Long Turn Toward Light:

CAVENOMICS:Turning Towards Light Binu Peniel,2018-07-04 The allegory of the cave by Plato is the genre of this book Plato claims that knowledge gained through the senses is no more than opinion and in order to have real knowledge we must gain it through philosophical reasoning A journey through this book is intended to create a lasting influence in the lives of people through creating values I believe that enlightenment is possible only through awareness and through a mind shift This work brings value to your life which is Christ centered innovative motivational and empowering and it is a journey towards light There are many people who journey with me in this process of healing recovery and restoration from a labor trafficking situation I truly believe no one can be a slave until and unless one gives up ones willpower and ones own desire to be set free Cavenomics is an attempt to enlighten your mind your spirit your soul and your being Liberation freedom recovery and restoration is possible Cavenomics is the mantra for success

Inflected Language: Toward a Hermeneutics of Nearness Krzysztof Ziarek,1994-10-11 In the aftermath of poststructuralist debates Inflected Language proposes to rethink the ontological and ethical dimensions of language by rereading Heidegger s work more specifically his reflection on poetry and by engaging Levinas ethics and contemporary poetics Building on the readings of Heidegger Levinas Stevens and Celan the author contends that against common misinterpretations their approach to language forces us to reexamine the very basis of relations to alterity whether that of the world things or people According to the new view of language offered in these works thought s job is not first and foremost cognition in the sense of understanding calculations and definition but in securing alterity against cognitive assimilation instead In this context Inflected Language reshapes the current philosophico literary debate about language by showing how the apparently neutral differential play of signification is already invested with ethical and worldly signification In order to avoid obliterating this elusive signification in theorizing language Ziarek proposes following a new mode of reading a post Heideggerian hermeneutics of nearness which foregrounds

the poetic element in language and its ways of figuring the other
