Democratic contrivances are quarantine measures against that ancient plague, the lust for power: as such, they are very necessary and very boring. *Friedrich Nietzsche*

Aalborg as Metaphor

The Aalborg Project may be interpreted as a metaphor of modern politics, modern administration and planning, and of modernity itself. The basic idea of the project was comprehensive, coherent, and innovative, and it was based on rational and democratic argument. During implementation, however, when idea met reality, the play of Machiavellian princes, Nietzschean will to power, and Foucauldian rationality-as-rationalization resulted in the fragmentation of the project. It disintegrated into a large number of disjointed subprojects, many of which had unintended, unanticipated, and undemocratic consequences. The grand, unifying, and prize-winning policy and plan degenerated into [a] string of petty incidents. . . . Planners, administrators, and politicians thought that if they believed in their project hard enough, rationality would emerge victorious; they were wrong. The Aalborg Project, designed to substantially restructure and democratically improve the downtown environment, was transformed by power and *Realrationalität* into environmental degradation and social distortion. Institutions that were supposed to represent what they themselves call the "public interest" were revealed to be deeply embedded in the hidden exercise of power and the protection of special interests. This is the story of modernity and democracy in practice, a story repeated all too often for comfort for a democrat. The problems with the Aalborg Project do not derive from Aalborg being especially plagued by corrupt policies or incompetent planning and administration.

Rationality And Power Democracy In Practice:

Rationality and Power Bent Flyvbjerg, 1998-02-28 In the Enlightenment tradition rationality is considered well defined However the author of this study argues that rationality is context dependent and that the crucial context is determined by decision makers political power He uses a real world Danish project to illustrate this theory **Rationality and Power** Bent Flyvbjerg, 1998-02-28 It s like the story of Little Town an influential actor says in *Rationality and Power* when choosing a metaphor to describe how he manipulated rationality to gain power The bell ringer has to set the church clock So he calls the telephone exchange and asks what time it is and the telephone operator looks out the window towards the church clock and says It s five o clock Good says the bell ringer then my clock is correct In the Enlightenment tradition rationality is considered well defined independent of context we know what rationality is and its meaning is constant across time and space Bent Flyvbjerg shows that rationality is context dependent and that the crucial context is determined by decision makers power Power blurs the dividing line between rationality and rationalization The result is a rationality that is often as imaginary as the time in Little Town yet with very real social and environmental consequences Flyvbjerg takes us behind the scenes to uncover the real politics and real rationality of policy making administration and planning in an internationally acclaimed project for environmental improvement auto traffic reduction land use and urban renewal The action takes place in the Danish city of Aalborg but it could be anywhere Aalborg is to Flyvbjerg what Florence was to Machiavelli a laboratory for understanding power and what it means for our more general concerns of social and political organization Policy making administration and planning are examined in ways that allow a rare in depth understanding The reader is a firsthand witness to the classic endless drama that defines what democracy and modernity are and what they can be The result is a fascinating narrative that is both concrete and general current and timeless Drawing on the ideas of Machiavelli Nietzsche Foucault and Habermas Flyvbjerg reads the Aalborg case as a metaphor of modernity and of modern politics administration and planning Flyvbjerg uncovers the interplay of power and rationality that distorts policy deliberation He demonstrates that modern rationality is but an ideal when confronted with the real rationalities involved in decision making by central actors in government economy and civil society Flyvbjerg then elaborates on how this problem can be dealt with so that more fruitful deliberation and action can occur If the new millennium marks a recurrence of the real Flyvbjerg s *Rationality and Power* epitomizes this development setting new standards for social and political inquiry Richly informed powerfully argued and clearly written this is a book that no one trying to understand policy making administration and planning can afford to overlook Flyvbjerg employs a wide ranging intellect an enthusiastic and persuasive voice academic rigor and great discipline to distill years of research into an outstanding and accessible 250 page civics lesson It begs for a readership outside academic and professional circles *Rationality and Power* s value is undeniable as a handbook and forensic tool for anyone seeking a better understanding of and access to the democratic process Arkansas Democrat Gazette It makes an extremely

