of *The Darkening Garden*.

Robert Holdstock's Mythago Wood Paul Kincaid, 2022-08-20 This book is a detailed examination of one of the most important works of fantasy literature from the twentieth century. It goes through *Mythago Wood* by Robert Holdstock, considering how it engages with war on a personal and family level, how it plays with ideas of time as something fluid and disturbing, and how it presents mythology as something crude and dangerous. The book places *Mythago Wood* in the context of Holdstock's other works, noting in part how complex ideas of time have been a consistent element in his fiction. The book also briefly examines how the themes laid out in *Mythago Wood* are carried through into later books in the sequence, as well as the *Merlin Codex*.

Rhetorics of Fantasy Farah Mendlesohn, 2014-01-01 This sweeping study of fantasy literature offers new and often surprising readings of works both familiar and obscure. A fine critical work. *Journal of the Fantastic in the Arts*. Transcending arguments over the definition of fantasy literature, *Rhetorics of Fantasy* introduces a provocative new system of classification for the genre. Drawing on nearly two hundred examples of modern fantasy, author Farah Mendlesohn identifies four categories: portal, quest, immersive intrusion, and liminal, that arise out of the relationship of the protagonist to the fantasy world. Using these sets, Mendlesohn argues that the author's stylistic decisions are then shaped by the inescapably political demands of the category in which they choose to write. Each chapter covers at least twenty books in detail, ranging from nineteenth-century fantasy and horror to some of the best works in the contemporary field. Mendlesohn discusses works by more than one hundred authors, including Lloyd Alexander, Peter Beagle, Marion Zimmer Bradley, John Crowley, Stephen R. Donaldson, Stephen King, C. S. Lewis, Gregory Maguire, Robin McKinley, China Miéville, Suniti Namjoshi, Philip Pullman, J. K. Rowling, Sheri S. Tepper, J. R. R. Tolkien, Tad Williams, and many others.

**Foundations of Airline Finance** Bijan Vasigh, Ken Fleming, Liam Mackay, 2010 *Foundations of Airline Finance: Methodology and Practice* is a textbook that comprehensively covers at a basic level all aspects of the subject, bringing together many of the numerous and informative articles and

institutional developments that have characterized the field of airline finance in the previous two decades The book is of greatest value to students who are contemplating entering financial management in the air transportation industry however the text also serves as an accessible and comprehensive reference for industry professionals *Pardon This Intrusion* John Clute,2016-11-24 *Pardon This Intrusion* gathers together 47 pieces by John Clute some written as long ago as 1985 though most are recent The addresses and essays in Part One *Fantastika in the World Storm* all written in the twenty first century reflect upon the dynamic relationship between *fantastika* an umbrella term Clute uses to describe science fiction horror and fantasy and the world we live in now Of these pieces Next a contemporary response to 9 11 has not been revised everything else in Part One has been reworked sometimes extensively Parts Two Three and Four include essays and author studies and introductions to particular works as they are mostly recent Clute has felt free to rework them where necessary The few early pieces including *Lunch with AJ* and the *WOMBATS* a response to the Scientology scandal at the Brighton WorldCon in 1987 are unchanged *As If* Michael Saler,2012-01-09 Many people throughout the world inhabit imaginary worlds communally and persistently parsing Harry Potter and exploring online universes These activities might seem irresponsibly escapist but history tells another story Beginning in the late nineteenth century when Sherlock Holmes became the world's first virtual reality character readers began to colonize imaginary worlds debating serious issues and viewing reality in provisional as if terms rather than through essentialist just so perspectives From Lovecraft's Cthulhu Mythos and Tolkien's Middle earth to the World of Warcraft and Second Life *As If* provides a cultural history that reveals how we can remain enchanted but not deluded in an age where fantasy and reality increasingly intertwine *Secondary Analysis of Electronic Health Records* MIT Critical Data,2016-09-09 This book trains the next generation of scientists representing different disciplines to leverage the data generated during routine patient care It formulates a more complete lexicon of evidence based recommendations and support shared ethical decision making by doctors with their patients Diagnostic and therapeutic technologies continue to evolve rapidly and both individual practitioners and clinical teams face increasingly complex ethical decisions Unfortunately the current state of medical knowledge does not provide the guidance to make the majority of clinical decisions on the basis of evidence The present research infrastructure is inefficient and frequently produces unreliable results that cannot be replicated Even randomized controlled trials RCTs the traditional gold standards of the research reliability hierarchy are not without limitations They can be costly labor intensive and slow and can return results that are seldom generalizable to every patient population Furthermore many pertinent but unresolved clinical and medical systems issues do not seem to have attracted the interest of the research enterprise which has come to focus instead on cellular and molecular investigations and single agent e.g a drug or device effects For clinicians the end result is a bit of a data desert when it comes to making decisions The new research infrastructure proposed in this book will help the medical profession to make ethically sound and well informed decisions for their patients **The Year's Best Science Fiction: Twenty-First Annual Collection** Gardner

Dozois,2004-07 The stories in this collection imaginatively take readers far across the universe into the very core of their beings to the realm of the Gods and to the moment just after now Included are the works of masters of the form and the bright new talents of tomorrow This book is a valuable resource in addition to serving as the single best place in the universe to find stories that stir the imagination and the heart
