**Talking Point** Thomas R. Flanagan,Alexander N. Christakis,2010-01-01 A Collaborative Project of the Institute for 21st Century Agoras The Talking Point is all about how people learn within groups People can be much smarter than crowds if you

measure smart as decision making speed Crowds can be much wiser than individuals if you measure wisdom by depth of understanding It is possible to understand a great deal of information yet or maybe because of this you can also be slow to make decisions If rushed crowds will make poor decisions in spite of their wisdom So to get good group decisions on a time scale that will keep pace with policy development needs and social necessities groups have to be supported so that their decision making process can be accelerated Much has been said and written about this problem over the years It is dangerous to have the power of groups without the wisdom of groups and it is tragic to have the wisdom of groups without the power of groups The Talking Point presents a meeting point for the wisdom and power of groups through the use of Structured Dialogic Design With hopeful intentions as a culture we have poisoned the well just when we need it most We have touted design charrettes and stakeholder processes as engagement vehicles and then ignored marginalized or corrupted the very input that we swore to hold as sacred This has created a myth that large scale collaboration is not possible and the myth has led to considerable disillusionment among would be participants and could be sponsors Structured Dialogic Design seeks to bust the myth about our limited capabilities to sustain boundary spanning collaboration To bust this myth Structured Dialogic Design needs to usher in a new wave of collaborative planning Scholars have identified the Structured Dialogic Design methodology as the cutting edge of third phase science where the reality of a situation embraces interactions between objective findings and subjective intentions The Talking Point provides a window for observing how Structured Dialogic Design has been put into practice and paints a panorama of the issues that confront complex social system design This book is itself a bridge between scholarship and practice written to be accessible yet anchored to major themes in cognitive psychology information systems social systems and models of group learning The book is an invitation for transformational leaders and those who support transformational leaders to pick up a new tool in the essential quest to put our nation and our world back on track toward sustainable futures The Talking Point is a fresh source of water in a world that is thirsty for new ways of solving complex problems

**The God Effect is Real** Sujith Ittan, 2025-07-14 Something is really wrong with our reality It appears that our minds are being manipulated Synchronicities and the collective unconscious are clues about the mind manipulation mechanism This mechanism is the God effect according to the author The God effect implies that there is an intelligent entity controlling our minds Who is this intelligent entity manipulating our minds A God must be responsible for the God effect How exactly is this God manipulating our minds in this reality that is based on the principles of materialism that we know so well through our sciences We are unable to account for the God effect within the paradigm of materialism Are we in a reality based on idealism where consciousness is fundamental and an intelligent God exists in this context Or are we living inside a computer simulation What is the nature of our minds In order to account for God we have to question our understanding of our reality and we have to ask if we are truly in control of our minds thoughts and actions This is a gist of the God mind and reality problem that the author tries to discuss in this book In his first book the

author wondered if a simulation accounts for the God effect In this book he wonders if idealism with consciousness first principles and an intelligent God solves the problem
