Reading And The Reference Librarian The Importance To Library Service Of Staff Reading Habits:

Reading and the Reference Librarian Juris Dilevko, Lisa Gottlieb, 2014-10-16 Reference librarians are no longer expected to know much about the information they find they are merely expected to find it Technological competency rather than knowledge has become the order of the day In many respects reference service has become a matter of typing search terms into a library's online catalog or a web search engine and providing the patron with the results of the search Calling for a re intellectualization of reference librarianship this book suggests another approach to providing quality reference service reading The authors surveyed both academic reference librarians and public library reference personnel in the United States and Canada about their reading habits From the 950 responses the authors present findings about the extent to which librarians read newspapers periodicals fiction and nonfiction and recount and analyze stories about how reading has made them better librarians The authors also report that North American professors in the humanities and social sciences believe that the best reference librarians are those who have wide ranging subject based knowledge as opposed to the type of process based functional knowledge that is increasingly dominating the curricula of many Library and Information Science programs

Contemporary World Fiction Juris Dilevko, Keren Dali, Glenda Garbutt, 2011-03-17 This much needed guide to translated literature offers readers the opportunity to hear from learn about and perhaps better understand our shrinking world from the perspective of insiders from many cultures and traditions In a globalized world knowledge about non North American societies and cultures is a must *Contemporary World Fiction A Guide to Literature in Translation* provides an overview of the tremendous range and scope of translated world fiction available in English In so doing it will help readers get a sense of the vast world beyond North America that is conveyed by fiction titles from dozens of countries and language traditions Within the guide approximately 1 000 contemporary non English language fiction titles are fully annotated and thousands of others are listed Organization is primarily by language as language often reflects cultural cohesion better than national borders or geographies but also by country and culture In addition to contemporary titles each chapter features a brief overview of earlier translated fiction from the group The guide also provides in depth bibliographic essays for each chapter that will enable librarians and library users to further explore the literature of numerous languages and cultural traditions

Readers' Advisory Service in North American Public Libraries, 1870-2005 Juris Dilevko, Candice F.C. Magowan, 2007-02-13 Beginning in the early 1980s readers advisory services were a widely discussed topic in North American public libraries By 2005 almost every public library in the United States and Canada offered some form of readers advisory service The services offered have changed significantly in ways perhaps disadvantageous to adult North American library patrons This book provides a critical history of readers advisory philosophy and offers a new perspective on the evolution of the service The book analyzes the debate that shaped readers advisory and discusses how the service has assumed its present form The study follows readers advisory through its three prominent stages of development beginning

with the period 1870 to 1916 when the service was still a subject of much crucial debate about its meaning and purpose During the second phase 1917 to 1962 readers advisory systematically committed itself to meaningful adult education through serious and purposeful reading The book argues however that during the most recent phase of readers advisory from 1963 until the present contemporary public libraries have turned their backs on the rich heritage of readers advisory services by valorizing the reading of entertainment oriented and commodified genre titles and bestsellers Historical analysis case studies and statistical charts augment the book s central argument The Politics of Professionalism Juris Dilevko,2009 An alternative proposal for the education of librarians emphasizing general knowledge and intellectual rigor and discouraging careerism Provided by publisher Border Crossings Yves Gambier,Luc van Doorslaer,2016-09-14 For decades Translation Studies has been perceived not merely as a discipline but rather as an interdiscipline a trans disciplinary field operating across a number of boundaries This has implied and still implies a considerable amount of interaction with other disciplines There is often much more awareness of and attention to translation and Translation Studies than many translation scholars are aware of This volume crosses the boundaries to other disciplines and explicitly sets up dialogic formats every chapter is co authored both by a specialist from Translation Studies and a scholar from another discipline with a special interest in translation Sixteen disciplinary dialogues about and around translation are the result sometimes with expected partners such as scholars from Computational Linguistics History and Comparative Literature but sometimes also with less expected interlocutors such as scholars from Biosemiotics Game Localization Research and Gender Studies The volume not only challenges the boundaries of Translation Studies but also raises issues such as the institutional division of disciplines the cross fertilization of a given field the trends and turns within an interdiscipline **Graffiti Art Styles** Lisa Gottlieb,2014-01-10 This book presents a classification system for graffiti art styles that reflects the expertise of graffiti writers and the work of art historian Erwin Panofsky Based on Panofsky s theories of iconographical analysis the classification model is designed to identify the style of a graffiti art piece through its visual characteristics Tested by image cataloguers in archives libraries and museums the system assists information professionals in identifying the iconic styles of graffiti art pieces It also demonstrates the power of Panofsky s theories to provide access to non representational or abstract art images The result is a new paradigm for Panofsky s theories that challenges the assumptions of traditional models This innovative book is a valuable resource for anyone who wants to learn more about graffiti art and for information professionals concerned with both the practical and intellectual issues surrounding image access **INFORMATION SOURCES, SERVICES AND SYSTEMS** GURDEV SINGH,2013-01-10 Reference and information services are considered an important activity of a modern library This comprehensive and student friendly book discusses in detail different types of information and reference sources and services such as encyclopaedias directories yearbooks dictionaries geographical sources biographical sources statistical sources and handbooks The book is organised into four parts Part I deals with various

types of information sources such as documentary and non documentary sources Part II discusses different types of reference services organisation of reference section and the role of the librarian in the digital age Part III describes the wide range of information service such as Current Awareness Service CAS and Selective Dissemination of Information SDI Part IV provides an overview of important information systems such as National Information System for Science and Technology NISSAT and International System for Agricultural Science and Technology AGRIS The book is intended for the undergraduate and postgraduate students of library science Besides it will also be very useful for librarians information scientists and information professionals

Salient Features Deals with both theoretical and practical aspects of information sources and services Discusses various types of information sources and services keeping in view the latest trends and developments in the field Presents the concepts related to information sources and services in a systematic and accessible way
