Lowenfeld On International Arbitration:

Lowenfeld on International Arbitration Andreas F. Lowenfeld, 2005 *The Roles of Psychology in International Arbitration* Tony Cole, 2017-03-15 The system of international arbitration is built on private contractual relations yet has been endorsed by governments around the world as a fair and reliable alternative to litigation in State courts As a private process however its authority and legitimacy derive entirely from the views and actions of those involved in the arbitral process whether arbitrators counsel or parties It is though increasingly clear that psychological factors complicate and in some cases radically change every arbitral proceeding In this context psychological insights are crucial for understanding how international arbitration genuinely operates and whether the legal framework currently applied to it is well suited to achieving the aims of ensuring a fair and reliable dispute resolution procedure This is the first book to focus on this important issue the insights into international arbitration that can be gained from contemporary psychology With contributions from nineteen internationally known figures in their fields arbitrators mediators lawyers law professors psychology professors psychologists and drawing from a longer term project on the role of psychology in arbitration this ground breaking volume addresses a range of topics including the following the decision making processes of arbitrators the ability of arbitration to serve as a genuine dispute resolution mechanism the impact of particular procedures on the arbitral process bias self deception and vested interests in judgment and decision making the role of arbitrators in managing the arbitral process cultural differences in the evaluation of arguments psychological influences on witness testimony the impact of tribunal composition on arbitral decision making the influence of arbitration's professional context on arbitrators and legal counsel and methods for arbitrators and legal counsel to more effectively manage the arbitral process Informed by the behavioural insights in these essays counsel and arbitrators will be enabled to think critically about the underlying assumptions and the potential behavioural effects of a prospective arbitration while individuals researching arbitration will gain a greater understanding of the psychological context in which every arbitration occurs This book meets the increasingly recognized need for understanding the role of psychology in arbitral proceedings and forms an indispensable foundation for subsequent work in this area Its innovative and forward thinking analysis will be of immeasurable value to the international arbitration community as well as to institutions supporting arbitration and to academics in the field **The Culture of International Arbitration** Won L. Kidane, 2017-02-24 Although international arbitration has emerged as a credible means of resolution of transnational disputes involving parties from diverse cultures the effects of culture on the accuracy efficiency fairness and legitimacy of international arbitration is a surprisingly neglected topic within the existing literature The Culture of International Arbitration fills that gap by providing an in depth study of the role of culture in modern day arbitral proceedings It contains a detailed analysis of how cultural miscommunication affects the accuracy efficiency fairness and legitimacy in both commercial and investment arbitration when the arbitrators and the parties their counsel and witnesses

come from diverse legal traditions and cultures The book provides a comprehensive definition of culture and methodically documents and examines the epistemology of determining facts in various legal traditions and how the mixing of traditions influences the outcome By so doing the book demonstrates the acute need for increasing cultural diversity among arbitrators and counsel while securing appropriate levels of cultural competence To provide an accurate picture Kidane conducted interviews with leading international jurists from diverse legal traditions with first hand experience of the complicating effects of culture in legal proceedings Given the insights and information on the rules and expectations of the various legal traditions and their convergence in modern day international arbitration practice this book challenges assumptions and can offer a unique and useful perspective to all practitioners academics policy makers students of international arbitration

International Arbitration and Private International Law George A. Bermann, 2017-05-15 No field of legal scholarship or practice operates in the world of private international law as continuously and pervasively as does international arbitration commercial and investment alike Arbitration's dependence on private international law manifests itself throughout the life cycle of arbitration from the crafting of an enforceable arbitration agreement through the entire arbitral process to the time an award comes before a national court for annulment or for recognition and enforcement Thus international arbitration provides both arbitral tribunals and courts with constant challenges Courts may come to the task already equipped with longstanding private international law assumptions but international arbitrators must largely find their own way through the private international law thicket Arbitrators and courts take guidance in their private international law inquiries from multiple sources party agreement institutional rules treaties the national law of competing jurisdictions and an abundance of soft law some of which may even be regarded as expressing an international standard In a world of this sort private international law resourcefulness is fundamental

