Rhetoric, History, and Women's Oratorical Education David Gold,Catherine L. Hobbs,2013-05-02 Historians of rhetoric have long worked to recover women s education in reading and writing but have only recently begun to explore women s speaking practices from the parlor to the platform to the varied types of institutions where women learned elocutionary and oratorical skills in preparation for professional and public life This book fills an important gap in the history of rhetoric and suggests new paths for the way histories may be told in the future tracing the shifting arc of women s oratorical training as it develops from forms of eighteenth century rhetoric into institutional and extrainstitutional settings at the end of the nineteenth century and diverges into several distinct streams of

community embodied theory and practice in the twentieth century. Treating key rhetors, genres, settings, and movements from the early republic to the present, these essays collectively challenge and complicate many previous claims made about the stability and development of gendered public and private spheres, the decline of oratorical culture, and the limits of women's oratorical forms such as elocution and parlor rhetorics, and women's responses to rhetorical constraints on their public speaking. Enriching our understanding of women's oratorical education and practice, this cutting-edge work makes an important contribution to scholarship in rhetoric and communication.

Fracking and the Rhetoric of Place Justin Mando, 2021-10-19 Fracking and the Rhetoric of Place investigates the rhetorical strategies of speakers at public hearings on hydraulic fracturing (fracking) in order to understand how places shape and are shaped by citizens as they engage in their democracy. As an important argumentative resource in environmental controversy, the rhetoric of place helps citizens situate themselves within local contexts and raise their voices in times of social conflict. Justin Mando uses rhetorical analysis, discourse analysis, and corpus analysis to offer scholars of place-based rhetoric and environmental communication a heuristic approach to studying their own sites. This approach reveals that place-based arguments are a ubiquitous rhetorical resource in the dispute over hydraulic fracturing that shapes how the issue is perceived. Pro-frackers and anti-frackers use rhetoric of place in striking ways that reveal their values, motivations, strengths, and weaknesses. Place functions as an interface of potential common ground that connects the local to the global, what is here to what is there. Scholars and students of rhetoric, communication, and environmental studies will find this book particularly interesting.

Scottish Philosophy of Rhetoric Rosaleen Keefe, 2014-03-25 The popular and successful rhetorical textbooks produced by the 18th-century Scottish philosophical tradition, such as George Campbell's *The Philosophy of Rhetoric* (1776), Hugh Blair's *Lectures on Rhetoric and Belles Lettres* (1783), and Alexander Bain's *English Composition and Rhetoric* (1877), have been widely accorded a role in the trajectories of 19th- and 20th-century literary theory. Scholars have generally overlooked them, however, as philosophical works. The selected writings chosen for this volume show how these rhetorical textbooks were a practical extension of the philosophy of language developed by 18th-century Scottish philosophers Francis Hutcheson, Adam Smith, Thomas Reid, Adam Ferguson, Alexander Gerard, and Henry Home, Lord Kames, advanced a radically new paradigm of language as an inherently mediated practice directed simultaneously to personal and social, moral and aesthetic uses. This Scottish philosophy of rhetoric powerfully influenced the teaching of language and literacy as tools for social and educational innovation. This volume, the first of its kind, offers a wide variety of writings on rhetoric and rhetorical theory selected in a way that reveals their intimate connection with the Scottish philosophical tradition.

Contemporary Composition Studies Edith Babin, Kimberly Harrison, 1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field's development Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms

central to the discipline The first part of the book provides entries for leaders in composition studies Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person's contributions and a bibliography of representative works The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline The entries for the terms show how the disciplinary context has shaped the ways in which they have been used The entries also indicate how established thinkers in composition studies and other disciplines have explained or defined the terms provide examples of the terms in context and list scholars often associated with them An appendix includes entries for scholars from other disciplines who have contributed to the field

Lectures on Rhetoric and Belles Lettres, 2005 This new edition of Hugh Blair's *Lectures on Rhetoric and Belles Lettres* edited by Linda Ferreira Buckley and S Michael Halloran answers the need for a complete reliable text The book seeks to generate a renewed interest in Blair by provoking new inquiries into the tradition of belletristic rhetoric and by serving as both aid and incentive to others who may join in the project of improving understanding of this landmark rhetorical scholarship This edition contains forty seven lectures and remains faithful to the text of the 1785 London edition The editors contextualize Hugh Blair's motivations and thinking by providing in their introduction an extended account of Blair's life and era The bibliography of works by and about Blair is an invaluable aid surpassing previous research on Blair Although the extent of its influence cannot be measured fully Blair's *Lectures on Rhetoric and Belles Lettres* was undoubtedly a primary vehicle for introducing many eighteenth and nineteenth century scholars to classical rhetoric and French belletristic rhetoric its success due in part to the ease with which the lectures combine neoclassical and Enlightenment thought accommodating emerging social concerns Ferreira Buckley and Halloran's extensive treatment revives the tradition of belletristic rhetoric improving the understanding of Blair's place in the study of eighteenth and nineteenth century discourse while finding him relevant in the twenty first century
