The Right To Be Loved S. Matthew Liao, 2015-10-01 S Matthew Liao argues here that children have a right to be loved To do so he investigates questions such as whether children are rightholders what grounds a child's right to beloved whether love is an appropriate object of a right and other philosophical and practical issues His proposal is that all human beings have rights to the fundamental conditions for pursuing a good life therefore as human beings children have human rights to the fundamental conditions for pursuing a good life Since being loved is one of those fundamental conditions children thus have a right to be loved Liao shows that this claim need not be merely empty rhetoric and that the arguments for this right can hang together as a coherent whole This is the first book to make a sustained philosophical case for the right of children to be loved It makes a unique contribution to the fast growing literature on family ethics in particular on children's rights and parental rights and responsibilities and to the emerging field of the philosophy of human rights

The Science and Theology of Godly Love Matthew T. Lee, Amos Yong, 2012-06-15 Arguing that there are ways to move beyond the limitations of methodological atheism without compromising scientific objectivity the essays gathered in *The Science and Theology of Godly Love* explore the potential for collaboration between social science and theology They do so within the context of the interdisciplinary study of Godly Love which examines the perceived experience of loving God being loved by God and thereby being motivated to engage in selfless service to others This volume serves as an introduction to and a call for further research in this new field of study offering ten methodological perspectives on the study of Godly Love written by leading social scientists and theologians Drawing on the work of Douglas Porpora and others the contributors contend that agnosticism is the appropriate methodological stance when religious experience is under the microscope Godly Love does not force a theistic explanation on data instead these essays show that it sensitizes researchers so that they can take seriously

the faith and beliefs of those they study without the assumption that these theologies represent an incontestable truth

Oxford Studies in Experimental Philosophy Volume 3 Tania Lombrozo, Joshua Knobe, Shaun Nichols, 2020-04-10 The new field of experimental philosophy has emerged as the methods of psychological science have been brought to bear on traditional philosophical issues Oxford Studies in Experimental Philosophy is the place to go to see outstanding new work in the field It features papers by philosophers papers by psychologists and papers co authored by people in both disciplines The series heralds the emergence of a truly interdisciplinary field in which people from different disciplines are working together to address a shared set of questions The papers in this third volume illustrate the ways in which the field continues to broaden taking on new methodological approaches and interacting with substantive theories from an ever wider array of disciplines Some recent research in experimental philosophy is going more deeply into well established questions in the field while other strands of research are exploring issues that scarcely appeared in the field even a few years ago Thus we see the introduction of new empirical and statistical methods network analysis new theoretical approaches formal semantics and the development of entirely new interdisciplinary connections in the emerging field of experimental jurisprudence

Contemporary Psychology **The Psychology of Love** Thiago de Almeida, David L.