Decision-making in International Construction Arbitration Haytham Besaiso, 2023-10-03 This book contributes to the empirical understanding of how arbitrators make their decisions on the substance of commercial disputes arising from international construction projects It is based on in depth interviews with 28 international construction arbitrators and on the analysis of dozens of international construction arbitration awards The combined experience of those who participated in the author's research amounted to hundreds of international construction arbitrations 300 cases in addition to several hundred international commercial arbitrations It presents the results of the first and largest research to be undertaken in this area and it will be useful to arbitration practitioners and scholars and to the wider audience of dispute resolution students practitioners and theorists In turn the book examines to what extent international arbitrators apply the law as the substantive norm providing an explanation for that and then offers insights into whether arbitrators in fact lean towards commercial and transnational norms to construe the parties contract before discussing to what extent international arbitrators take into account fairness considerations to reach their decisions on the merits of the parties claims The book also examines to what extent

international arbitrators apply mandatory rules of foreign law. Lastly, it provides insight into the effect of arbitrators' background characteristics on their decisions. Written for arbitration practitioners, arbitrators, and legal counsel and scholars, the book will be useful for both experienced arbitrators and those starting their arbitration career or studying for their arbitration qualification. It will also be useful for project professionals involved in contract management and dispute resolution.

Rethinking International Commercial Arbitration Gilles Cuniberti, 2017-05-26 Arbitration is the normal and preferred mode for resolving international commercial disputes. It presents an essential advantage over national courts by offering neutrality of adjudication but is currently only available where both parties have consented to it. This innovative book proposes a fundamental rethink of this assumption and argues that arbitration should become the default mode of resolution in international commercial disputes.

The Evolution and Future of International Arbitration Stavros Brekoulakis, Julian D.M. Lew, 2016-06-24 The School of International Arbitration of the Centre for Commercial Law Studies at Queen Mary University of London celebrated its 30th anniversary in April 2015 with a major conference featuring presentations by 35 international arbitration practitioners and scholars from many countries representing a variety of legal systems. This volume has emerged from that conference. What is striking is not only the range and diversity of the topics examined but also the emergence of new subjects for examination demonstrating that arbitration law and practice do not stand still but are constantly evolving. The issues and topics covered include the following: Evolution of case law and practice in international arbitration; The concept and autonomy of arbitral award; Parties in international arbitration; Parallel proceedings in international arbitration; Court review of arbitration awards; Geographic expansion of international arbitration; Counsel regulation and conflicts disclosures; The use of technology in international arbitration; Teaching and research in international arbitration. This superbly organised and edited volume like earlier conference volumes from the School of International Arbitration is sure to be welcomed and acclaimed and like them will prove of lasting value.

Procedure and Evidence in International Arbitration Jeffrey Waincymer, 2012-05-23 Central to the book's purpose is the procedural challenge facing arbitrators at each and every stage of the arbitral process when fairness arguments conflict with efficiency concerns and trade offs must be determined. Some key themes include how can a tribunal be fair and in particular be neutral if parties are so diverse; How can arbitration be made efficient and cost effective without undue inroads into fairness and accuracy; How does a tribunal do what is best if the parties are choosing a suboptimal process; When can or must an arbitrator ignore procedural choices made by the parties. The author thoroughly evaluates competing arguments and adds his own practical tips expertly synthesizing and engaging with the conference literature and differing authors' views. He identifies criteria that offer a harmonized approach to each stage of the arbitral process with particular attention to such aspects of international arbitration as appropriate trade offs between flexibility and certainty; the rights, duties and powers of arbitrators; appointment and challenge of arbitrators; responses to guerilla tactics; drafting of arbitration agreements including specialty

clauses drafting of required commencement notices and response documents set off fast track arbitration and other efficiency options strategic use of preliminary conferences and timetabling online arbitration multi party multi contract class arbitration amicus and third party funders pre arbitral referees and interim relief witness evidence both factual and expert documentary evidence production obligations and challenges to production identifying applicable law and remedies and costs
