Matters Of Life And Death Crisis In Biomedical Ethics:

Matters of Life and Death David Orentlicher, 2001-12-02 Orentlicher uses controversial life and death issues as case studies for evaluating three models for translating principle into practice Physician assisted suicide illustrates the application of generally valid rules a model that provides predictability and simplicity and more importantly avoids the personal biases that influence case by case judgments The author then takes up the debate over forcing pregnant women to accept treatments to save their fetuses He uses this issue to weigh the avoidance of perverse incentives an approach to translation that follows principles hesitantly for fear of generating unintended results And third Orentlicher considers the denial of life sustaining treatment on grounds of medical futility in his evaluation of the tragic choices model which hides difficult life and death choices in order to prevent paralyzing social conflict *Matters of Life and Death* David Orentlicher, 2021-03-09

Philosophical debates over the fundamental principles that should guide life and death medical decisions usually occur at a considerable remove from the tough real world choices made in hospital rooms courthouses and legislatures David Orentlicher seeks to change that drawing on his extensive experience in both medicine and law to address the translation of moral principle into practice a move that itself generates important moral concerns Orentlicher uses controversial life and death issues as case studies for evaluating three models for translating principle into practice Physician assisted suicide illustrates the application of generally valid rules a model that provides predictability and simplicity and more importantly avoids the personal biases that influence case by case judgments The author then takes up the debate over forcing pregnant women to accept treatments to save their fetuses He uses this issue to weigh the avoidance of perverse incentives an approach to translation that follows principles hesitantly for fear of generating unintended results And third Orentlicher considers the denial of life sustaining treatment on grounds of medical futility in his evaluation of the tragic choices model which hides difficult life and death choices in order to prevent paralyzing social conflict *Matters of Life and Death* is a rich and stimulating contribution to bioethics and law It is the first book to examine closely the broad problems of translating principle into practice And by analyzing specific controversies along the way it develops original insights likely to provoke both moral philosophers and those working on thorny issues of life and death *Current Catalog* National Library of

Medicine (U.S.), 1979 First multi year cumulation covers six years 1965 70 **Bioethics and the Christian Life** David VanDrunen, 2009-10-07 Just about everyone will face a difficult bioethics decision at some point In this book a theologian ethicist and lawyer equips Christians to make such decisions based on biblical truth wisdom and virtue Though a relatively new discipline bioethics has generated extraordinary interest due to a number of socially pressing issues *Bioethics and the Christian Life* places bioethics within the holistic context of the Christian life both developing a general Christian approach to making bioethics decisions and addressing a number of specific controversial areas of bioethics Clear concise and well organized the book is divided into three sections The first lays the theological foundation for bioethics decision making and

discusses the importance of wisdom and virtue in working through these issues The second section addresses beginning of life issues such as abortion stem cell research and infertility treatments The third section covers end of life issues such as living wills accepting and refusing medical treatment and treatment of patients in permanent vegetative states *Bioethics, Law, and Human Life Issues* D. Brian Scarnecchia, 2010-06-02 Bioethics Law and Human Life Issues A Catholic Perspective on Marriage Family Contraception Abortion Reproductive Technology and Death and Dying draws on the Magisterial teaching of the Catholic Church to outline a Catholic response to a host of controversial issues related to human life Scarnecchia lays out a Catholic moral theology based on the writings of Pope John Paul II and Thomas Aquinas and he then applies those Christian moral principles to today's most contentious ethical issues including reproductive technology embryo adoption contraception abortion family and same sex marriage and euthanasia and assisted suicide This review of Catholic moral principles brings together an in depth consideration of the central human life issues of our day with abundant reference to the Church's social teaching and to contrasting positions of today's leading ethicists **Matters of Life and Death** Tom L. Beauchamp, 1993 A collection of original essays by leading moral philosophers written specifically for students with no prior background in ethics Focusing on the major ethical issues of the day the essays cover problems such as abortion euthanasia capital punishment famine war suicide the environment and animal rights *The Right to Be Protected from Committing Suicide* Jonathan Herring, 2022-06-16 This book argues that suicidal people have the right to receive treatment and for reasonable steps to be taken that they are protected from killing themselves Those suffering threats to life from mental health issues deserve the same protection as those who face threats to life from ill health or violence from others The book explores the ethical and legal case for giving those beset with suicidal thoughts the treatment they need and for reasonable steps to be taken to prevent them attempting suicide Debates around suicide tend to be dominated by cases involving those with terminal medical conditions seeking assisted dying But of those wishing to die it is far more common to find middle aged men and young people oppressed by mental health and personal problems Too often the woeful failure in the funding of mental health services in the UK means that suicidal people are denied the support and help they desperately need This ground breaking book makes the legal and ethical case for recognising that the state and public authorities have a duty to provide and implement an effective suicide prevention strategy **A Matter of Life and Death** United States. Congress. House. Committee on Veterans' Affairs, 2014 **Feminist Perspectives in Medical Ethics** Helen B. Holmes, Laura Martha Purdy, 1992 a welcome addition to the literature Center for Theology and the Natural Sciences ideologically diverse selection of readings Times Literary Supplement London The essays are balanced challenging well argued and well written They ably and accessibly represent feminist contributions to medical ethics Religious Studies Review fascinating thought provoking Nursing Times A stimulating book for those women and men feminist and non feminist interested in medical ethics Maternal and Child Health landmark event in bioethics Women Health The aim of this volume is

