Notational complexity or subtilitas was engendered in the late fourteenth century by a thorough probing of all the rhythmic possibilities within the accepted mensurations As French and Italian notational practices began to diverge at the beginning of the Ars nova composers invented new rhythmic symbols figurae as their innovations required and this resulted in a variety of notations that were as confusing to the musician of the day as they are to the modern scholar In the third quarter of the fourteenth century a notational system combining elements of the French and Italian systems was put forth in the *Tractatus figurarum* This system proposed a standard of set of figurae for simultaneous combinations of any two of the four prolations of the French mensural system Edmond Coussemaker's 1869 edition of the *Tractatus figurarum* which attributes the treatise to Philippus de Caserta was based on his knowledge of only four of the fourteen surviving manuscripts A critical study of all the sources including the important Newberry Library manuscript leads to a corrected version of the text and allows the entire system to be resurrected The critical edition is joined with fully annotated translation on facing pages An Introduction discusses the authorship and theory of the treatise as well as placing it within the context of the music theory of the fourteenth century Full descriptions of all the manuscript sources and four full color plates of the Newberry Library manuscript are included The system of the *Tractatus figurarum* was beautifully creative but it did not meet with success Nevertheless the treatise proves itself invaluable to the study of the Ars subtilior in revealing certain basic notational principles that may be applied to surviving musical compositions illuminating the notational subtleties in which the music delighted ***Routledge Revivals: Medieval Italy (2004)*** Christopher Kleinhenz, 2017-07-05 First published in 2004 *Medieval Italy* An Encyclopedia provides an introduction to the many and diverse facets of Italian civilization from the late Roman empire to the end of the fourteenth century It presents in two volumes articles on a wide range of topics including history literature art music urban development commerce and economics social and political institutions religion and hagiography philosophy and science This illustrated A Z reference is a cross disciplinary resource and will be of key interest

not only to students and scholars of history but also to those studying a range of subjects as well as the general reader

Reader's Guide to Music Murray Steib, 2013-12-02 The Reader's Guide to Music is designed to provide a useful single volume guide to the ever increasing number of English language book length studies in music Each entry consists of a bibliography of some 3-20 titles and an essay in which these titles are evaluated by an expert in the field in light of the history of writing and scholarship on the given topic The more than 500 entries include not just writings on major composers in music history but also the genres in which they worked from early chant to rock and roll and topics important to the various disciplines of music scholarship from aesthetics to gay lesbian musicology *Explorations in Music, the Arts, and Ideas* Leonard B. Meyer, Eugene Narmour, Ruth A. Solie, **Key Figures in Medieval Europe** Richard Kenneth Emmerson, Sandra Clayton-Emmerson, 2006 From emperors and queens to artists and world travelers from popes and scholars to saints and heretics Key Figures in Medieval Europe brings together in one volume the most important people who lived in medieval Europe between 500 and 1500 Gathered from the biographical entries from the on going series the Routledge Encyclopedias of the Middle Ages these a-z biographical entries discuss the lives of over 600 individuals who have had a historical impact in such areas as politics religion or the arts Individuals from places such as medieval England France Germany Iberia Italy and Scandinavia are included as well as those from the Jewish and Islamic worlds A thematic outline is included that lists people not only by categories but also by regions Entries fall under the following categories Artists Architects Authors Commercial Figures Musicians Political Figures Religious Figures Scientific Figures Travelers Women In one convenient volume students scholars and interested readers will find the biographies of the people whose actions beliefs creations and writings shaped the Middle Ages one of the most fascinating periods of world history **'The Temple of Music' by Robert Fludd** Peter Hauge, 2017-03-02 Robert Fludd 1574-1637 is well known among historians of science and philosophy for his intriguing work The Metaphysical Physical and Technical History of both Major and Minor Worlds in which music plays an important role in his system of neoplatonic correspondences the harmony of the universe macrocosm as well as the harmony of man microcosm The Temple of Music 1617-18 is one section of this work and deals with music theory practice and organology Many musicologists today have dismissed his musical ideas as conservative and outmoded or mainly based on fantasy only the chapters on instruments have received some attention However reading Fludd's work on music theory and practice in the context of his own time and comparing it with other contemporary treatises it is apparent that much of it contains highly original ideas and cannot be considered old fashioned or conservative It is evident that Fludd's music philosophy influenced and provoked contemporary natural philosophers such as Marin Mersenne and Johannes Kepler Less well known is the fact that Fludd's music theory reveals aspects of the development of new concepts that appear to reflect contemporary writers on music such as John Coprario and Thomas Campion Before now The Temple of Music has not been easily accessible or available and the fact that Fludd wrote in Latin has also been prohibitive This critical edition

provides the original Latin an English translation and essential illustrations The book will therefore be a useful tool for understanding the position of English music theory around 1600 **A Correspondence of Renaissance Musicians** Bonnie J. Blackburn,Edward Elias Lowinsky,Clement Albin Miller,1991 This book comprises an edition of the Spataro Correspondence so called after its main author the Bolognese music theorist Giovanni Spataro c 1459 1541 Spataro s main correspondents were Giovanni del Lago and Pietro Aaron The 110 letters which survive in the Biblioteca ApostolicaVaticana and the Bibliotheque Nationale offer a vivid insight into the intellectual world of a group of sixteenth century music theorists and performing musicians living in Italy With this edition an important body of source material now becomes readily available Each letter appears in its entirety in the original Italian with a full English summary commentary and notes A reference section includes a biographical dictionary and explanatory notes on problematic terms
