Seaborn,2012-12-06 For the last eighteen years I have been teaching an introductory course in as trophysics The course is intended for nonscience majors satisfying a general education requirement in natural science It is a physics course with applications in astronomy The only prerequisite is the high school mathematics required for ad mission to the university For a number of years I used an astronomy text which I supplemented with lecture notes on physics There are many good astronomy texts available but this was not a satisfactory state of affairs since the course is a physics course The students needed a physics text that focused on astronomical applications Over the last few years I have developed a text which my students have been using in manuscript form in this course This book is an outgrowth of that effort The purpose of the book is to develop the physics that describes the behavior of matter here on the earth and use it to try to understand the things that are seen in the heavens Following a brief discussion of the history of astronomy from the Greeks through the Copernican

Revolution we begin to develop the physics needed to understand three important problems at a level accessible to undergraduate nonscience majors 1 the solar system 2 the structure and evolution of stars and 3 the early universe All of these are related to the fundamental problem of how matter and energy behave in space and time **The Copernican Revolution** Thomas S. Kuhn, 1957 An account of the Copernican Revolution focusing on the significance of the plurality of the revolution which encompassed not only mathematical astronomy but also conceptual changes in cosmology physics philosophy and religion *Night Has a Thousand Eyes* Arthur R. Upgren, 2013-12-11 **Tombs of the Gods** Kyle Weyburne, 2023-07-06 We've completely misunderstood the purpose of the pyramids They weren't built primarily as tombs instead they were intended to be used by Pharaoh while he was still alive In very ancient times the king was only allowed to rule for 30 years then he'd be ritually killed They didn't want an old man in charge One day a Pharaoh was nearing his 30th year and decided he didn't want to die so came up with a set of rituals that would enable him to live on It was called Heb Sed This sacred ceremony was more than just a life saver though it also enabled the king to merge with the Sun god After death Egyptian kings were believed to board the Sun boat where they would shine down on their subjects for all eternity However many things could go awry in this process particularly under the eyes of a successor What if they bungled the funeral What if they were a rival Heb Sed enabled all this to occur while the king was still alive so that he could preside over proceedings ensuring its success And the bonus of being able to do this while alive is that some part of the Pharaoh would board the Sun boat and in doing so the king would become a divinity the Pharaoh became a living God king But all this could only happen if they built a strange pyramid shaped structure to enable this potent magic to take place So they built pyramids And they got bigger and more magnificent with the passing of each King This madness came to a head with Pharaoh Snefru who built two massive pyramids the two biggest man made structures in the World How do you outdo this While his son Khufu only managed to build one pyramid it was the most impressive structure ever built by humans Still is in my book And yes it might have functioned as his tomb although Strabo and Diodorus swear black and blue that it wasn't however it was entirely geared to the Sun god as you will find out it was entirely geared for the King's Heb Sed This book is the sequel to *Architecture of Ra* but can be read independently of it It also delves into the myths of Egypt as well as those of other cultures Jason the Argonauts Icarus Jonah Thor Hercules I don't like calling these stories myths because they actually belonged to living religions and to make that grade the stories had to include information seminal to that culture And if the texts contain this knowledge then so did their religious buildings The knowledge encoded in Egyptian legends is also encoded in their pyramids
