Mellor,2000-05-22 A survey of British women's writings of the late eighteenth and early nineteenth centuries and the revolutionary New Woman they promoted British women writers were enormously influential in the creation of public opinion and political ideology during the years from 1780 to 1830 Anne Mellor demonstrates the many ways in which they attempted to shape British public policy and cultural behavior in the areas of religious and governmental reform education philanthropy and patterns of consumption She argues that the theoretical paradigm of the doctrine of the separate spheres may no longer be valid According to this view British society was divided into distinctly differentiated and gendered spheres of public versus private activities in the eighteenth and nineteenth centuries Surveying all the genres of literature drama poetry fiction non fiction prose and literary criticism Mellor shows how women writers promoted a new concept of the ideal woman as rationally educated sexually self disciplined and above all virtuous This New Woman these writers said was better suited to govern the nation than were its current fiscally

irresponsible lecherous and corruptible male rulers Beginning with Hannah More Mellor argues that women writers too often dismissed as conservative or retrogressive instead promoted a revolution in cultural mores or manners She discusses writers as diverse as Elizabeth Inchbald Hannah Cowley and Joanna Baillie as Charlotte Smith Anna Barbauld and Lucy Aikin as Mary Wollstonecraft Charlotte Reeve and Anna Seward and concludes with extended analyses of Charlotte Smith's *Desmond* and Jane Austen's *Persuasion* She thus documents women writers full participation in that very discursive public sphere which Habermas so famously restricted to men of property Moreover the new career of philanthropy defined by Hannah More provided a practical means by which women of all classes could actively construct a new British civil society and thus become the mothers not only of individual households but of the nation as a whole Intellectual and social historians and not just feminists have long believed that the late 18th and early 19th centuries in Britain saw an increasing separation of the male public and female domestic realms with the result that the public sphere theorized by Jurgen Habermas and others to have emerged in the Enlightenment almost entirely excluded women With energy wit and admirable command of her sources Mellor author of distinguished books on Romanticism demonstrates that just the opposite was true in the years around 1800 women became the primary producers and consumers of writing in Britain and vitally participated in the discursive public sphere many arguing in their different ways for what Hannah More the most popular author of the period called a moral revolution in the national manners and principles A splendid survey of women novelists poets critics playwrights and social theorists this bracing and important work of revision deserves a place in serious academic libraries serving both undergraduates and advanced scholars D L Patey Choice French Romance of the Later Middle Ages Rosalind Brown-Grant, 2008-11-13 This book will be of interest not only to students and scholars of medieval French literature but also to students and specialists of other medieval European languages as well as to medieval historians and those working in gender studies BOOK JACKET *Individuals in Relationships* Steve Duck, 1993 This volume features the latest scholarship on cognitive processes in interpersonal relationships It explores such questions as What special knowledge must a person have to participate in a relationship What particular language structures do people typically use in entering or conducting relationships Contributors examine the cognitive processes that individuals bring to relationships ranging from their thought patterns and attributional styles to the ways in which they recall relationship events and use shared knowledge **Prayer** Hans Urs Von Balthasar, 2012-06-12 This is perhaps the best and most comprehensive book on prayer ever written From the persons of the Trinity through the Incarnation to the Church and the very structure of the human person this book is a powerful synthesis of what prayer is and how to pray The testament of a great theologian on something which is most personal and interior contemplative prayer In this modern classic von Balthasar illumines the nature and practice of contemplative prayer in explicit and vital connection with the mysteries of Christian revelation His extraordinary flair for drawing spiritual implications from the most profound theological insights is brilliantly displayed on so many of its pages This
