Lifeways in the Northern Maya Lowlands Jennifer P. Mathews, Bethany A. Morrison, 2006 The flat dry reaches of the northern Yucatán Peninsula have been largely ignored by archaeologists drawn to the more illustrious sites of the south This book is the first volume to focus entirely on the northern Maya lowlands presenting a broad cross section of current research projects in the region by both established and up and coming scholars To address the heretofore unrecognized importance of the northern lowlands in Maya prehistory the contributors cover key topics relevant to Maya studies the environmental and historical significance of the region the archaeology of both large and

small sites the development of agriculture resource management ancient politics and long distance interaction among sites As a volume in the series Native Peoples of the Americas it adds a human dimension to archaeological findings by incorporating modern ethnographic data By exploring various social and political levels of Maya society through a broad expanse of time Lifeways in the Northern Maya Lowlands not only reconstructs a little known past it also suggests the broad implications of archaeology for related studies of tourism household economies and ethno archaeology It is a benchmark work that pointedly demonstrates the need for researchers in both north and south to ignore modern geographic boundaries in their search for new ideas to further their understanding of the ancient Maya

Pre-Mamom Pottery Variation and the Preclassic Origins of the Lowland Maya Debra S. Walker, 2023-04-15 Pre Mamom Pottery Variation and the Preclassic Origins of the Lowland Maya summarizes archaeological researchers current views on the adoption and first use of pottery across the Maya lowlands Covering the early Middle Preclassic period when communities began using and producing pottery for the first time roughly 1000 600 BC through to the establishment of a recognizably Maya tradition termed the Mamom ceramic sphere about 600 300 BC the book demonstrates that the adoption was broadly contemporary with variation in how the new technology was adapted locally Analyzing ceramics found at sites in Belize Pet n Guatemala and Mexico the contributors provide evidence that the pre Mamom expansion of pottery resulted from increased dependence on maize agriculture exploitation of limestone caprock and greater reliance on a preexisting system of long distance exchange The chapters describe the individual experiences of new potting communities at various sites across the region They are supplemented by appendixes presenting key chronological data as well as the principal types and varieties of pre Mamom ceramic complexes across the various spheres Xe Eb Swasey Cunil and Ek A significant amount of new material has been excavated in the last decade changing what is known about the early Middle Preclassic period and making Pre Mamom Pottery Variation and the Preclassic Origins of the Lowland Maya a first read of the early ceramic prehistory of the Maya lowlands It will be a valuable resource for students and scholars interested in the archaeology of the Maya lowlands Mesoamerican social complexity and ceramic technology Contributors E Wyllys Andrews V Jaime Awe George J Bey III Ronald L Bishop Michael G Callaghan Ryan H Collins Kaitlin Crow Sara Dzul G ngora Jerald Ek Tom s Gallareta Negr n Bernard Hermes Takeshi Inomata Betsy M Kohut Laura J Kosakowsky Wieslaw Koszkul Jon Lohse Michael Love Nina Neivens Terry Powis Duncan C Pring Kathryn Reese Taylor Prudence M Rice Robert M Rosenswig Kerry L Sagebiel Donald A Slater Katherine E South Lauren A Sullivan Travis Stanton Juan Luis Vel squez Mu oz Debra S Walker Michal Wasilewski Jaroslaw ra ka

Fitzsimmons, 2015-11-02 Classic Maya Polities of the Southern Lowlands investigates Maya political and social structure in the southern lowlands assessing comparing and interpreting the wide variation in Classic period Maya polity and city composition development and integration Traditionally discussions of Classic Maya political organization have been dominated by the debate over whether Maya polities were centralized or decentralized With new largely unpublished data from several recent archaeological projects this book examines the premises strengths and weaknesses of these two perspectives before moving beyond this long standing debate and into different territory The volume examines the articulations of the various social and spatial components of Maya polity the relationships strategies and practices that bound households communities institutions and dynasties into enduring or short lived political entities By emphasizing the internal negotiation of polity the contributions provide an important foundation for a more holistic understanding of how political organization functioned in the Classic period *Ancient*

Maya Calendar Origins Prudence M. Rice, 2009-02-17 In Maya Political Science Time Astronomy and the Cosmos Prudence M Rice proposed a new model of Maya political organization in which geopolitical seats of power rotated according to a 256 year calendar cycle known as the May This fundamental connection between timekeeping and Maya political organization sparked Rice s interest in the origins of the two major calendars used by the ancient lowland Maya one 260 days long and the other having 365 days In Maya Calendar Origins she presents a provocative new thesis about the origins and development of the calendrical system Integrating data from anthropology archaeology art history astronomy ethnohistory myth and linguistics Rice argues that the Maya calendars developed about a millennium earlier than commonly thought

around 1200 BC as an outgrowth of observations of the natural phenomena that scheduled the movements of late Archaic hunter gatherer collectors throughout what became Mesoamerica She asserts that an understanding of the cycles of weather and celestial movements became the basis of power for early rulers who could thereby claim control over supernatural cosmic forces Rice shows how time became materialized transformed into status objects such as monuments that encoded calendrical or temporal concerns as well as politicized becoming the foundation for societal order political legitimization and wealth Rice s research also sheds new light on the origins of the Popol Vuh which Rice believes encodes the history of the development of the Mesoamerican calendars She also explores the connections between the Maya and early Olmec and Izapan cultures in the Isthmian region who shared with the Maya the cosmovision and ideology incorporated into the calendrical systems

