The Everyday Atlantic Tania Gentic, 2013-12-02 In *The Everyday Atlantic* Tania Gentic offers a new understanding of the ways in which individuals and communities perceive themselves in the twentieth century Atlantic world. She grounds her study in first time comparative readings of daily newspaper texts written in Spanish Portuguese and Catalan. Known as chronicles these everyday literary writings are a precursor to the blog and reveal the ephemerality of identity as it is represented and received daily. Throughout the text Gentic offers fresh readings of well known and lesser known chroniclers cronistas including Eugeni d'Ors Catalonia Germany Arciniegas Colombia Clarice Lispector Brazil Carlos Monsivís Mexico and Brazilian blogger Ricardo Noblat. While previous approaches to the Atlantic have focused on geographical crossings by subjects Gentic highlights the everyday moments of reading and thought in which discourses of nation postcolonialism and globalization come into conflict. Critics have often evaluated in isolation how ideology ethics affect and the body inform identity however Gentic skillfully combines these approaches to demonstrate how the chronicle exposes everyday representations of self and community.

Re-Defining Legitimate Statehood Obiora Chinedu Okafor, 2021-10-18 The purpose of this volume is dual. The first is to provide information about the question of the role that doctrines and practices of international law have played in the emergence and persistence of the phenomenon of socio cultural fragmentation and therefore of inter group conflict within African states. The second is to provide original thought about the ways in which prompted by the emergent turn in our time to minority and group rights international law and multilateral African states have begun the long journey toward modifying those doctrines and practices that have led to such unfortunate results and have thereby begun to make very valuable contributions to the effort to prevent and or reduce the incidence of inter group strife in specific African contexts. The book is not however limited in scope by its utilisation of Africa as a case study. The book's core is based on analysis of traditional and contemporary international legal doctrines and practices their effects in specific contexts as well as on the role of multilateral institutions in the prevention of internecine conflict within established states. It is hoped that with the use of African states as case studies the book will be a contribution to the advancement of scholarly knowledge regarding the general question of the relationship among the doctrines of international law the activities of multilateral institutions and the management of the problems of fragmentation and internecine strife within established states the world over. This volume is relevant to international lawyers specialists in international politics diplomats theorists minority and group rights scholars historians and human rights

activists in general It is particularly relevant to the African studies specialist the statesman and the diplomat **The Routledge Handbook of Philosophy of Memory** Sven Bernecker, Kourken Michaelian, 2017-07-14 Memory occupies a fundamental place in philosophy playing a central role not only in the history of philosophy but also in philosophy of mind epistemology and ethics Yet the philosophy of memory has only recently emerged as an area of study and research in its own right The Routledge Handbook of Philosophy of Memory is an outstanding reference source on the key topics problems and debates in this exciting area and is the first philosophical collection of its kind The forty eight chapters are written by an international team of contributors and divided into nine parts The nature of memory The metaphysics of memory Memory mind and meaning Memory and the self Memory and time The social dimension of memory The epistemology of memory Memory and morality History of philosophy of memory Within these sections central topics and problems are examined including truth consciousness imagination emotion self knowledge narrative personal identity time collective and social memory internalism and externalism and the ethics of memory The final part examines figures in the history of philosophy including Aristotle Augustine Freud Bergson Wittgenstein and Heidegger as well as perspectives on memory in Indian and Chinese philosophy Essential reading for students and researchers in philosophy particularly philosophy of mind and psychology the Handbook will also be of interest to those in related fields such as psychology and anthropology The Essence of History Aaron Turner, 2025-09-25 This book brings together historical thinkers from diverse disciplinary backgrounds to offer original interpretations of the essence of history It addresses why the essence of history itself cannot be so easily thematised or conceptualised Restating the question of the essence of history is necessary as it has been largely forgotten today Since antiquity history has been inextricably bound up with the problem of truth Contemporary philosophy of history and historiography have branched out in many different directions This complexity has made it nearly impossible for historical thinkers to engage outside of their own field The relentless advancement of historical thought has almost completely neglected the question of the essence of history The chapters in this volume respond to questions such as What is history What in the progress of historical thought from antiquity to modernity did we lose along the way And what does it mean if it means anything at all to have history to be historical The Essence of History will be of interest to scholars and graduate students working in philosophy of history historical theory and historiography and ancient history Epistemology Michael Huemer, 2002 This comprehensive anthology draws together classic and contemporary readings by leading philosophers on epistemology Ideal for any philosophy student it will prove essential reading for epistemology courses and is designed to complement Robert Audi's textbook Epistemology A Contemporary Introduction Routledge 1998 Themes covered include perception memory inductive inference reason and the a priori the architecture of knowledge skepticism the analysis of knowledge testimony Each section begins with an introductory essay guiding students into the topic Includes articles by Russell Hume Berkeley Malcolm Quine Carnap J L Austin Pollock Nozick Putnam G E Moore Huemer Reid Plato Bonjour
