human institutions tends to change as ways of thinking go in and out of fashion Normative political social psychological and legal ideas concerning punishment have changed drastically over time and especially in recent decades Why Punish How Much collects essays from classical philosophers and contemporary theorists to examine these shifts Michael Tonry has gathered a comprehensive set of readings ranging from Kant Hegel and Bentham to recent writings on developments in the behavioral and medical sciences Together they cover foundations of punishment theory such as consequentialism retributivism and functionalism new approaches like restorative communitarian and therapeutic justice and mixed approaches that attempt to link theory and policy This volume includes an accessible introduction that chronicles the development of punishment systems and theorizing over the course of the last two centuries Why Punish How Much provides a fresh and comprehensive approach to thinking about punishment and sentencing for a broad range of law sociology philosophy and criminology courses

Economic Information, Decision, and Prediction M. Marschak, 2012-12-06 The papers of Jacob Marschak which follow in these volumes are an extraordinary combination of original and fruitful departures in economic and social thought superb clarity of exposition and sensitivity to the values of earlier work and even competing traditions They make us marvel alike at their variety their quantity and their quality But they do not even so fully reflect Marschak's contributions to the development of social science He has had an unusual influence as one who exercises leadership In a formal organizational sense this role has been manifest in his capacity as Director of the Cowles Commission for Research in Economics then at the University of Chicago in that organization's most productive and influential period and later in his central role in the Western Management Science Institute at the University of California at Los Angeles I can speak from first hand knowledge about the first His special capacities are first the recognition of promising new concepts and of promising young scholars and second getting his colleagues to join him in developing the ideas and involving them fully in the necessary tasks There was an unusual combination of strength and humility in his methods a display of force in pushing the work along but a willingness almost an insistence on treating even the most junior associate as a fully equal colleague in intellectual development whose criticism of himself was to be encouraged His leadership has been exercised in the absence of formal positions

Brian Barry, Russell Hardin, 1982-04 The Prisoner's Dilemma and Kenneth Arrow's General Possibility Theorem are two of the most simple yet far reaching concepts in social science The first captures in an easily understood paradox how individually rational acts that benefit individual people can combine to produce a result that is of less benefit to everyone The Arrow Theorem shows that there is no formula for ranking the preferences of many people into a rational aggregate This book is a collection of the best work done on these two ideas It is an ideal introduction for students or sourcebook for professionals it presents the traditional works addressing the problems of rationality in social and political theory the anthology represents a much needed
