Chastain,2014-04-15 Sandra Chastain returns to the richly sensuous Wild West as a case of mistaken identity leads to uninhibited passion and pleasure Melissa Grayson desires nothing more than to teach art and poetry to the children at the private school founded by her father But every trip Melissa makes into town drives the single men into such a frenzy that the local clergy and sheriff finally give her an ultimatum marriage or jail Prepared to make any sacrifice for her students Melissa writes her New York pen pal a sickly sensitive scholar to arrange a platonic union whose real commitment will be to education Gambling man Lucky Lawrence is always up for a game of chance But when a sore loser expects Lucky to pay with his life even he wouldn't bet on making it out alive until he's confused for a studious Harvard boy who's engaged to the most beautiful woman Lucky has ever seen Never one to deny a damsel in distress Lucky happily plays the part Melissa in turn is shocked to discover that her groom is so ruggedly handsome with broad shoulders and teasing eyes a man who just may show her a love she has always thought existed only in books

**Hard Luck** Neil Levy,2011-06-30 The concept of luck has played an important role in debates concerning free will and moral responsibility yet participants in these debates have relied upon an intuitive notion of what luck is Neil Levy develops an account of luck which is then applied to the free will debate He argues that the standard luck objection succeeds against common accounts of libertarian free will but that it is possible to amend libertarian accounts so that they are no more vulnerable to luck than is compatibilism But compatibilist accounts of luck are themselves vulnerable to a powerful luck objection historical compatibilisms cannot satisfactorily explain how agents can take responsibility for their constitutive luck non historical compatibilisms run into insurmountable difficulties with the epistemic condition on control over action Levy argues that because epistemic conditions on control are so demanding that they are rarely satisfied agents are not blameworthy for performing actions that they take to be best in a given situation It follows that if there are any actions for which agents are responsible they are akratic actions but even these are unacceptably subject to luck Levy goes on to discuss recent non historical compatibilisms and argues that they do not offer a viable alternative to control based compatibilisms He suggests that luck undermines our freedom and moral responsibility no matter whether determinism is true or not

*Infinity, Causation, and Paradox* Alexander R. Pruss,2018-07-26 Infinity is paradoxical in many ways Some paradoxes involve deterministic supertasks such as Thomson's Lamp where a switch is toggled an infinite number of times over a finite period of time or the Grim Reaper where it seems that infinitely many reapers can produce a result without doing anything Others involve infinite lotteries If you get two tickets from an infinite fair lottery where tickets are numbered from 1 no matter what number you saw on the first ticket it is almost certain that the other ticket has a bigger number on it And others center on paradoxical results in decision theory such as the surprising observation that if you perform a sequence of fair coin flips that goes infinitely far back into the past but only finitely into the future you can leverage information about past coin flips to predict future ones with only finitely many mistakes Alexander R Pruss examines this seemingly large family of paradoxes in *Infinity Causation and Paradox* He

establishes that these paradoxes and numerous others all have a common structure their most natural embodiment involves an infinite number of items causally impinging on a single output These paradoxes he argues can all be resolved by embracing causal finitism the view that it is impossible for a single output to have an infinite causal history Throughout the book Pruss expositis such paradoxes defends causal finitism at length and considers connections with the philosophy of physics where causal finitism favors but does not require discretist theories of space and time and the philosophy of religion with a cosmological argument for a first cause