strong and to the reviewer's mind incontrovertible argument for placing the analysis of planning within the context of power relations. As a result it will also make a significant mark on the development of planning theory. *Geographical Journal* A book that is to be recommended doubly first to all those engaged in planning and implementation in a democratic context and also to all those interested in empirical power research. *Rationality and Power* is rewarding even enthralling reading, a seminal contribution to its field. *European Societies* This book is a must for anyone interested in how planning works, a reality shock, excellent and illuminating. *International Planning Studies* **Rationality and Power**, 1998 Values, Rationality, and Power: Developing Organizational Wisdom Brad C. Anderson, 2019-10-21 This book presents an analysis of organizational wisdom via an embedded single case study of a group's attempt to develop and spread a medical innovation within a Canadian healthcare authority. By offering a unique insight into how values, rationality and power interact in a real social setting, the book explores how they create positive change. **Elgar Encyclopedia in Urban and Regional Planning and Design** Kristof Van Assche, Raoul Beunen, Martijn Duineveld, 2023-12-11 This ground-breaking Encyclopedia provides a nuanced overview of the key concepts of urban and regional planning and design. Embracing a broad understanding of planning and design within and beyond the professions, it examines what planners and designers can do in and for a community. The Democratic Plan: Analysis and Diagnosis Alan March, 2016-03-16 Despite ongoing technical and professional advances, urban and regional planning is often far less effective than we might hope. Conflicting approaches and variable governmental settings have undermined planning's legitimacy and allowed its goals to be eroded and co-opted in the face of mounting challenges. Deeper organising principles for self-understanding, action and productive critique are lacking. This book takes steps toward resolving these problems by providing a clear theoretical position to practically examine urban planning systems within democratic governance settings: the basis of planning's legitimacy and action. Joining practical planning with political science perspectives and the work of critical theorists such as Jürgen Habermas, it directly examines urban planning as a process of governance. The dilemmas inherent to democracy are used as key organising principles and challenges for planning. Collective knowledge development and steering processes are examined as the core purposes of urban planning. Communicative planning's grounding in the work of Habermas is revisited to develop practical ways of examining overall planning systems. This theoretical approach can be adapted to a range of planning systems and settings beyond those examined in the book, such as corporate or political realms. It is one of only a few analyses that bring together theoretical understandings and grounded and practical analyses of an Australian planning system. Conceptual and highly practical explanations of how and why the Victorian system does and doesn't work are revealed. The book demonstrates how specific place-based understandings and meaningful comparison between planning systems can be made using critical theory to suggest positive change. Planning in a Global Era Andy Thornley, 2017-03-02 Globalization was the buzzword of the last decade Advances in communication technology computing and air travel have all contributed to the establishment of what has been referred to as a network society that encompasses the globe Such arguments clearly have a significance on planning an activity which has been concerned with controlling and shaping the use of space This volume brings together contributions from across the world in order to address some of the questions that arise from such global changes The opening section addresses the globalization debate directly raising some theoretical issues and exploring the planning implications across a range of world cities This is followed by an exploration of the way the theoretical debate about planning may need to advance to encompass contemporary forces A number of more specific accounts addressing the need for

New Labour and Planning Phil Allmendinger, 2011-01-17 Following the Thatcher and Major administrations there was an apparent renaissance of planning under New Labour After a slow start in which Labour's view of planning owed more to a neo liberal rolled back state model reminiscent of the New Right the Government began to appreciate that many of its wider objectives including economic development climate change democratic renewal social justice and housing affordability intersected with and were critically dependent upon the planning system A wide range of initiatives management processes governance vehicles and policy documents emanated from Government Planning like other areas of the public sector was to be reformed and modernised as well as given a prime role in tackling national high profile priorities such as increasing housing supply and improving economic competitiveness Drawing upon an institutionalist framework the book also seeks to understand how and in what circumstances change emerges either in an evolutionary or punctuated way It will for the first time chart and explore the changing nature of development and planning over the Labour era whilst also stepping back and reflecting upon what such changes mean for planning generally and the likely future trajectories of reform and spatial governance

Cities to be Tamed? Spatial Investigations across the Urban South Beatrice De Carli, Francesco Chiodelli, Maddalena Falletti, 2014-07-08 Across the global

South the rapid urbanisation and uneven development that have occurred over the past few decades have brought to the surface a tight connection between social conflicts and urban space. Indeed the physical conformation of urban space is one of the primary factors that trigger social tensions with repercussions at the metropolitan regional and national scales. Such tensions are related to the conditions of social and spatial inequality which characterise many urban areas across the South; they can also be connected to contingent political and institutional orders which find in the materiality of space both the means and the cause of conflicts among different groups amidst diverging territorial demands and the overlapping of competing struggles for power. At the same time new possibilities arise in the concreteness of space including innovative forms of local activism adapting strategies of self organisation and unconventional relations between the formal and the informal city. On acknowledging the multifaceted nature of the urban space there arises a question which constitutes the core problem addressed by the book: are cities to be tamed? This volume gathers a series of cross disciplinary contributions on these topics spanning from architecture and urban design to planning, social theory and geography. These contributions revolve around two core themes. The first concerns the agency of design in contexts of informality and centres on the missing unexpected pursued exchange between projects and realities. The second concerns the complex relationship between spatial planning, politics and conflicts in contexts characterised by marked ethnic, political and social tensions.
