The parallel thinking strategy allows children to use the worksheet as a **participation piece** when the Global Statement and the Indicators represent the facts with the child's behaviours and beliefs. Children need not display all key indicators to be related to a piece. The document acts as the teacher's assessment document.

**Abstract** The authors examined the effects of a 12-week, 100% body weight (BW) resistance training program on the body composition and muscle strength of 10 sedentary, middle-aged men. The men were randomly assigned to either a control group (CON) or a resistance training group (RT). The RT group performed a 12-week, 100% BW resistance training program, while the CON group remained sedentary. The RT group showed significant increases in muscle strength and body composition, while the CON group showed no significant changes. The results suggest that a 12-week, 100% BW resistance training program can improve muscle strength and body composition in sedentary, middle-aged men.

As the authors explain, research on American legal ethics and professionalism in the 1990s was reacting to a crisis which was the subject of chapters 4 and 5. Chapters 6 and 7, however, are attempting to reflect on these more strategically, to go beyond reacting and self-protection. These chapters, however, are not necessarily done.
