Reaching and Other Sculptures:

Reaching and Teaching Students with Special Needs Through Art Beverly Levett Gerber, Doris M. Guay, Jane Burnette, 2024-09-30 This second edition of *Reaching and Teaching Students with Special Needs Through Art* is written for art educators, special educators, and those who value the arts for students with special needs. It builds on teachers' positive responses to the first edition and now combines over 700 years of the educational experience of arts and special educators who share their art lessons, behavior management strategies, and classroom stories. The revised second edition provides updated chapters addressing students with emotional, behavioral, disabilities, learning disabilities, intellectual disabilities, physical disabilities, and visual and hearing impairments. The newly revised second edition includes chapters on students with autism spectrum disorder, preschool students, and students experiencing trauma. All chapters have been updated to include current definitions and language, recommended teaching strategies, art lesson adaptations, behavior management strategies, and references to related chapters. Follow-up activities are provided for further insights into each group of students. A new summary chapter connects how the authors' collaborations resulted in changes to two professional organizations. Since the first edition, many of the featured authors established the new Division of Visual and Performing Arts Education (DARTS) at the Council for Exceptional Children (CEC) and earlier formed a new National Art Education Association (NAEA) Interest group, Special Needs in Art Education (SNAE), now Arts in Special Education (ASE). This edition is ideal for preservice arts methods courses and education courses on accessibility and inclusion at the undergraduate and graduate levels. It continues to offer current yet proven best practices for reaching and teaching this ever-important population of students through the arts. **A**

Guide to Mexican Art Justino Fernández, 1969-08-15 *A Guide to Mexican Art*, a survey of more than twenty centuries of art, has a double purpose. It provides an ample version of one of the great national arts by a leading art historian, and it serves simultaneously as a practical guide to the art's outstanding masterpieces. The Guide will thus be of value to specialists and students of Latin American art and to sightseers as an introduction and guide to the art and architecture of Mexico. To facilitate its use for the latter purpose, Professor Fernández has based his exposition on the sensitive analysis of works to be found almost exclusively in museums and public buildings accessible to the tourist. The book was originally published in Spanish in 1958 and revised in 1961. This English translation from the second edition has been brought up to date by the author and translator.

Understanding Art Education through the Lens of Threshold Concepts Matthew Ravenstahl, 2021-12-13 This is an important book on the value of art education and the nature of having the affective dimension at the core of the visual art learning environment. The case studies are powerful and varied, providing an unapologetic view of the transformative impact such learning environments can have upon students and the epistemic value of engagement in the visual arts. Moreover, the case studies speak to an emotional level of the reader. The author provides a digestible theoretical support for understanding the journey these students have undergone, which can empower educators to
