Islam,2015-02-11 Issues relating to employment and labour have once again come to the fore of global policy debates in the
wake of the widespread unemployment that has accompanied the current financial crisis In the developing world there is a
growing realization that productive employment promotion and social protection have to be at the core of inclusive growth
and development This book supports the view that employment is a cross cutting issue shaped by macroeconomic and
microeconomic policy interventions and provides a capacious framework to analyse the complexity of this global debate It
covers a wide range of issues that have received insufficient attention in the discourse of development and labour economics
These include the impact of macroeconomic policies on employment labour rights the development of human capabilities and
employability youth employment the benefits and costs of labour market flexibility and the importance of social protection for
all This important book aims at filling this gap by revisiting old debates and reconnecting them to the contemporary context
combining analyses with relevant empirical evidence It will appeal to a diverse readership of academic institutions and think
