Primary English Curriculum Guide Christine Moorcroft, Ray Barker, 2013-11-26. First Published in 2001. The purpose of this curriculum guide is to help student teachers and newly qualified teachers to make a start on learning how to become competent teachers of English. Despite the emphasis given in training courses to the teaching of English, newly qualified teachers often feel underprepared for it and frequently mention their concerns about this. These concerns can be partly explained by a general lack of confidence in this key area and partly by widespread media and political criticism of the teaching of literacy. It is also because it is often difficult for a student to make the connection between observation of key teaching strategies and his or her own personal practice.

Geography Education Research in the UK: Retrospect and Prospect Graham Butt, 2019-08-22. This book provides a unique assessment of the development of research in geography education and its future prospects, offering a challenging critique of subject based education research with particular reference to geography education across a range of different jurisdictions. It covers a range of topics including the changing role of research in geography education, the relationship between education research and professional practice with special reference to geography education research, the place of academic subject knowledge in geography education research, critiques of the functions of research in geography education and the key issues for education policy and policymakers concerning educational research at national and international levels. Addressing the needs of academics, research students, policymakers and education practitioners who undertake or shape the future of research in geography education, it comprehensively explores the forces that have driven the development of geography education research and pedagogy. Further, by positioning its analysis in the context of education policy debates in the UK and further afield, it assesses the role and function of research in education and offers an outlook on its future. This book is essential reading for all those who wish to understand the sporadic and

increasingly uncertain development of subject based research in education
