carefully crafted backpacking trips to some of the most magnificent landscapes in Idaho. A virtually undiscovered backpacking paradise, Idaho has numerous wilderness areas of vast size. Backpackers can find complete solitude, glimpse wildlife, and explore some of North America's most amazing scenery. The state's mountains boast great weather, fewer thunderstorms than the central Rockies, less rain than Oregon and Washington, and cooler summer temperatures than California. Backpacking Idaho guides you to what author Doug Lorain calls a Shangri-la for backpackers. In the craggy Selkirk Mountains, you'll find lush forests, small cirque lakes, and jagged granite peaks. Watch for ospreys, river otters, and belted kingfishers near the swift Selway River. Explore hundreds of miles of trails in the gently rolling forested hills of north central Idaho, and head to Hell's Canyon, the deepest gorge in North America, to find both alpine tundra and cactus-studded desert. Inside, you'll find 25 top backpacking trips throughout the state, comparative ratings for scenery, solitude, and difficulty, trail mileage, elevation gain, days on the trail, and shuttle distances. Highlights, trip itineraries, and more. 12 additional recommendations for backpacking trips. As an Idaho native, I've hiked and camped here all my life, but I took away from this book some great hikes that I want to do. This is a really fine book. Craig Gehrke, Regional Director, Idaho Office of the Wilderness Society. Payette National Forest, 1988. **River of No Return wilderness proposals**, United States Congress, Senate, Committee on Energy and Natural Resources, Subcommittee on Parks, Recreation, and Renewable Resources, 1980. Recreation Guide to the North Fork Ranger District and the Salmon National Forest, Susanne Smith, 1991.

**Geology of the Pacific Northwest**, William N. Orr, Elizabeth L. Orr, 2006-12-04. The geologic history of the Pacific Northwest is as unique as the region itself. Created via tectonic plate movements and accretionary events, the original terranes were subsequently covered by sedimentary layers, ash lavas, and glacial debris. These processes begun millions of years ago continue to affect the area, as seen in the eruption of Mount St. Helens and catastrophic Japanese tsunamis created by earthquakes in the Pacific Northwest. Understanding of the region's geology has led to new insight in volcanic eruption prediction, disaster preparedness, the environmental effects of mining and urban development, as it relates to geologic hazards. The Orrs' detailed and informative writing style appeals to those with geologic training as well as beginners with an interest in the region. Each chapter covers a specific subregion, allowing for maximum flexibility both in the classroom and for the casual reader. The authors' central theme, that continental plate tectonics are the fundamental processes of Northwest geologic history, permeates throughout the book. **Draft Environmental Impact Statement for the Proposed Payette National Forest Land and Resource Management Plan**, 1985. *Indigenous Language Education in Critical Times*, Julieta Briseño-Roa, Paulina Griño, Vanessa Anthony-Stevens, José Antonio Flores Farfán, 2025-05-28. This book builds a space in which a diversity of voices, Indigenous teachers, activists, and committed academics, are foregrounded in the processes of Indigenous education, with the goal of Indigenous language reclamation. It decenters state systems of education, e.g., schooling, and instead considers the efforts of teachers, defined broadly, community activists, and scholars who are developing initiatives.

to support Indigenous language practices in around and beyond schooling thereby emphasizing diverse processes of language reclamation in complex and varied settings The authors invite the reader to reconsider language reclamation in the face of climate change and neocolonial exploitation offering a source of radical hope for the future Central to the book are narratives regarding community based collaborations which subvert the asymmetrical power relations between academia and educational practitioners and activists and call into question the categories constructed by a top down approach as well as the colonial relationships that linguistic anthropology and linguistics have constructed within the spaces and people they study