to show how a feminist perspective advances biomedical ethics by uncovering inconsistencies in traditional argument and by arguing for the importance of hitherto ignored factors in decision making These essays include both theory and very specific examples that demonstrate the glaring inadequacy of mainstream medical ethics **Encyclopedia of Public**

Younis, 2020-06-12 The question of the ethical life is arguably one of the most compelling and urgent questions of our time As Peter Singer among others has pointed out almost 10 million children die each year due to poverty some of whom would not die if the amount of aid that we now offer increases significantly As Singer has also pointed out the exploitation of human beings and other animals is a major ethical and practical concern There can be little reasonable doubt that pain and suffering abound in the world today due to many causes such as poverty disease environmental degradation and destruction and anthropocentrism among others just as there can be little reasonable doubt that some of the pain and suffering is preventable So what does it mean to live ethically today Does it mean taking the point of view of the universe as Sidgwick put it memorably rather than a narrow anthropocentric or speciesist view Does it mean living in accordance with duties or obligations or in light of recognised virtues or with the minimisation of pain and suffering primarily in mind Does it entail a consideration of the interests of other species and a rejection of the principle of the sanctity of human life Does it mean not eating animals when other healthy alternatives are available especially when those animals have been treated in ways that are inconsistent with their interests whatever they may be Does it mean taking active steps to reduce poverty on our part on a day to day basis Is ethics exhausted in some sense today And if we could reach some consensus on these questions what difference would the ethical life make Some argue that speciesism and the exploitation of human beings and other animals might diminish that pain and suffering especially gratuitous pain and suffering would decrease or at the very least not increase or that we will become more aware of the limitations of things such as the traditional ethic of the sanctity of life as Singer calls it Some argue that the ethical life is closely related to a life of relationships reflection and deliberation all of which deepen our understanding and enrich us personally Others argue that the ethical life is closely related to our search

for a meaningful life that the ethical life can help us to find meaning in a world in which meaning defined broadly can seem elusive enigmatic or unsubstantial These and related issues and questions are explored in this collection which illustrates the relevance vitality and dynamism of ethics today Bioethics Megan-Jane Johnstone,2022-11-15 Now in its eighth edition Bioethics A Nursing Perspective provides practical guidance on the ethical issues you might come across in nursing practice with real world examples that help to bring this important subject to life Author Dr Megan Jane Johnstone AO Australia s foremost nursing ethics scholar provides a comprehensive framework for negotiating the ethical challenges obligations and responsibilities you might face The text is engaging and easy to follow and has been fully updated to reflect current issues in health care such as nurse practitioner assisted dying pandemic ethics and the moral costs of misinformation and medical conspiracy theories This book is a suitable companion to the law and ethics components of both undergraduate and postgraduate nursing studies and is relevant for all nurses who encounter ethical problems in their everyday practice Written in an engaging style suitable for undergraduate as well as postgraduate students and researchers Focuses on prominent and topical ethical issues facing individual nurses as well as the broader profession Covers a broad range of bioethical issues in health care and how these relate to various fundamental traditions in philosophical ethics Real life case studies and hypothetical scenarios to encourage debate Covers hot topics in modern nursing practice including Professional standards How to make moral decisions Cross cultural ethics including the problem of racism Dehumanisation and vulnerable populations Patient rights Mental health care ethics End of life care Moral politics of abortion and euthanasia Moral lessons of COVID 19 Additional resources on Evolve eBook on VitalSource Questions fostering critical reflection to support learning Key points and new chapter groupings for easy navigation New chapter on pandemic ethics **Clinical Bioethics** James F.
