**Chimpanzee Travels** Dale Peterson,2003 A lifelong fascination with primates led Dale Peterson to Africa which he crisscrossed in hope of sighting chimpanzees in the wild As with any adventure worth retelling however Peterson s detours are as notable as his destinations With the good natured fatalism of the tested traveler Peterson tells of trains and riverboats opportunists and ecotourists rain forests and shantytowns as he conveys the pitfalls of going forth on a budget as tiny as the continent is vast Along the way we also meet Jane Goodall and several other renowned primate researchers and caretakers This is travel writing with a purpose an account that inspires both admiration and concern for Africa s people places and natural diversity

*Earthcare* David Clowney,Patricia Mosto,2009-11-16 This anthology designed for use in undergraduate courses in environmental ethics includes new and classic readings by leading writers in the field full length case studies and many short discussion cases Introductions and discussion questions are provided for all the essays with each chapter introduced by a summary of the issues and appropriate philosophic historical and scientific background Exploring ethical theory environmental ethics science and the environmental movement *Earthcare* also offers suggestions for students on how to think about ethics and the environment Through many worldviews religions and philosophical perspectives this collection grapples with environmental ethics issues from valuing nature concerns about the atmosphere water land animals and human population as well as the interlocking and often problematic interests of business consumption energy and sustainability This book also features examples of a wide variety of environmentally engaged individuals giving students a way of seeing the connections between the material studied and what they themselves might accomplish

**Growing Up Human** Brenna Hassett,2022-06-30 Brings the science of biological anthropology to bear on understanding how our evolutionary history has shaped a phenomenon everyone has experienced childhood Tracking deep into our evolutionary history anthropological science has begun to unravel one particular feature that sets us apart from the many many animals that came before us our uniquely long childhoods *Growing Up Human* looks at how we have diverged from our ancestral roots to stay forever young or at least what seems like forever and how the evolution of childhood is a critical part of the human story Beginning with a look at the ways animals invest in their offspring the book moves through the many steps of making a baby from pair bonding to hidden ovulation points where our species has repeatedly stepped off the standard primate path From the mystery of monogamy to the minefield of modern parenting advice biological anthropologist Brenna Hassett reveals how differences between humans and our closest cousins lead to our messy mating systems dangerous pregnancies and difficult births and what these tell us about the kind of babies we are trying to build Using observations of our closest primate relatives the tiny relics of childhood that come to us from the archaeological record and the bones and

teeth of our ancestors science has started to unravel the evolution of our childhood right down the fossil record In our species investment doesn't stop at birth and as Growing Up Human reveals we can compare every aspect of our care and feeding from the chemical composition of our milk to our fondness for formal education from ancient times onwards in order to understand just what we evolved our weird and wonderful childhoods for **Cyborg Futures** Teresa

Heffernan,2019-11-26 This volume brings together academics from evolutionary biology literary theory robotics digital culture anthropology sociology and environmental studies to consider the impact of robotics and AI on society By bringing these perspectives together in one book readers gain a sense of the complex scientific social and ideological contexts within which AI and robotics research is unfolding as well as the illusory suppositions and distorted claims being mobilized by the industry in the name of bettering humanity's future Discussions about AI and robotics have been shaped by computer science and engineering steered by corporate and military interests forged by transhumanist philosophy and libertarian politics animated by fiction and hyped by the media From fiction passing as science to the illusion of AI autonomy to the business of ethics to the automation of war this collection recognizes the inevitable entanglement of humanity and technology while exposing the problematic assumptions and myths driving the field in order to better assess its risks and potential **The**

**Evolution of Human Cleverness** Richard Hallam,2022-05-01 The Evolution of Human Cleverness presents a unique introduction to the way human cognitive abilities have evolved The book comprises a series of mini essays on distinct topics in which technical terms are simplified considering how humans made the long journey from our ape like ancestors to become capable of higher level reasoning and problem solving All the topics are cross linked allowing the reader to dip in and out but certain key concepts run through the underlying reasoning Chiefly these are adaptation and selection the distinction between ultimate and proximate causes of behaviour gene culture co evolution and domain general versus domain specific cognitive processes The book should help the reader draw lessons for the human species as a whole especially in view of the environmental threats to its own existence Entries have been carefully crafted to cut through scientific jargon providing bite sized and digestible chunks of knowledge making the topic accessible for students and lay readers alike The author draws on research from diverse fields including Psychology Anthropology Archaeology Biology and Neuroscience to provide an unbiased account of the field making it an ideal text for students of all levels **Personality: Evolutionary**

