Pensions, Labor, and Individual Choice David A. Wise, 2008-04-15 In recent years a decline in the labor force participation of older workers has combined with rapid current and projected increases in the number of older Americans producing major policy debates over looming crises in social security and to a lesser extent in the private pension system That private system is playing an increasing role in the support of retired workers and promises to be the subject of increasing scrutiny by economists and policymakers alike Previous books on private pensions have largely neglected behavioral implications of the features of pension plans The papers in this volume developed from material presented at a recent National Bureau of Economic Research conference address two aspects of the relation between varieties of labor coverage and participation in the labor force First age at retirement may be correlated with kind of pension coverage The papers in fact provide strong evidence that individual decisions about when to retire are directly influenced by pension options Second pension plans usually impose a high cost on workers who change jobs which suggests that pension coverage reduces instances of job change *Pensions Labor and Individual Choice* quantifies these correlations and proposes a conceptual framework within which to view them

Social Security and Retirement around the World Jonathan Gruber, David A. Wise, 2008-04-15 What accounts for the striking decline in labor force participation at increasingly younger ages *Social Security and Retirement around the World* examines one explanation social security programs actually provide incentives for early retirement This volume houses a set of remarkable papers that present information on the social security systems and labor force participation patterns in Belgium Canada France Germany Italy Japan the Netherlands Spain Sweden the United Kingdom and the United States

Social Security Programs and Retirement around the World Axel Börsch-Supan, Courtney C. Coile, 2021-03-05 This ninth phase of the International Social Security project which studies the experiences of twelve developed countries

examines the effects of public pension reform on employment at older ages In the past two decades men s labor force participation at older ages has increased reversing a long term pattern of decline participation rates for older women have increased dramatically as well While better health more education and changes in labor supply behavior of married couples may have affected this trend these factors alone cannot explain the magnitude of the employment increase or its large variation across countries The studies in this volume explore how financial incentives to work at older ages have evolved as a result of public pension reforms since 1980 and how these changes have affected retirement behavior Utilizing a common template to analyze the developments across countries the findings suggest that social security reforms have strengthened the financial returns to working at older ages and that these enhanced financial incentives have contributed to the rise in late life employment

Argentina The World Bank,2009-08-21 Following the serious economic crisis in 2001 02 Argentina mobilized an unprecedented effort to provide income support to the segment of the population most in need Now as growth has returned and social indicators recovered to precrisis levels there is an opening to move from emergency support programs to a more comprehensive long term and sustainable strategy for social protection The challenge is to design and fully implement a social protection system that has adequate coverage and benefits and is integrated and fiscally and politically sustainable The analysis contained in this book aimed to contribute to and inform the debate about the future of income support policies in Argentina taking the views values and preferences of the stakeholders and the population as starting points The research included two innovative efforts to collect and understand the landscape of ideas regarding options for social protection circulating in Argentina first an extensive set of consultations with policy makers and practitioners in social policy mainly at the provincial level and second a national representative opinion survey on the views and perceptions of the population regarding social policy and income support programs in particular *On the*

Financial Sustainability of Earnings-related Pension Schemes with "pay-as-you-go" Financing and the Role of Government Indexed Bonds David A. Robalino, András Bodor, 2006 In this paper the authors reconsider the idea of an earnings related pension system with reserves invested in indexed government bonds as a mechanism to both ensure financial sustainability and improve security They start by reviewing the characterization of the sustainable rate of return of an earnings related pension system with pay as you go financing The authors show that current proxies for the sustainable rate including the Swedish gyroscope are not stable and propose an alternative measure that depends on the growth of the buffer stock and the pay as you go asset Using a simple one sector macroeconomic model that embeds a notional account pension system they then show how GDP indexed government bonds if combined with the right measure for the sustainable rate of return on contributions could be used to generate a sustainable and secure earnings related pension system without becoming a fiscal burden The proposal is particularly attractive for countries considering reforms to earnings related systems that have accumulated a large implicit pension debt In this case the government bonds allow the financing of this debt in a transparent way The proposed mechanism can also facilitate the transition to a fully funded pension system when the government bonds are allowed to be traded World Bank web site
