Carbon Technocracy Victor Seow, 2022-04-08 A forceful reckoning with the relationship between energy and power through the history of what was once East Asia's largest coal mine The coal mining town of Fushun in China's Northeast is home to a monstrous open pit First excavated in the early twentieth century this pit grew like a

widening maw over the ensuing decades as various Chinese and Japanese states endeavored to unearth Fushun s purportedly inexhaustible carbon resources Today the depleted mine that remains is a wondrous and terrifying monument to fantasies of a fossil fueled future and the technologies mobilized in attempts to turn those developmentalist dreams into reality In Carbon Technocracy Victor Seow uses the remarkable story of the Fushun colliery to chart how the fossil fuel economy emerged in tandem with the rise of the modern technocratic state Taking coal as an essential feedstock of national wealth and power Chinese and Japanese bureaucrats engineers and industrialists deployed new technologies like open pit mining and hydraulic stowage in pursuit of intensive energy extraction But as much as these mine operators idealized the might of fossil fuel driven machines their extractive efforts nevertheless relied heavily on the human labor that those devices were expected to displace Under the carbon energy regime countless workers here and elsewhere would be subjected to invasive techniques of labor control ever escalating output targets and the dangers of an increasingly exploited earth Although Fushun is no longer the coal capital it once was the pattern of aggressive fossil fueled development that led to its ascent endures As we confront a planetary crisis precipitated by our extravagant consumption of carbon it holds urgent lessons This is a groundbreaking exploration of how the mutual production of energy and power came to define industrial modernity and the wider world that carbon made

Emerging Issues in the Global Economy Silvia Cristina Mărginean,Claudia Ogrea,Ramona Orăștean,2018-01-11 This proceedings volume provides current research on emerging issues in business economics and finance in the global economy with particular emphasis on Eastern Europe Featuring selected papers from the 2017 International Economics Conference in Sibiu IECS organized by the Lucian Blaga University of Sibiu Romania the contributing chapters consider new business models theories practices and instruments from advanced and emerging economies in the context of recent global trends After over 20 years of increasing openness and liberation of the world economy recent events in regions such as Europe USA and Asia have created challenges to the idea of globalization and integration There is a delay between the real world economic changes and the reflection of such changes in the economic research literature The 2017 IECS conference and the enclosed papers aim to fill this gap in the study of globalization covering diverse topics such as business administration sustainability corporate social responsibility finance accounting tourism and business informatics

Peter Marber, 1998 Presenting a bold new vision of the global economy in which greater participation of developing countries means greater opportunities for for most but not all Marber reveals new sources of conflict as values clash in the game of global economic integration *Canada and the Global Economy* John N. H. Britton, 1996 An analysis of geographic trends in the Canadian economy studying patterns of development consumption shifts in employment and the locational behavior of industries The 24 essays written by Canadian economic geographers explore themes in regards to the openness of the Canadian economy its simple economic geography in regional variation of resources and urban development its rapid advances in technology and the role of government in national and international markets Canadian card order number C96 900023 5 Annotation copyright by Book News Inc Portland OR As Borders Bend Xiangming Chen, 2005 As do other

mighty forces such as wars nationalist aspirations and the shifting courses of great rivers globalization changes the world's borders by bending them out of shape and creating new transnational spaces State political boundaries no longer draw the definitive line in people's lives they once did Borders continue to contain self-described national populations and national

activities but the penetration of economic globalization via growing cross border trade investment and resurgence of myriad regional ethnic groups is pushing and stretching the limits of borders into both interactive spaces and contested terrains. Indeed new power centers with their own identities are springing out of once politically trivial and economically marginal landscapes. While the terrorist attacks of 2001 and the SARS outbreak of 2003 prompted states to tighten border controls their efforts amount to only a temporary reversal of a powerful long term trend toward more open borders and the interactive transnational spaces that openness fosters. This innovative book examines the complexities of de bordering and re bordering through a structured comparison of seven transborder subregions along the western Pacific Rim and an extended comparative analysis of the U S Mexico border and several European border regions. Xiangming Chen offers a synthetic explanation for the complex and diverse processes and outcomes of economic growth social transformation infrastructure development and urban landscapes in the new transnational spaces around the porous and mutated borders on the Pacific Rim and beyond.

Invisible Countries Joshua Keating, 2018-01-01 A thoughtful analysis of how our world's borders came to be and why we may be emerging from a lengthy period of cartographical stasis. What is a country? While certain basic criteria borders a government and recognition from other countries seem obvious, journalist Joshua Keating's book explores exceptions to these rules including self proclaimed countries such as Abkhazia, Kurdistan and Somaliland, a Mohawk reservation straddling the U S Canada border and an island nation whose very existence is threatened by climate change. Through stories about these would be countries efforts at self determination as well as their respective challenges, Keating shows that there is no universal legal authority determining what a country is. He argues that although our current world map appears fairly static, economic, cultural and environmental forces in the places he describes may spark change. Keating ably ties history to incisive and sympathetic observations drawn from his travels and personal interviews with residents, political leaders and scholars in each of these invisible countries.

The Global Economic Crisis and the Developing World Ashwini Deshpande, Keith Nurse, 2012 The world economy is currently in the throes of a global economic crisis reminiscent of the great depressions of the 1930s and the 1870s. As back then, the crisis has exposed the major structural imbalances in financial and credit markets in addition to global trade forcing many governments developed and developing to impose debilitating austerity measures that are exacerbating the structural weaknesses that caused the crisis in the first place. This volume offers historical insights into the origins of the contemporary crisis as well as detailed analyses of the financial and trade dimensions, an assessment of the technological and innovation context along with perspectives on the implications for unemployment and gender imbalances.

The Global Economy as Political Space Stephen J. Rosow, Naeem Inayatullah, Mark Rupert, 1994 Explores the social, political, philosophical and cultural dimensions of the shift from a nation state based economy to a global economy.

America's New Map Thomas P.M. Barnett, 2023-09-26 Three tectonic and inevitable shifts have left the world at a crossroads. North America is poised to either re emerge as a global leader or turn

back in time ceding power and influence to competitors The 21st century unleashed unprecedented changes across the globe to its climate to the demographic makeup of its nations and to the very nature of allegiance in the digital age With its global influence waning America must reevaluate its approach to globalization if it wishes to remain a leader In America s New Map Restoring Global Leadership in an Era of Climate Change and Demographic Collapse Thomas P M Barnett bestselling author of The Pentagon s New Map War and Peace in the Twenty First Century and acclaimed geo strategist offers seven throughlines to frame and redefine the ambitions and posture of these United States setting our Union on a bold but entirely familiar national trajectory In these pages Barnett offers a deep yet accessible dive into the three shifts that have lead us to this point As climate change ravages countries closest to the equator global dynamics are shifting from an East West emphasis to North South in the greatest geopolitical transformation our world has yet experienced and the Western Hemisphere is far better positioned to exploit this radical reorientation than the East Aging demographics worldwide favor more slowly aging nations including the US while challenging rapidly aging nations like China incentivizing countries best to delay that transition by integrating younger faster growing populations into their ranks In combination these two tectonic forces collide with a third the exploding consumption of an expanding and now majority global middle class the bulk of whom reside along the increasingly unstable North South frontier Taking every variable of these unique circumstances into account America s New Map charts a path toward a bigger and better United States We will all be living in somebody s world come mid century this book tells Americans how to make sure it is one we can recognize as our own
