The Concerto Stephan D. Lindeman, 2006. Twelve tone and serial music were dominant forms of composition following World War II and remained so at least through the mid 1970s. In 1961 Ann Phillips Basart published the pioneering bibliographic work in the field. Polish Music since Szymanowski Adrian Thomas, 2008-02-01. This book looks at Polish music since 1937 and its interaction with political and cultural turmoil. In Part I musical developments are placed in the context of the socio-political upheavals of inter-war Poland, Nazi occupation and the rise and fall of the Stalinist policy of socialist realism. 1948-54. Part II investigates the nature of the thaw between 1954 and 1959, focusing on the role of the Warsaw Autumn Festival. Part III discusses how composers reacted to the onset of serialism by establishing increasingly individual voices in the 1960s. In addition to a discussion of sonorism from Penderecki to Szalonek, it considers how different generations responded to the modernist aesthetic. Bacewicz and Lutoslawski, Baird and Serocki, Grecki and Krauze. Part IV views Polish music since the 1970s, including the issue of national identity and the arrival of a talented generation and its ironic postmodern slant on the past.

Aesthetics of Music Stephen Downes, 2014-06-27. *Aesthetics of Music: Musicological Approaches* is an anthology of fourteen essays, each addressing a single key concept or pair of terms in the aesthetics of music, collectively serving as an authoritative work on musical aesthetics that remains as close to the music as possible. Each essay includes musical examples from works in the 18th, 19th and into the 20th century. Topics have been selected from amongst widely recognised central issues in musical aesthetics as well as those that have been somewhat neglected to create a collection that covers a distinctive range of ideas. All essays cover historical origins, sources and developments of the chosen idea, survey important musicological approaches and offer new critical angles or musical case studies in interpretation.

Space and Spatialization in Contemporary Music: History and Analysis, Ideas and Implementations Maria Anna Harley, 2016-06-08. This dissertation presents the history of space in the musical thought of the 20th century, from Kurth to Clifton, from Varese to Xenakis, and outlines the development of spatialization in the theory and practice of contemporary music after 1950. The text emphasizes perceptual and temporal aspects of musical spatiality, thus reflecting the close connection of space and time in human experience. A new definition of spatialization draws from Ingarden's notion of the musical work; a typology of spatial designs embraces music for different acoustic environments, movements of performers and

audiences various positions of musicians in space etc The study of spatialization includes a survey of the composers s writings Ives Boulez Stockhausen Cage etc and an examination of their works The final part presents three unique approaches to spatialization Brant s simultaneity of sound layers Xenakis s movement of sound and Schafer s music of ritual and soundscape

Popular Music And Television In Britain Ian Inglis, 2016-04-22 Listening to popular music and watching television have become the two most common activities for postwar generations in Britain From the experiences of programmes like Oh Boy and Juke Box Jury to the introduction of 24 hour music video channels the number and variety of television outputs that consistently make use of popular music and the importance of the small screen as a principal point of contact between audiences and performers are familiar components of contemporary media operation Yet there have been few attempts to examine the two activities in tandem to chart their parallel evolution to explore the associations that unite them or to consider the increasingly frequent ways in which the production and consumption of TV and music are linked in theory and in practice This volume provides an invaluable critical analysis of these and other topics in newly written contributions from some of Britain s leading scholars in the disciplines of television and or popular music studies Through a concentration on four main areas in which TV organises and presents popular music history and heritage performers and performances comedy and drama audiences and territories the book investigates a diverse range of musical genres and styles factual and fictional programming historical and geographical demographics and the constraints of commerce and technology to provide the first systematic account of the place of popular music on British television

Roger Smalley: A Case Study of Late Twentieth-Century Composition Christopher Mark, 2016-04-08 How does one go about writing the history of musical composition in the late twentieth century when on the one hand so much of it seems impossibly fractured and disassociated and on the other there has been so little certainty about what the notion of music history might entail under the critiques of post modernism One of the most productive ways forward is to pursue case studies involving single composers whose music reflects several aspects of recent activity This enables the discussion of broad issues in a relatively focussed way whilst avoiding the pitfalls of traditional narrative histories

and the centrifugal tendencies of the relativistic approach that some have called for The music of the English born 1943 and Australia domiciled composer Roger Smalley is ideal material for such a study because of his involvement with and response to an unusually large number of the myriad concerns and practices of post 1950s composition including post serial constructivism parody electro acoustic composition and the electronic modification of conventionally produced sound Moment Form aleatorism minimalism the use of non Western resources Aboriginal and South East Asian sonorities neo Romanticism and arguably the new classicism as well as a brief flirtation with rock music in the late 60s Employing an interview with the composer as a kind of cantus firmus the book the first extended single author study of Smalley s music to be published incorporates critical commentary on the composer s major works in a chronological narrative that engages with broad issues of central relevance to Smalley s generation such as the process of learning the craft of composition in the early 60s the motivation behind the adoption of certain technical and aesthetic positions the effects on technical and aesthetic orientation of both the changing relationships between composer performer and audience and technological change and the distinction betwe
