Reflective Faculty Evaluation Enhancing Teaching And Determining Faculty Effectiveness:

Reflective Faculty Evaluation John A. Centra, 1993-11-17 John A Centra provides faculty members administrators and faculty development specialists with the up to date approaches they need to evaluate and improve teaching He underscores the importance of active methods of teaching and the need to evaluate those methods in less traditional ways He discusses the value and proper use of self reports and portfolios and examines better ways to involve colleagues in evaluating and improving teaching

Effective Teaching in Higher Education Raymond P. Perry, John C. Smart, 1997 Assists academic staff to develop their effectiveness as teachers and improve their students learning by giving practical guidelines and suggestions for teaching and a series of activities

Evaluating, Improving, and Judging Faculty Performance in Two-Year Colleges Charles Finley, Richard I. Miller, Candace S. Vancko, 2000-03-30 With nearly 48 percent of all U S undergraduates attending community and technical colleges the two year sector is an integral part of our nation s higher education system and a vital part of our nation s future The need for effective faculty evaluation and professional development within two year colleges stems partly from the size of this sector and also from the diversity of its program offerings and its student body Miller and his co authors bring timely authoritative and practical material to two audiences in this rapidly growing field of education first teachers who have permanent appointments but could use professional development and improvement and second the already large and still growing number of part time instructors who could use more evaluating and improving This book is intended to be a direct assistance for these groups as well as to administrators who must make personal decisions This professional book is for human resource managers and staff development officers of two year colleges A greater emphasis needs to be placed on human resource management according to Miller and his co authors that will result in better personnel decision making

Evaluating and Improving Undergraduate Teaching in Science, Technology, Engineering, and Mathematics National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Recognizing, Evaluating, Rewarding, and Developing Excellence in Teaching of Undergraduate Science, Mathematics, Engineering, and Technology, 2003-01-19 Economic academic and social forces are causing undergraduate schools to start a fresh examination of teaching effectiveness Administrators face the complex task of developing equitable predictable ways to evaluate encourage and reward good teaching in science math engineering and technology Evaluating and Improving Undergraduate Teaching in Science Technology Engineering and Mathematics offers a vision for systematic evaluation of teaching practices and academic programs with recommendations to the various stakeholders in higher education about how to achieve change What is good undergraduate teaching This book discusses how to evaluate undergraduate teaching of science mathematics engineering and technology and what characterizes effective teaching in these fields Why has it been difficult for colleges and universities to address the question of teaching effectiveness The committee explores the implications of differences between the research and teaching cultures and how

practices in rewarding researchers could be transferred to the teaching enterprise How should administrators approach the evaluation of individual faculty members And how should evaluation results be used The committee discusses methodologies offers practical guidelines and points out pitfalls Evaluating and Improving Undergraduate Teaching in Science Technology Engineering and Mathematics provides a blueprint for institutions ready to build effective evaluation programs for teaching in science fields

Higher Education in the United States James J. F. Forest, Kevin Kinser, 2002-06-21 Surveys the changing landscape of American higher education from academic freedom to virtual universities from campus crime to Pell Grants from the Student Privacy Act to student diversity In the years following World War II college and university enrollment doubled students revolted faculty unionized and community colleges evolved Tuition and technology soared as did the number of first generation minority and women students These changes radically transformed the American system of postsecondary education Today that system is in trouble Its aging professoriate prepares for retirement but low academic salaries can no longer attract the best minds to replace them A flood of corporate dollars funds commercial research but money for basic research the seedbed of American scientific preeminence has dried up Colleges and universities also face heated competition with for profit education providers for students faculty and external financial support along with the costs of providing remedial education to growing numbers of students who are unprepared for postsecondary education Higher Education in the United States provides a comprehensive analysis of these issues and others that scholars and practitioners of higher education study discuss and grapple with on a daily basis

Developing Faculty Learning Communities at Two-Year Colleges Susan Sipple, Robin Lightner, 2023-07-03 This book introduces community college faculty and faculty developers to the use of faculty learning communities FLCs as a means for faculty themselves to investigate and surmount student learning problems they encounter in their classrooms and as an effective and low cost strategy for faculty developers working with few resources to stimulate innovative teaching that leads to student persistence and improved learning outcomes Two year college instructors face the unique challenge of teaching a mix of learners from the developmental to high achievers that requires using a variety of instructional strategies and techniques Even the most experienced teachers can find this diversity demanding Faculty developers at many two year colleges still rely solely on the one day workshop model that while useful rarely results in sustained student centered changes in pedagogy or the curriculum and may not be practicable for the growing cohort of part time faculty members By linking work in the classroom with scholarship and reflection FLCs provide participants with a sense of renewed engagement and stimulate collegial exploration of ways to achieve educational excellence FLCs are usually faculty instigated and cross disciplinary and comprise groups of six to fifteen faculty that work collaboratively through regular meetings over an extended period of time to promote research and an exchange of experiences foster community and develop the scholarship of teaching FLCs alleviate burnout and isolation promote the development testing and peer review of new classroom strategies or technologies and lead to the reenergizing

and professionalization of teachers This book introduces the reader to FLCs and to the Scholarship of Teaching and Learning offering examples of application in two year colleges Individual chapters describe among others an FLC set up to support course redesign an Adjunct Connectivity FLC to integrate part time faculty within a department and collaborate on the curriculum a cross disciplinary FLC to promote student self regulated learning and improve academic performance and persistence a critical thinking FLC that sought to define critical thinking in separate disciplines examine interdisciplinary cross over of critical thinking and measure critical thinking more accurately an FLC that researched the transfer of learning and developed strategies to promote students application of their learning across courses and beyond the classroom Each chapter describes the formation of its FLC the processes it engaged in what worked and did not and the outcomes achieved Just as when college faculty fail to remain current in their fields the failure to engage in continuing development of teaching skills will equally lead teaching and learning to suffer When two year college administrators restrain scholarship and reflection as inappropriate for the real work of the institution they are in fact hindering the professionalization of their teaching force that is essential to institutional mission and student success When FLCs are supported by leaders and administrators and faculty learn that collaboration and peer review are valued and even expected as part of being a teaching professional they become intrinsically motivated and committed to collaboratively solving problems setting the institution on a path to becoming a learning organization that is proactive and adept at navigating change