Ancient Households of the Americas John G. Douglass, Nancy Gonlin, 2012-04-15 In Ancient Households of the Americas archaeologists investigate the fundamental role of household production in ancient colonial and contemporary households Several different cultures Iroquois Coosa Anasazi Hohokam San Agust n Wankarani Formative Gulf Coast Mexico and Formative Classic Colonial and contemporary Maya are analyzed through the lens of household archaeology in concrete data driven case studies The text is divided into three sections Section I examines the spatial and social organization and context of household production Section II looks at the role and results of households as primary producers and Section III investigates the role of and interplay among households in their greater political and socioeconomic communities In the past few decades household archaeology has made substantial contributions to our understanding and explanation of the past through the documentation of the household as a social unit whether small or large rural or urban commoner or elite These case studies from a broad swath of the Americas make Ancient Households of the Americas extremely valuable for continuing the comparative interdisciplinary study of households

Historical Dictionary of Mesoamerica Walter R. T. Witschey, Clifford T. Brown, 2012 Mesoamerica is one of six major areas of the world where humans independently changed their culture from a nomadic hunter gatherer lifestyle into settled communities cities and civilization In addition to China twice the Indus Valley the Fertile Crescent of southwest Asia Egypt and Peru Mesoamerica was home to exciting and irreversible changes in human culture called the Neolithic Revolution The changes included domestication of plants and animals leading to agriculture husbandry and eventually sedentary village life These developments set the stage for the growth of cities social stratification craft specialization warfare writing mathematics and astronomy or what we call the rise of civilization These changes forever transformed humankind The Historical Dictionary of Mesoamerica covers the history of Mesoamerica through a chronology an introductory essay an extensive bibliography and over 900 cross referenced dictionary entries covering the major peoples places ideas and events related to Mesoamerica This book is an excellent access point for students researchers and anyone wanting to know more about Mesoamerica

Encyclopaedia of the History of Science, Technology, and Medicine in Non-Western Cultures Helaine Selin, 1997-07-31

The Encyclopaedia fills a gap in both the history of science and in cultural studies. Reference works on other cultures tend either to omit science completely or pay little attention to it and those on the history of science almost always start with the Greeks with perhaps a mention of the Islamic world as a translator of Greek scientific works. The purpose of the Encyclopaedia is to bring together knowledge of many disparate fields in one place and to legitimize the study of other cultures' science. Our aim is not to claim the superiority of other cultures but to engage in a mutual exchange of ideas. The Western academic divisions of science, technology and medicine have been united in the Encyclopaedia because in ancient cultures these disciplines were connected. This work contributes to redressing the balance in the number of reference works devoted to the study of Western science and encourages awareness of cultural diversity. The Encyclopaedia is the first compilation of this sort and it is testimony both to the earlier Eurocentric view of academia as well as to the widened vision of today. There is nothing that crosses disciplinary and geographic boundaries dealing with both scientific and philosophical issues to the extent that this work does.

PERSONAL NOTE FROM THE EDITOR Many years ago I taught African history at a secondary school in Central Africa. **Motul de San José** Antonia E Foias, Kitty F Emery, 2012-09-23 Scholars have long debated the nature of Maya political organization during the Classic period AD 250-950. Complex questions regarding political centralization, economic change and the role of politics and economics in the rise and collapse of the civilization have been examined and reexamined from a variety of perspectives. Antonia Foias and Kitty Emery have assembled a broad collection of essays all focused on a single polity that of Motul de San José. By presenting a coherent interdisciplinary body of archaeological and environmental data, the volume offers an intensely deep focused investigation of the various models of the ancient Maya political and economic systems. Research conducted over six seasons of fieldwork reveals a more centralized political system than expected and uncovers the workings of the ancient economic structure. The contributors offer new details concerning how involved royals and nonroyal elites were in the politics of nearby states as well as an extensive tribute system.

A Dictionary of Archaeology Ian Shaw, Robert Jameson, 2008-04-15 This dictionary provides those studying or working in archaeology with a complete reference to the field. **Language Contact, Inherited Similarity and Social Difference** Danny Law, 2014-06-15 This book offers a study of long term intensive language contact between more than a dozen Mayan languages spoken in the lowlands of Guatemala, Southern Mexico and Belize. It details the massive restructuring of syntactic and semantic organization, the calquing of grammatical patterns and the direct borrowing of inflectional morphology including in some of these languages the direct borrowing of even entire morphological paradigms. The in depth analysis of contact among the genetically related Lowland Mayan languages presented in this volume serves as a highly relevant case for theoretical historical contact typological, socio and anthropological linguistics. This linguistically complex situation involves serious engagement with issues of methods for distinguishing contact induced similarity from inherited similarity, the role of social and ideological variables in conditioning the outcomes of language contact, cross linguistic

tendencies in language contact as well as the effect that inherited similarity can have on the processes and outcomes of language contact
