Longman's Magazine Charles James Longman,1905 **Longman's Magazine** ,1901 **Where Does Laughter Begin?** ,2000 Designed to fit the National Curriculum this is part of the Longman Book Project The project aims to enable teachers throughout the primary school to teach language fiction and non fiction *A Clash of Paradigms: Response and Development in the South Pacific* Suan Maiava,2024-11-01 This title was first published in 2001 This study indicates that researchers have far to go in understanding and assessing how development projects work The author shows that often the perception of failure is not shared by those whom were intended to benefit She uses a case study of Samoan villagers introduced to cattle farming to examine the wider development process and challenge the conventional theories By drawing on people centred perspectives that give much greater weight to the role of culture in development the volume does not simply criticize development project management but suggests practical and positive ways forward encouraging spontaneous indigenous development which should be supported by projects where appropriate *The Experiment Must Continue* Melissa Graboyes,2015-11-09 The Experiment Must Continue is a beautifully articulated ethnographic history of medical experimentation in East Africa from 1940 through 2014 In it Melissa Graboyes combines her training in public health and in history to treat her subject with the dual sensitivities of a medical ethicist and a fine historian She breathes life into the fascinating histories of research on human subjects elucidating the hopes of the interventionists and the experiences of the putative beneficiaries Historical case studies highlight failed attempts to eliminate tropical diseases while modern examples delve into ongoing malaria and HIV AIDS research Collectively these show how East Africans have perceived research differently than researchers do and that the active participation of subjects led to the creation of a hybrid ethical form By writing an ethnography of the past and a history of the present Graboyes casts medical experimentation in a new light and makes the resounding case that we must readjust our dominant ideas of consent participation and exploitation With global implications this lively book is as relevant for scholars as it is for anyone invested in the place of medicine in society

Pablo

Iannone, 2022-09-08 *Imagination in Inquiry: A Philosophical Model and Its Applications* investigates the nature, kinds, component elements, functions, scope, and uses of the imagination involved in inquiry. It further discusses how these kinds and functions vary and interact depending on the context of inquiries carried out in philosophy and its branches, from the philosophy of science and the philosophy of technology to ethics, sociopolitical philosophy, and aesthetics, and institutions like science, technology, art, and education. Using a homeostatic model, Pablo Iannone advances a conception of the imagination as a disposition to search for answers to various types of problems, abstract or concrete, theoretical or practical, faced in inquiry. The book treats this as a working characterization, though it develops progressively clearer, more precise, and less ambiguous meanings. All along, the primary concern of the author, as well as of contributors Alejandra Iannone and Rocci Luppigini, is with the moral, aesthetic, logical, communicative, scientific, technological, artistic, literary, and philosophical uses and roles of the imagination. The book's primary focus is not just on such things as the capacity to generate mental images, but especially on the ability to discover and create, anticipate and envision, entertain and manage.
