Author's Purpose

Students identify the author's reasons for writing about a subject.

Prediction

Students practice using clues from the text to predict what will happen next in the passage.

Review the common reasons that authors write: for entertainment, to inform, to teach, and to persuade.
Say: **Thinking about an author's reason for writing a passage can help us better understand what we read.** Inform students that they are going to read a passage about a camera that was invented in 1982, called the Holga. If possible, show students pictures of different kinds of cameras, including the Holga, and make sure students know the difference between film and digital cameras. Then remind students of the Ask Questions strategy (Week 16). Explain: As you read, you can ask yourself questions to analyze the devices that the author made in writing the text. Read aloud the title of the passage to analyze the devices that the author made in writing the text. READ THE PASSAGE

Use your own knowledge and clues from the text to make predictions about the first dog in space.

The First Dog in Space

In October 1957, Russia launched the first man-made satellite, called Sputnik, into orbit. Russian scientists immediately began working on new experiments in space. They wanted to see if living dogs could exist in the weightlessness of space and survive outside Earth's atmosphere. Russian scientists decided to use a dog to test the effects of space conditions. They collected several stray dogs from the streets of Moscow for the experiment. After a series of tests, one dog proved to be the best candidate. She was named Laika or "little curly." Americans called her "Muttnik"—the Sputnik mutt.

Laika blasted off aboard Sputnik 2 on November 3, 1957. She survived the launch and orbited Earth four times, managing the weightlessness of space. Sadly, the spacecraft could not be brought back to Earth, and Laika died in space. This sparked discussion around the world about animal rights. Today, Laika is honored alongside the human cosmonauts of Russia's space program. A monument was placed at a research facility in Moscow in 2008. Although Sputnik 2 was her one and only flight, Laika is remembered as a space pioneer.

SKILL PRACTICE
