Gameworlds Seth Giddings, 2016-05-19 Game studies is a rapidly developing field across the world with a growing number of dedicated courses addressing video games and digital play as significant phenomena in contemporary everyday

life and media cultures Seth Giddings looks to fill a gap by focusing on the relationship between the actual and virtual worlds of play in everyday life He addresses both the continuities and differences between digital play and longer established modes of play The gameworlds title indicates both the virtual world designed into the videogame and the wider environments in which play is manifested social relationships between players hardware and software between the virtual worlds of the game and the media universes they extend e g Pok mon Harry Potter Lego Star Wars and the gameworlds generated by children s imaginations and creativity through talk and role play drawings and outdoor play The gameworld raises questions about who and what is in play Drawing on recent theoretical work in science and technology studies games studies and new media studies a key theme is the material and embodied character of these gameworlds and their components players bodies computer hardware toys virtual physics and the physical environment Building on detailed small scale ethnographic case studies Gameworlds is the first book to explore the nature of play in the virtual worlds of video games and how this play relates to and crosses over into everyday play in the actual world

Divining a Digital Future Paul Dourish, Genevieve Bell, 2014-01-10 A sociotechnical investigation of ubiquitous computing as a research enterprise and as a lived reality Ubiquitous computing or ubicomp is the label for a third wave of computing technologies Following the eras of the mainframe computer and the desktop PC ubicomp is characterized by small and powerful computing devices that are worn carried or embedded in the world around us The ubicomp research agenda originated at Xerox PARC in the late 1980s these days some form of that vision is a reality for the millions of users of Internet enabled phones GPS devices wireless networks and smart domestic appliances In Divining a Digital Future computer scientist Paul Dourish and cultural anthropologist Genevieve Bell explore the vision that has driven the ubiquitous computing research program and the contemporary practices that have emerged both the motivating mythology and the everyday messiness of lived experience Reflecting the interdisciplinary nature of the authors collaboration the book takes seriously the need to understand ubicomp not only technically but also culturally socially politically and economically Dourish and Bell map the terrain of contemporary ubiquitous computing in the research community and in daily life explore dominant narratives in ubicomp around such topics as infrastructure mobility privacy and domesticity and suggest directions for future investigation particularly with respect to methodology and conceptual foundations

Improving Classroom Learning with ICT Rosamund Sutherland, Susan Robertson, Peter John, 2008-11-21 Takes a holistic approach to using ICTs to enhance teaching and learning in the classroom It weaves together evidence of teachers and learners experiences of ICT outside school how policy and management issues impact on learning and what actually happens when ICT is fully integrated into teaching and learning

Confronting the Challenges of Participatory Culture Henry Jenkins, 2009-06-05 Many teens today who use the Internet are actively involved in participatory cultures joining online communities Facebook message boards game clans producing creative work in new forms digital sampling modding fan videomaking fan fiction working in teams to complete tasks and develop new knowledge

as in Wikipedia and shaping the flow of media as in blogging or podcasting A growing body of scholarship suggests potential benefits of these activities including opportunities for peer to peer learning development of skills useful in the modern workplace and a more empowered conception of citizenship Some argue that young people pick up these key skills and competencies on their own by interacting with popular culture but the problems of unequal access lack of media transparency and the breakdown of traditional forms of socialization and professional training suggest a role for policy and pedagogical intervention This report aims to shift the conversation about the digital divide from questions about access to technology to questions about access to opportunities for involvement in participatory culture and how to provide all young people with the chance to develop the cultural competencies and social skills needed Fostering these skills the authors argue requires a systemic approach to media education schools afterschool programs and parents all have distinctive roles to play

The John D and Catherine T MacArthur Foundation Reports on Digital Media and Learning *Authentic Learning for the Digital Generation* Angela McFarlane, 2014-08-13 Why should we use technology to support learning Where does the responsibility lie to prepare young people to be active and successful cybercitizens Can we go on confiscating pupils smartphones indefinitely Authentic Learning for the Digital Generation is a vital examination of young people s use of personal devices online creative communities and digital gaming It calls into question the idea of the digital native and shows clearly that the majority of young users need help and support in order to benefit from the rich learning potential of personal mobile and online technology use Written by a leading authority on the role of digital technologies in education it looks in detail at the practice and implications of learning using personal devices collaborative online spaces learning platforms user generated content and digital games In particular approaches to solving problems building knowledge manipulating data and creating texts are examined It offers clear strategies a vision for what effects on learning we might reasonably expect when children are given access to different types of technology and explores the challenges of managing these practices in the classroom Authentic Learning for the Digital Generation offers careful analysis at a time when there is much discussion about young people emerging from school unprepared for the world of work and often struggling to manage their personal relationships as they are exposed to strong content and harsh criticism online It considers what we know of childhood experience in a digital world and offers ways in which schools and teachers can embrace the opportunity presented by ubiquitous ownership of connected digital devices to enrich and deepen learning *Handbook of Research on New Media Literacy at the K-12 Level: Issues and Challenges* Tan Wee Hin, Leo, Subramaniam, R., 2009-05-31 Provides comprehensive articles on significant issues methods and theories currently combining the studies of technology and literacy Education and social justice in a digital age Rosamund Sutherland, 2014 In many countries the focus of school curriculum shifts back and forth between traditional subjects such as mathematics and history and the development of skills such as problem solving Rosamund Sutherland argues here that skills focused curriculum often seen as preparing students to work in our

digital age can actually exacerbate existing social inequalities Arguing from a social justice perspective she contends that schools should prioritize instruction in traditional subjects which can provide disadvantaged students with formal knowledge they are not likely to learn outside school Sutherland's theoretical and practical insights point toward changes in policy and practice that could help improve students' lives