**Heritage and Human Distinctiveness** Arnold H. Buss,2014-02-25 This innovative study focuses on seven inherent personality traits humans share with primates activity fearfulness impulsivity sociability altruism aggressiveness and dominance The author discusses these traits from the dual perspective of our evolutionary history and our human uniqueness

**We Are All Completely Beside Ourselves** Karen Joy Fowler,2013-05-30 The New York Times bestselling author of The Jane Austen Book Club introduces a middle class American family that is ordinary in every way but one in this novel that won the PEN Faulkner Award and was a finalist for the Man Booker Prize Meet the Cooke family Mother and Dad brother Lowell

sister Fern and Rosemary who begins her story in the middle She has her reasons I was raised with a chimpanzee she explains I tell you Fern was a chimp and already you aren't thinking of her as my sister But until Fern's expulsion she was my twin my funhouse mirror my whirlwind other half and I loved her as a sister As a child Rosemary never stopped talking Then something happened and Rosemary wrapped herself in silence In *We Are All Completely Beside Ourselves* Karen Joy Fowler weaves her most accomplished work to date a tale of loving but fallible people whose well intentioned actions lead to heartbreaking consequences A gripping big hearted book through the tender voice of her protagonist Fowler has a lot to say about family memory language science and indeed the question of what constitutes a human being Khaled Hosseini **The Case of the Female Orgasm** Elisabeth A. Lloyd, 2009-07 Why women evolved to have orgasms when most of their primate relatives don't is a persistent mystery among evolutionary biologists In pursuing this mystery Lloyd arrives at another How could anything as inadequate as the evolutionary explanations of the female orgasm have passed muster as science

**Through a Window** Jane Goodall, 1990 Jane Goodall recounts the thirty years she spent in the company of chimpanzees and describes the dynamics of a chimpanzee family **Saving Molly** James Mahoney D.V.M., Ph.D., 1998-01-05 The puppy was dying when James Mahoney found her Molly was not the first dying animal the research veterinarian had seen But Molly's struggle sent him barreling over rough Jamaican mountains in a borrowed car searching for the equipment he'd need to save her More than a story about a dog this is the story of a rescued man He asks himself questions How can he spend his days with chimpanzees locked behind bars and still say that he loves them What do we owe them for their participation in AIDS research Why is saving a single runt puppy important In the tradition of James Herriot Mahoney's story spans fifty years of living with animals and with the two legged primates who study them Written by the man Jane Goodall called one of the most gentle and compassionate people I know *Saving Molly* is an important addition to the debate on animal research and a heartfelt meditation on one man's life With an introduction by Roger A. Caras president of the ASPCA He is concerned about the pain and the suffering of the animals That's what makes Jim Mahoney different Alex Pacheco founder of PETA

**Good Natured** Frans B. M. DE WAAL, F. B. M. de Waal, 2009-06-30 To observe a dog's guilty look to witness a gorilla's self sacrifice for a wounded mate to watch an elephant herd's communal effort on behalf of a stranded calf to catch animals in certain acts is to wonder what moves them Might there be a code of ethics in the animal kingdom Must an animal be human to be humane In this provocative book a renowned scientist takes on those who have declared ethics uniquely human Making a compelling case for a morality grounded in biology he shows how ethical behavior is as much a matter of evolution as any other trait in humans and animals alike World famous for his brilliant descriptions of Machiavellian power plays among chimpanzees the nastier side of animal life Frans de Waal here contends that animals have a nice side as well Making his case through vivid anecdotes drawn from his work with apes and monkeys and bolstered by the intriguing voluminous data from his and others ongoing research de Waal shows us that many of the building blocks of morality are natural they

can be observed in other animals Through his eyes we see how not just primates but all kinds of animals from marine mammals to dogs respond to social rules help each other share food resolve conflict to mutual satisfaction even develop a crude sense of justice and fairness Natural selection may be harsh but it has produced highly successful species that survive through cooperation and mutual assistance De Waal identifies this paradox as the key to an evolutionary account of morality and demonstrates that human morality could never have developed without the foundation of fellow feeling our species shares with other animals As his work makes clear a morality grounded in biology leads to an entirely different conception of what it means to be human and humane Reaching Into Thought Anne E. Russon, Kim A. Bard, Sue Taylor

Lets delve into the realm of bestselling books, exploring the captivating narratives that have captivated audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Lucy Growing Up Human : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you guessing until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