,1998 Evaluation in Foreign Language Education in the Middle East and North Africa Sahbi Hidri,Christine Coombe,2016-09-27 This book presents evaluation cases from the Middle East and North Africa MENA context investigating the various facets of evaluation in different parts of the MENA region and beyond In 19 chapters it explores cases from Tunisia Saudi Arabia Egypt Sudan Syria the UAE Turkey Iran and Morocco The book highlights the impact of evaluation on a range of stakeholders arguing that it has repercussions at the individual societal economic cultural and political levels that it also has an ethical dimension and that it is tailored to people s needs helping them to remain abreast of the effectiveness and efficiency of programs Further the book explores controversial issues concerning different evaluation themes such as teacher and staff evaluation assessment practices text genre analysis evaluation assessment of productive skills textbook and ICT evaluation evaluation of ELT certificates and programs quality assurance ESP needs analysis assessment literacy and dynamic assessment It addresses key challenges such as who the right people to implement evaluation are and the appropriate use of evaluation results to avoid any misuse or harm to any stakeholder In closing the book calls for further research venues on the relevance of evaluation testing and assessment in the MENA context and beyond ASSESSMENT IN EDUCATION Dr. T Manichander, *Faculty Misconduct in Collegiate Teaching* John M. Braxton,Alan E.

Bayer,2003-04-30 In *Faculty Misconduct in Collegiate Teaching* higher education researchers John Braxton and Alan Bayer address issues of impropriety and misconduct in the teaching role at the postsecondary level Braxton and Bayer define and

examine norms of teaching behavior what they are how they come to exist and how transgressions are detected and addressed Do faculty members across various collegiate settings for example share views about appropriate and inappropriate teaching behaviors as they share expectations regarding actions related to research And what mechanisms are utilized to correct inappropriate behavior on the part of college and university teachers The authors work is based on survey results obtained from faculty members at research universities liberal arts colleges and two year community junior and technical colleges Braxton and Bayer s focus is on undergraduate teaching in four disciplines biology history mathematics and psychology In their analyses the authors examine how individual disciplinary and institutional differences influence professorial behavior In contrast to the more explicitly understood and enforced rules of conduct in research the authors find that teaching norms are informally defined and observed They argue that a formal code of ethics for undergraduate teaching would serve the dual purpose of improving undergraduate education and elevating the status of college teaching A groundbreaking study of contemporary academe Faculty Misconduct in Collegiate Teaching is required reading for all university and college instructors and administrators University Teaching James Forest,2018-10-10 Originally published in 1998 University Teaching looks at the world of university and college teaching in the study of higher education Providing a broad perspective it examines preparation assessment and reward from cross cultural perspectives and explores the cultural and social influences that affect these dimensions The book provides a considerable richness in diversity of topics and authors and provokes the reader to observe the many commonalities in the thinking and approaches towards college teaching that pervade the higher education systems worldwide Teaching at Its Best Linda B. Thirteen Strategies to Measure College Teaching Ronald A. Berk,2023-07-03 Student evaluations

of college teachers perhaps the most contentious issue on campus This book offers a more balanced approach Evaluation affects pay promotion and tenure so of intense interest to all faculty Major academic marketing and publicity Combines original research with Berk s signature wacky humorTo many college professors the words student evaluations trigger mental images of the shower scene from Psycho with those bloodcurdling screams They re thinking Why not just whack me now rather than wait to see those ratings again This book takes off from the premise that student ratings are a necessary but not sufficient source of evidence for measuring teaching effectiveness It is a fun filled but solidly evidence based romp

through more than a dozen other methods that include measurement by self peers outside experts alumni administrators employers and even aliens As the major stakeholders in this process both faculty AND administrators plus clinicians who teach in schools of medicine nursing and the allied health fields need to be involved in writing adapting evaluating or buying items to create the various scales to measure teaching performance This is the first basic introduction in the faculty evaluation literature to take you step by step through the process to develop these tools interpret their scores and make decisions about teaching improvement annual contract renewal dismissal merit pay promotion and tenure It explains how to create appropriate high quality items and detect those that can introduce bias and unfairness into the results Ron Berk also stresses the need for triangulation the use of multiple complementary methods to provide the properly balanced comprehensive and fair assessment of teaching that is the benchmark of employment decision making This is a must read to empower faculty administrators and clinicians to use appropriate evidence to make decisions accurately reliably and fairly Don t trample each other in your stampede to snag a copy of this book

Higher Education Christian Gilde, 2007-06-15 Higher Education Open for Business addresses a problem in higher learning which is newly recognized in the academic spotlight the overcommercialization of higher education The book asks that you the reader think about the following Did you go to a Coke or Pepsi school Do your children attend a Nike or Adidas school Is the college in your town a Dell or Gateway campus These questions should not be a primary concern for students parents or faculty in an environment that has to allow students to freely focus on learning But in a time of fiscal uncertainty can higher education ignore the benefits of commercial ventures It may seem foolish to do so However commercialism has gotten too close to certain aspects of academia such as the campus environment classroom activities academic research and college sports This disturbing encroachment of academic ground is addressed in Higher Education Open for Business by a diverse host of authors who are closely involved in higher learning
