The central theme of this book builds around Cities, Social Cohesion, and Governance. Based upon policy and document analysis, first-hand fieldwork, and surveys, and intensive interviews with major stakeholders responsible for pushing the Greater Bay Area development, this book offers not only regional perspectives in analyzing the Greater Bay Area development through comparing and contrasting development experiences within the country's different bay economies like the Shanghai and Zhejiang Bay Area and Beijing and Bohai Bay Area. The present book also draws comparative and international insights from other well-established bay economies like Tokyo Bay, Florida Bay, and New York Bay Areas when analyzing the development in the GBA in China.

### **On Xi Jinping** Kevin Rudd,2024-09-17 An

authoritative account of Xi Jinping s worldview and how it drives Chinese behaviour both domestically and on the world stage In his new book On Xi Jinping former Australian Prime Minister Kevin Rudd provides an authoritative account of the ideological worldview driving Chinese behaviour both domestically and on the world stage that of President Xi Jinping who now hold near total control over the Chinese Communist Party and is now in effect president for life Rudd argues that Xi s worldview differs significantly from those of the leaders who preceded him and that this ideological shift is reflected in the real world of Chinese policy and behaviour Focusing on China s domestic politics political economy and foreign policy Rudd characterises Xi Jinping s ideological framing of the world as Marxist Leninist nationalism According to Rudd Xi s notion of Leninism has taken the party and Chinese politics further to the left in comparison to his predecessors Also his Marxism has also taken Chinese economic thinking to the left in a more decisively more statist direction and away from the historical dynamism of the private sector However Chinese nationalism under Xi has moved further to the right towards a much harder edged foreign policy vision of China and a new determination to change the international status quo Xi s worldview is an integrated one where his national ideological vision for China s future is ultimately inseparable from his view on China s

position in the region and the world These changes in worldview are also reflected in Xi's broader rehabilitation of the concept of struggle as a legitimate concept for the conduct of both Chinese domestic and foreign policy a struggle that need not necessarily always be peaceful Finally Xi's ideological worldview also exhibits a new level of nationalist self confidence about China's future derived from China's historical and civilizational strengths but reinforced by his Marxist Leninist concept of historical determinism and the belief that the tides of history are now on firmly China's side A powerful analysis of the worldview of arguably the most consequential world leader of our era this will be essential reading for anyone interested in how Xi is transforming both China and the international order and most importantly why
